Harrisburg, Oct. 16 .- Since the successful raids against the violators of the pure food laws in Philadelphia and Pittshurg Governor Stone and the officials of the department of agriculture have received many complimentary letters from farmers and dairymen who appreciate the fact that the illicit traffic in oleomargarine has practically been broken up.

Governor Stone is determined to drive from the state or into state's prison all who violate the law which was framed to protect the makers of butter and the consumers as well against the dishonest dealers who sell oleomargarine colored in imitation of Butter as the genuine product of the dairy.

Never in the history of any state in the Union has there been as determined and as successful a campaign waged against the frauds in the butter or oleomargarine business as that conducted under Governor Stone's administration.

Before Governor Stone was inaugurated the official records showed that in one year there were sold in Pennsylvania the enormous quantity of 11,-433,341 pounds of oleomargarine.

It is a fact that cannot be successfully refuted that during the last year the sales of oleomargarine in this state fell below 500,000 pounds and the great bulk of this was sold legitimately as oleo without deception.

It is true that there have been some dishonest dealers who have sold oleo colored in imitation of butter, but since the aggressive measures taken by Secretary of Agriculture Hamilton and Dairy and Food Commissioner "Farmer" Cope the violators of the law have reached the conclusion that Pennsylvania is not a healthy place for them, and they have fied to parts unknown. Many who violated the law have gone to jail, others have been fined, and many hundreds of cases are being puahed in all sections of the state, as the result of the energetic and satisfactory work of the detectives and special agents under the direction of the state officials.

Trusts as now met with have come into existence during the last six or eight years, and in every tase by state creation. Did the Democratic government of Mr. Cleveland do anything to control them? The most active agita-tion against trusts has been during the last two years. During these two years This is declared by Mr. Bryan and other Democratic leaders to be the "paramount issue," In other words, It the Republican government has been occupied with many great national and international questions. Nevertheless. during the last session of congress the Republicans endeavored to pass a constitutional amendment to make possible federal legislation for the regulation of trusts, and that effort was defeated by the Democrats. This is a of the stupendous interests of this truth beyond contradiction, and convicts the Democracy of the grossest inused by Mr. Bryan in application to the consistency, if not of a worse offense. As the matter stands today both parties have promised legislation on this

subject. The pledge of the Republican party is backed by the attempt made in the last congress, as already stated. The pledge of the Democracy is branded by their action in defeating the effort so made. This "issue," then, as against the Republican administration, is another makeshift, outery conceived in untruth and signifying only the dire necessities of a party without conscience and hungry for the spolls of office.

Bryan's talk about a desire on the part of President Mckinley to become a "dictator" and "emperor" is the stupidest nonsense. Politicians said this of the martyred president, Abraham Lincoln, when, after the war, he had 400,000 men at his command, for there always have been and always will be politicians who will villify the most righteous;

Today, with a population of 78,000,-000, there is in existence a United States army of about 80,000 men, chiefly volunteers on a limited term of service-men of a stock not made for milltary despotisms. Such talk is an in-sult to the intelligence of the American people and dishonors the men who utter It.

In the course of a recent interview in favor of the re-election of President McKinley, former President Harrison, among other things, said:

The people, recognizing the honesty and efficiency of the heads of the do partment of agriculture, and knowing the great work that they have nerformed since the inauguration of Governor Stone, appreciate the partisan nature and character of the attacks of newspapers controlled by advertising patronage of interests juimleal to the present Republican organization. They know that the facts to be ascertained from the official records of the criminal and civil courts, will show that the violators of the pure butter law have been arrested and made to suffer the consequences of their crime, and that all the sensational partisan and debauched newspapers in the commonwealth cannot refute the facts which they have from time to time given in their own news columns, the raids by the agents of the department of agriculture and the trials in the civil and criminal courts.

HISTORY OF THE LEGISLATION. The history of oleo legislation in Pennsylvania shows that it was only until recently that those who colored oleo in imitation of butter could be

successfully prosecuted. By the act of May 5, 1899, the sale of oleomargarine or butterine is permitted in Pennsylvania provided it be 'free from coloration or ingredients that cause it to look like butter," and that those who manufacture or sell "shall first obtain a license and pay a license fee" and "shall stamp each package with the words 'oleomargar-ine' or 'butterine,' " and shall exhibit a "sign or signs, clearly setting forth that he, she or them are engaged in the manufacture or sale of oleomargarine or butterine, or any similar substance us the case may be, which said sign or signs * * * shall be hung up in a conspicuous place or places on the walls of the room or store in which the oleomargarine or butterine or other similar substance is manufactured or sold.

Under this law the enforcement is placed exclusively in the hands of the dairy and food commissioner.

A multiplicity of paramount issues has not been productive of harmony in the Democratic household. Even those who desire to follow their leaders have had to "about face" so often that they cannot for the life of them tell whether they are coming or going.

After the November elections the gold Democrats will be in position to say "I told you so," and it will be their turn to dictate the conditions for restoration to membership for those who abandoned the worship of the true principles of Democracy for the privilege of dancing around the silver calf.

The Democratic papers print with ghoulish glee every piece of news calculated to show with more or less accuracy that the Filipinos are rising everywhere and killing the soldier boys of the United States. But they forget to add that the responsibility for it rests with some of the Democrats.

with his duty, until congr for some other line of action

Where did Mr. Bryan stand at the time this treaty of peace was being considered by congress? He made a special trip to Washington and did all in his power to have the treaty ratified. If it was right then it must be right now; and it is right now, and no man knows this better than Mr. Bryan. Let Mr. Bryan answer why he is so greatly moved by the alleged wrongs of the colored race in the Philippines, 7,000 miles away, yet dare not raise his voice in defense of millious of colored American citizens here at home in the southern states, who are refused their rights of citizenship? Thus it appeara that it is the congress of the United States, Democrats and Republicans, and notably Mr. Bryan as far as it was in his power, who are responsible for this thing he now calls "Imperialism," and not President McKinley, and not his cabinet, except as they did their duty under the constitution, which they had sworn to perform. In brief, the "paramount issue" is spurious and is no reason at all.

It means false politics, even as another Democratic "issue," "free silver," means false money; and Mr. Bryan knows that both are spurious.

FREE SILVER

Let it be remembered that the correct term is "free columps of silver." There can be no such thing as "free silver.

Mr. Bryan forced the "free silver" 16 to 1 plank of 1896 on the Kansas City convention.

In all his campaigning speeches he remains silent on this question, except occasionally, where he is forced to speak out. One of his most recent utterances on the subject was in September last. He then said on this ques tion: "I stand today where I stood in 1896," We all know where that isfor 40 cent dollars.

One brief illustration of one of the many possible wrongs of free coinage The deposits in this country last year in the savings banks alone amounted to over two and a quarter billions This vast sum went into these banks on the basis of 100 cents on the dollar. The value of the amount of silver in a silver dollar is about 40 cents.

If Mr. Bryan's free coinage at 16 to goes into effect every 100 cent dollar will be reduced in value to about 40 cents, and every holder of merchandise of all kinds purchased by him on the 100 cents basis would be compelled to more than double his selling price to protect himself, while the wage carner, who has no merchandise, but only his labor to sell and his savings in the
