LACKAWANNA STRIKE.

Strikers to Make an Effort to Call Ou Everybody, From the Switchmen

to the Miners. SCRANTON, July 2,-A massmeet-SCRANTON, July 2.—A massmeet-ing of all the striking employes of the Lackawanna shops in this city was held Sunday afternoon in Carpenters' half. Captain McAndrews of the Car Biuldcaptain McAndrews of the Car Blud-str's union presided. The meeting was called for the purpose of taking action upon the refusal of President Truesdale to confer with a committee of his own workmen from this city. After the meeting the following statement was given

"President Truesdale consented to a conference to be held Monday, June 24, at his office, 25 Exchange place, New York, That day he was met by President O'Connell of the machinists, and J. M. Ford, a member of the executive board of the same organization. Mr. Truesdale postponed the interview until Saturday, June 29. The above named met at the office of Mr. Ford at 21 Liberty street, preparatory to meeting Mr. Truesdale. At 11 o'clock Mr. Truesdale sent word that he would not meet them under any consideration.
"Action was immediately taken to call

out the Kingsland shop, the only machine shop working on the Lackawanna system and advice given the Scraaton dele-gate present to make every effort to call out everything on the Lackawanna, from the switchmen to the miners. Mr. Mitchell has already guaranteed every support to the strikeers. CURIOUS DISCREPANCY.

Found That China Agreed to Pay More

Than Powers Wanted. WASHINGTON, June 20.-A curious discrepancy concerning the amount of the Chinese indemnities has developed, by which it appears that China has agreed to pay 35,000,000 tasks, or \$24,000,000 more than the united demands of all the powers. Just how this occurred is not clear to officials, but it appears to have been an error of calculation at Pekin in the first place by those making up the indemnities, and later by the Chinese in their hasty acceptance of the total. As finally made up this total was 450,-000,000 taels, but the present calcula-tion, after taking in all of the demands that are known, makes the total only 415,000,000 tacls. In the meantime China has agreed to pay the larger amount, so that the question now arisen what will become of the excess of 35,-

000,000 taels. Another question which has arisen this connection is as to the amount of bonds which shall be issued to Japan, as that country has drawn attention to the fact that its share of indemnity cannot be negotiated on as favorable terms as of the powers can make. It is sidered of sufficient importance to bring view to learning the general attitude of this government on the matter.

MANY KILLED BY HEAT.

Deaths and Prostrations Reported From Many Places.

Fifty-Seven Killed In New York Alone the Distress Among the People In the Crowded Tenement District Being Pittful-Hottest July 1 Ever Experienced In Eastern Section.

NEW YORK, July 2.—Yesterday was flie hottest July 1 on record. At 3:10 p. m, the thermometer at the weather office reached 98 degrees. This was one legree hotter than Sunday. The records show that in the 30 years preceding on only two days in all that period has a higher temperature been reached. Those were July 9, 1876, and July 3, 1898. On these days the thermometer reached DO degrees. The suffering would have been much intensified had the bumidity been great. The percentage of humidity was only 48. The hattest July 1 which approximated today in the history of the local weather burean was in 1872, when the thermometer reached 95.

At 3 a, m, the mercury was at 80 and continued so until 6, when it rose to 82, and from that rour there was a gradual rise until 3:10 p. m., when the maximum of 98 was recorded, a special thermometer registered 92.

what might be termed a light breeze blowing, but during the early part of the afternoon the breeze died away and the

rity was baking in torrid heat.

The suffering in the city, particularly in the crawded tenement house districts was shocking. As the day grew the deaths and prostrations increased and, although provision was made in all the hospitals for this emergency, the authorities were scarcely able to cope with the great tax made on their resources. An instance may be given of how the situa-tion stood. St. Vircent's hospital has its own ice plant. When constructed this was though sufficient to meet any emergency, but that hospital was forced

emergency, but that hospital was forced to buy 1,000 extra pounds of ice in addi-tion to what its ice plant turned out. Up to taidinght last night there were reported 57 deaths and 141 prostra-tions from the heat and the num-ber is hourly being swelled. This cov-ers a period from 2 o'clock a. a. Monday, and only for the boroughs of Manhattan and the Bronx. There were so many ambulance calls that the peaks were called on to supply patrol wagons and every ambulance did double duty in responding to calls. Many patients were carried to the hospitals in calls and in moving vans. The prevalence of the grip among the horses of the city also tends to mitigate against effective work. In many cases horses had to be obtained from contractors to draw patrol wagons

and ambulances.
Although the weather bureau shows that the maximum was 98, this does not indicate the heat on the streets. Many thermometers registered 108 at 3:10 and all of them over 100 on the street level. It is estimated that 150 policemen are the sick list, their illness arising from

COAL BREAKER BURNED. 500 Miners Rescued Just In Time—Flame May Spread to the Mine.

WILKES BARRE, June 28.—The No. 2 breaker of the Delaware and Hudson 2 breaker of the Delaware and Hudson Coal company was burned down West-nesday and with the engine house, wash-ery, boiler house, fan house, and head house, was destroyed. The fire was started by a hot journal, which ignited some waste. The entire breaker was fire half an hour after the fire was first discovered, and it spread along the trest-ling to the head house over the shaft 600 feet away. The head house was on fire as the miners were being brought up out of the mine. There were 600 at work and the last 200 had a narrow escape, the head house falling a few min-

utes after the last carriage load had been brought up. The shaft caught fire and it is feared it will spread to the mine beneath. The fan shaft is also on fire. Twenty-six mules are down the mine and it is believed that they have been suffocated. The loss is between \$90,000 and \$100,000,
