MR. BYRAN'S conference with Tum Johnson indicate that the montebank element in politics is at work on the plans for 1904.

WHEN in good health Queen Wilhelmina is said to eat six meals a day. This disclosure may explain why she is not often in good health.

THE Democrats in Congress in their vain attempts to strike a keynote for the coming campaign, seem to have gone up against another "Lost Chord."

AN American is painting King Edward's coronation scenery, and another is putting the finishing touches on his education in the mysteries of whist.

JOHN J. LENTZ was defeated in the very nick of time. Were he a member of the present Congress the Philippine discussion would run for two more years at least.

It is undeniable that the Jefferson Bible will make a better text for the Democratic party in the next campaign than either the Chicago or Kansas City platforms.

A BRITISH soldier writes from South Africa: "Kitchener is in good spirits and actually smiles. That's a thing he doesn't often do." Kitchener can afford to smile if his stock of regrets is exhausted.

EACH year the ranks of the "old comrades" show the inevitable depletion which, ere long, will reduce the nation's roll of honor to a mere picket line of the once grand army of a country's heroes.

THE people of the Danish West Indies are reported to be exasperated because there is delay in their annexation to the United States. They voted for it years ago, and the long wait has increased their desire to run up the stars and stripes.

MARTHA WASHINGTON'S portrait is to appear on a postage stamp. There is a chance that Washington's mother may be similarly honored but somehow his father is consigned to oblivion, though he was a good man and considered himself the head of the family in his time.

THE Boston Transcript observes that "the people of the Philippine islands as seen by Senator Hoar are very different from the people of the Philippine islands as seen by any one else we know." Mr. Hoar's whole conception of the subject is an unhappy idealization from his super-heated inner consciousness.

IF all the land planted in corn in the United States this year were massed, the area would exceed the British Isles, Holland and Belgium combined, or four-fifths of the area of France or Germany. In spite of drought the corn crop last year fell but little short of a billion dollars in value. The favorable reports from the cornfield is good news for the country.

FOR unadulterated, double-distilled monkeyism we will put the Carmi, Ill., Democrat against the whole menagerie. After ripping, raving and snorting about the Republicans being the friends of the trusts it has now jumped on the President for prosecuting the beef trust. Mr. Democrat, for heaven's sake take something for your liver or your soul and go to bed.—Moravian Falls, N. C., Yellow Jacket.

"THE admission of Oklahoma, New Mexico and Arizona would be the right kind of expansion," says a paper that favors the surrender of the Philippines. Yet the three territories named were acquired without the consent of their inhabitants and in all of them the original occupants of the soil have been subjected. The surrender policy logically carried back would restore the whole continent to the savages.

THE prosperity that is upon the country is shown in the census bulletin on manufacturing industries in Pennsylvania. The number of manufacturing establishments in the State in 1900 were 52,185, as compared with 50,329 in 1890. The capital invested in manufacturing is shown to be \$1,561,000,000, as compared with \$991,000,000 ten years ago. The total wages paid were \$332,000,000, as compared with \$263,000,000. It is shown that 574,000 men, 16 years and over, are employed in manufacturing, and earn \$239,607,000 annually, while 12,000 women 16 years and over, work in manufacturing establishments, and earn \$23,000,000. There are 35,000 children under 16 years employed in factories in the State, and these earnings are \$6,957,000 annually. The value of the manufactured products annually is \$1,830,000,000. The whole number of wage earners engaged in manufacturing is 735,834, or 11 6-10 per cent. of the entire population. The value of land and buildings invested in manufacturing is 13.6-10 per cent. of the value of all assessed property in the State.

GEN. SHERMAN is reported in a biographical work by John Russell Young to have said: "There was something in Grant—something impalpable; I can not explain it; I only feel it. It made us all do our caps to him." It will be a good historian who does justice to the qualities of Grant and renders clear his secret of power.

THE Postoffice Department is in a quandary as to what to do with a money order which has been presented by Representative Landis. The order was made in April 1899, by Asa Baker, at Mooresville, Ind., and made payable to Robert Martin. The amount is \$15. Recently an heir of Martin presented the order to Postmaster Charles Smith, of Westfield, Ind., for collection. The postoffice at Mooresville is no longer in existence, which accounts for the order being presented at Westfield, the nearest office. Postmaster Smith did not know what to do with the order, and had it sent to Landis. When he presented it to the postoffice officials they were very much surprised. They said they did not know that the money order system was inaugurated at such an early date. The order appears to be genuine, and the officials have taken it up for consideration, and will try to find some way to pay the claim.

THE American farmer pays American wages and American taxes. He is paying now the cost of the war which gave Cuba her independence and go on paying pensions on the same account for many years to come. The benefit given to the Cuban planter is taken out of the pocket of the American farmer. But the Cuban planter pays neither American pensions and wages nor American taxes. He does not pay a dollar of the cost of making his island independent. The only way to get anything from him for all that was spent to make him free is by putting a tariff on his sugar and tobacco. But the Secretary of War and Economies says that we are under obligations to the Cuban planters and they are under none to us! If this view had been suggested before the Spanish War Weyler would still be Captain general and the Secretary of War would not be dividing with him the honor of reconcentration camps and the butchery of children.

Read It in His Newspaper.

George Schaub, a well known German citizen of New Lebanon, Ohio, is a constant reader of the Dayton Volksfreund. He knows that this paper aims to advertise only the best in its columns, and when he saw Chamberlain's Pain Balm advertised therein for lame back, he did not hesitate in buying a bottle of it for his wife, who for eight weeks had suffered with the most terrible pains in her back and could not get relief. He says: "After using the Pain Balm for a few days my wife said to me, 'I feel as though born anew,' and before using the entire contents of the bottle the unbearable pains had entirely vanished and she could again take up her household duties." He is very thankful and hopes that all suffering likewise will bear of her wonderful recovery. The value of the balm is sold by Killmer Bros., Tionesta, W. G. Wilkins, West Hickory, Pa.
