GENERAL GOBIN'S ORDER.

Situation Generally Quieter at Tam agua and Lansford.

Tamaqua, Pa., Sept. 1. - The work of the strike leaders in cautioning their men that violence would be met with bullets from the troops has had its Cream of the News Culled From Long effect

Saturday, outside of a flurry at Sum mit Hill, where strikers surrounded the home of a non-union man and made a wild demonstration, nothing of ar untoward sature occurred.

At Lansford, however, there appears to be a deep undercurrent of dissatefaction that would require little to surge it into the riotous condition that existed until lately, when General Go bin's strenuous order produced quiet. The strike leaders are loud in their

denunciation of the order, and brand it as unnecessary, and issued in the interest of the corporations. General Gobin denied this and while he admitted that the order was drastic in its nature, he considered that the situation fully warranted it.

More men reported for work Saturday than on any other day since the strike began. They were put to work at No. 4 colliery, where the coal has been mined for the past week.

A leading official of the Lehigh Coal and Navigation company admitted that 1,000 tons of coal are being mined and shipped daily. He said that Monday would see still more men at work. They will be put to work at No. 8 colliery. This colliery has been in operation several weeks, washing coal from a nearby bank.

On Monday, an effort to mine coal here will be made. In this manner it president to "proceed about Scpi. 11 fa expected that in the course of a week or so every colliery in the Panther Creek valley will be working.
