THE impression has gone abroad somerent events introduced. how or another that the Pennsylvania legislature has passed an anti-wife-kissing law. This, we are assured, is not the case, and the laudable practice of wifekissing, now and then, may be indulged in without lear of arrest, that's counting that every fellow kisses his own wife. for which we need a hall or room for so-

cial affairs, as well as for the children. THE meeting of the Republican County Committee at Republican headquarters last Thursday evening was quite well attended. The question of holding the regular spring primaries was discussed reed weaving, etc. and it was the unanimous opinion of those in attendance that a meeting of the in the hall, also the W: C. T. U. and a committee should be called for Saturday, free shelf of books. This is an advantage April 25th, at 2 o'clock p. m., for the purmuch appreciated by all. At the initial pose of taking the matter up and dismeeting held in the building Miss Van posing of it. Rennessler, of Randolph, N. Y., was

Snyder's candidacy and prospective economics nomination for Auditor General by the next Republican State convention is said to please his great host of friends in his home county of Chester immensely, Wherever the Senator is known, and that is in practically every section of the State, he is very popular. In him the party would have a strong candidate, with a clean record and free from party factionalism.

It is said the legacy of a certain man in New York is the secret which bringshim \$50,000 a year. His father invented the only ink which will print on the peculiar surface of the bank notes of the United States. On his death bed he communicated the secret to his son. This man locks himself up for about two weeks, every year and makes a sufficient quantity of the fluid to supply the government for twelve months, for which he receives \$50,000. Now, this sounds mighty well but if some reliable fellow will youch for its truthfulness it will help the story immensely. Suppose the fellow with the secret should suddenly croak with apoplexy or heart failure, what would this glorious Union do for new "spondulix ?" It's taking too great risk to leave this secret in the bosom of an ordinary individual.

REFUBLICAN policy has not caused the rain or sunshine, but it has supplied and protected the market open to the things the rain and the sunshine have brought forth. Nature has given the land, and with all its latent possibilities, but the land would be going to waste if there were no marts for that it yields. Industry has been stimulated from the certainty that its efforts would not be for naught.
