much to injure the city in the eyes of the world and the statements made during the heat of the campaign in the insurgent Republican and Democratic rewspapers have been copied widely in the Democratic newspapers of the country to the discredit of Philadelphia and the Republican party genally CITIZENS ARE AROUSED.

The public spirited citizens interested in the great centers of learning in Philadelphia, the University of Pennnsylvania, Jefferson Medical College and other educational institutions with world wide reputations, have at last become aroused to the importance. of checking these malicious and damaging reports, and they have impressed this fact upon the editors of some of the more reputable journals of the city which were identified with the campaign against the Republican or-

ganization of this city in the political contest just closed. The Evening Bulletin, which supported the Union ticket, devoted last

week nearly two columns of space to show that Philadelphia was never better governed, that her streets were never in finer condition, that her poin the world can compare with Philadelphia in the protection afforded life and property at this time.

nearly all the discass which are ant a he ratal to human life. There are esp cially on hand germs of consumption pucumonia, typhoid fever, diphtheria. Asiatic cholern, blood poisoning, erysipare not genuin elas and carbuncie

The museum keeps these disenses but tled in tubes constantly roady for imme-diate use. The curator in charge of the laboratory mentioned that he could give

them all to any one in a few moments. He added that he would be able to do this at no serious loss or expense, hus such as there was enough consumption. for instance, in the consumption bottle communicate the disease to many thousands of people, and it was the same

with all the other diseases on hand. In administering pneumonia to a pa tiont, he said, he would select by prefer nce the method of putting a solution o the germs in water in a spraying vessel mmediately contract the affection with absolute certainty every time. He explained that pneumonia is contracted not from a cold or inflammation of the lungs, as people ordinarily suppose, but from the breathing in of pneumonia germs, whose increase and development are aid-

ed by an unhealthy condition, such as a cold may give rise to. The mouths of altogether healthy people very commonly have lots of pneumonia hacteria in them. As for carbuncle, the curator said that he could produce it may time in the most healthy individual by a simple inocalation with a solution of the germs. Once so in oculated you would have about an even chance with death. Spraying the threat with a solution of the proper germs is the method also for conveying diplatheria.

There is no great difficulty in contract-ing Asiatic cholers if you want to. Take a few of the germs from the appropriate bottles at the museum and drink them in water or beef tea. If your stounch is in

a particularly ligalithy condition, you can not take the discusse, but otherwise you pretty certain to have it. It is that an assistant in the laboratory of the famous Dr. Koch once swallowed by aceldent a lot of germs of Asiatic choice, with which experiments were being mole and developed what Dr. Koch believe (a typical case. The assistant recovered by a narrow chance.

The discuses which the government eps thus bottled in curvenicat form are I obtained—the germs, that is to say our actual discussed tissues of patien lifeted with the complaints.
