## America's Point of Danger.

At what point shall we expect the approach of danger? Shall we expect some transatlantic military giant to step the ocean and crush us at a blow? Never! All the armies of Europe, Asia and Africa combined, with all the tressures of the earth (our own excepted) in their military chest, with a Boneparte for a commander, could not, by force, take a drink from the Ohio, or make a track on the Blue Ridge in a trial of a thousand years. At what point then is this approach of ever reaches us, it must spring up among us. It canot come from abroad. If destruction be our lot, we must ourselves be its author and finisher. #### Tendency of the Times.

The tendency of medical science is to ward preventive measures. The best thought of the world is being given to the subject. It is easier and better to prevent than to cure. It has been fully demonstrated that pneumonia, one of the most dangerous diseases that medical men have to contend with, can be pre-vented by the use of Chamberlain's Cough Remedy. Pneumonia always re-sults from a cold or from an attack of influenza (grip), and it has been observed that this remedy counteracts any tendency of these diseases toward pneumonia. This has been fully proven in many thous-ands of cases in which this remedy has been used during the great prevalence of colds and grip in recent years, and can be relied upon with implicit confidence. Pneumonia often results from a light cold when no danger is apprehended un-til it is suddenly discovered that there is fever and difficulty in breathing and pains in the chest, then it is announced that the patient has pneumonia. Be on the safe side and take Chamberlain's Cough Remedy as soon as the cold is con-treted. It always cures. Sold by Dunn. Tionesta, W. G. Wilkins, West Hickory
