One of the most appalling railroad wrecks that has occurred in the vicinity of New York for many years, costing 23 lives and injuring over 50, took place Tuesday night at Craceland on the Central Railroad of New Jersey, near Westfield, N. J., when the Royal Blue Line express plowed at top speed into the rear of a local train.

Immediately after the crash three of the shattered cars of the local train took fire, rendering impossible the rescue of many of the wounded who were pinned fast in the wreck. Many bodies are believed to have been consumed. On board the flyer all the passengers, although badly shaken up, escaped uninjured save for trifling bruises.

FOREST REPUBLICAN.

TIONESTA, PA., WEDNESDAY, FEBRUARY 4, 1903.

Mr. Bowen Contends For Venezuela That as Negotiators Are Agreed on All Other Points the Blockade Should Be Raised Pending Settlement of Question by The Hague Tribunal.

ernment.

It is in reply to the proposition submitted at a joint conference of the negotiators by the British ambassador that the allied powers be allowed two thirds of 30 per cent of the custom receipts of the ports of La Guayra and Porto Cabello, and that the United States and the other claimant nations, France, Belgium, Holland, Denmark, Spain, and Norway and Sweden, content themselves with the remaining one third of this percentage, that is 10 per cent of the receipts of these two ports.

In the note received by the British ambassador from Mr. Bowen the lat ter refuses point blank the proposition for a 20 and 10 per cent division on the ground that to recognize the principle it embodies would be absolutely offensive to modern civilization.

In view of the fact that the negotiators are agreed on all save the question of preferential treatment, the am bassador is informed that Venezuela has decided to submit that question to The Hague arbitration tribunal.

Acceptance of this proposition, Vene zuela contends, carries with it a rais ing of the blockade, the general under standing being that the blockade would end when the negotiators at Washing-

ton had reached an agreement.

Shortly after the school session opened flames were noticed issuing from the radiators in the floors. The teachers marched all but seven of the upils out in order.

The seven remained behind to get their wraps and finding themselves cut off by the flames, jumped from the second story windows. The pupils and teachers lost all their books and WTRDS.

The furnace had just been installed and had not yet been taken over by the school board. The loss is \$4,000 and the insurance \$3,000.

Compromise of Al'ies' Claims. Propositions involving a compromise of the allies' contention for preferential treatment in the settlement of their c'aims against Venezuela have been submitted to the governments of Great Britain, Germany and Italy by their representatives in Washington, and while no answers have been received as yet there is reason for the belief that the allies will see a way to accept the latest proposition.

The proposition now under consider ation is understood to be a modification of the allies' contention that they be recognized as Venezuela's preferred claimants in the payment of the indemnity. It provides that for a short period, perhaps six months or a year Great Britain, Germany and Italy shall receive exclusively 30 per cent of the customs receipts of the ports of Puerto Cabello and La Guayra, and at the end of the period that all the claimant na tion be placed upon the same footing. The 30 per cent of the receipts of these two ports will then be divided among all the claimant nations in ratio based on the amount of each na

tion's claim. The plan will enable the allies to withdraw their ships from Venezuelau waters without serious loss of prestige

Mr. Bowen has been assured that the representatives of the allies here will give him a final answer at the earliest possible moment, and exchanges are in progress between the representatives here of the allied governments was lost by the sultan's army in the concerned and their home offices in an battle of December 23, was recaptured effort to reach a settlement agreeable to all concerned.

The Washington government and Mr. Bowen are convinced, because of Baron Von Sternberg's activity in the matter, that Germany wants the Vene zue an question settled with all possi ble dispatch.

Price Situation Remains Strong.

Trade developments confirm the sanguine expectations and predictions made at the outset of the month. Wholesale jobbing trade in spring dry goods, millinery, boots and shoes and hats is improving steadily, January' jobbing business at leading cities East and West being the best ever recorded in that month. Shipments on orders are larger and earlier than in preced ing years.

Retail trade reports are hardly s favorable. Unseasonable weather dulli retail distribution in this line, and the usual January clearing sales are at tracting less than ordinary attention. The general price situation remain strong, corn, among the cereals, and cotton, among the textiles, leading.

sociation organized for erecting at the national capital an appropriate and national memorial to the "author of the Declaration of Independence," through its president, Admiral George Dewey, has issued an appeal to the Americar people for funds to carry out the ob

ject of the association. The appeal, which is signed by Ad miral Dewey, pays a tribute to Thomas Jefferson and asks the people to con tribute to the memorial according to their ability. The character and cost of the proposed monument are not stated.

Epidemic of Typhoid Fever.

The epidemic of typhoid which re cently broke out in lthaca has attained serious proportions. Nurses of the City hospital were obliged to give up their rooms to make room for patients, the hospital having been crowded for some time. The Rev. C. W. Peiser of the Unitarian church offers to turn the church over for a hospital. There are at least 200 cases in the city at present and the list is rapidly increasing. Physicians agree that the epidemic is due to impure drinking water and all citi zens are warned not to use city water before it is boiled.

Republican Mayor Resigned.

Following the decision in the su preme court that G.R. Miller Democrat had been elected mayor of Ithaca last fall, came the resignation of Mr. Gund erman, the Republican mayor, who had held over pending litigation. While a stay of proceedings was granted on the motion of Mr. Noble, the Republicar attorney, Mr. Gunderman considered that the matter had been settled by the court. City Clerk Marion and Super intendent Parks, appointees of Mr Gunderman, also resigned.

Consolidation of Electric Roads. Plans are on foot for a consolidation of electric roads which will make one through line between Buffa'o and Chi rago.

It is understood that in refusing this ast proposition submitted by the British ambassador on behalf of the allies Mr. Bowen takes the ground that he cannot accept in principle the conten tion that blockades and bombardment of forts, and the consequent killing of helpless men, women and children, entitles any power or alliance of powers

to preferential treatment at the hands of a civilized nation.

FREE COAL HELPS J. J. HILL.

Supply For the Great Northern at a Daily Saving of \$4,000.

Tacoma, Wash., Feb. 3 .- The re moval of the duty on coal is believed to be benefiting President Hill and the Great Northern Railway to a greater extent than any other corporation because there is no good coal in Montana directly tributary to the Great Northern, Mr. Hill for several years has been booming the development of Crow's Nest Pass coal fields in Southern Canada. Recently he completed a branch connecting the Great Northern with Crow's Nest coal mines.

At present the Great Northern is hauling 300 cars, or 6,000 tons, daily across the Montana line for use on its mountain divisions. Development work is being rushed and very soon the imports of ecal will reach 10,000 tons daily.

Previous to the removal of the duty the Great Northern was paying the customs department at Gateway 67 cents duty on every ton. The daily saving now exceeds \$4,000. When the cut-off can be built connecting the Great Northern with the Northern Pacific and the Burlington in Montana, the latter roads will also use Crow's Nest coal in the Rocky mountains
