MONTHLY CROP REPORT.

Conditions Throughout the Country a Seen by Department of Agriculture. WASHINGTON, Oct. 11.-Following is the monthly crop report issued by

the department of agriculture: The monthly report of the statistician of the department of agriculture shows the average condition of corn on Oct. 1 to have been 78.2, compared with 80.0 last month; 82.7 on Oct. 1, 1899; 82 at the corresponding date in 1898 and 81 the mean of the October averages of the last 10 years. While the decline during September was not serious, it extended to almost every important corn-growlng state, the crops of Ohio, Missouri, Nebraska and Viriginia alone holding their own. There was a decline of I point in Indiana, 3 points in Illinois,

Kansas and Texas and 4 points in Iowa. There has been a general decline in the condition of apples, but in many of the principal apple-growing states the condition is still considerably above the 10-year average, and in none of them except Indiana and Kentucky is it much below. The decline in rice is everywhere reported, but Louisiana, the state of principal production, the condition is still exceptionally high, being 10 or 13 points above the average.

The estimated average yield of hops in pounds per acre is 1,360 in Washington, 1,120 in Oregon, 206 in California. and 595 in New York.

The present indicated yield of barley is the lowest, with one exception, since 1887. It is due mainly to the low yield of 16.7 bushels per acre in California, which is 4.6 bushels per acre below that state's 10 years average. In New York the indicated yield per acre, 22 bushels, corresponds almost exactly to the 10-year average while the yields in Iowa and Kansas are somewhat below the respective 10-year averages The average for quality is \$2.1, against 88.4 last year and 90.6 in 1898.

The average condition of buckwheat on Oct. 1 was 72.8, as compared with 80.5 last month; 70.2 on Oct. 1 1899; 76.2 at the corresponding date in 1898, and 82.2 the mean of the October averages for the last 10 years. There has been a decline during the month in New York and Pennsylvania, the states of principal production of 10 points and 8 pionts respectively. proposing an amendment to the Consti-tution of the Commonwealth.
