Interesting Letter From Idaho.

Ed. Republican

Dear Sir: -I wrote you about one year ago, giving some account of this part of the West. Since then we have become somewhat a part of the natives, and feel as though we were old residents.

gold and silver, (a few years ago they dition of the mucous lining of the Euwere more for silver than gold, but a flamed you have a rumbling sound or change has come over them to some extent and the silver craze has abated, The West changes as well as the East, It seems a queer proposition, yet nevertheless true, that almost all the people cases out of ten are caused by catarrh, one meets in the West are from some one of the Eestern States. I am from Pennsylvania, another is from New York, any case of Deafness (caused by catarrh) some from lows and even a few achowledge that they are from Missouri, but not many, for the people of that State seem to have the reputation here that

they are, to say the least, "a little slow." I have only met one native-born, or at least a man who sai i he was born in Idaho, and in fact, when he was born the present State was included in Utah.

Pocatello, where we first "squatted," has been improving ever since we came. Last year the railroad, the Oregon Short Line, built extensive machine shops costing nearly a million dollars; a magnificent Masonic Temple was built, as IT is estimated that, with no legal obwell as many other solid improvements. spend another million dollars in the erection of large car shops, possibly a signed and contracted for which will be commenced as soon as spring opens up. We now have free mail delivery and a daily newspaper, as well as a tri-weekly: Another new bank, the Bannock, named since I wrote you. The reservation has been opened, and while gold, silver and copper mines have not been found on top of the ground, yet it is known that there THERE is little mercy in the heart of are some fine mines, but it will require of the finest electric light plants in the United States. The electricity is brought from American Falls to this place, a distance of 21 miles, and there is plenty of power for all the purposes that may require it. Last year there was a boom and real estate went way up in the sky. Wonders in the reservation that did not materialize were looked for, but the froth has gone down and this city is now on the verge of a substantial and permanent

I do not know of a place in the whole country that offers better chances for the investment of capital. Property can be bought and houses built for rent, that will yield an investment of 20 per cent, feel for the disappionted Representative- There never has been a time since we arelect Hearst. He has put all his eggs into rived that honses were a drug on the one basket, the 16 to 1, Bryan basket and market, and what is called a "shack" here, houses of three or four rooms, made simply of boards, always commands from \$12 to \$15 per month. From five to seven years rental will give back all the money invested.

Government land can be had within a few miles of the city for \$10 an acre and the Idaho canal will run through this property in a year or so and when it does, the same land cannot be bought for was a guest at the White House, M1. less than from thirty to fifty dollars an Roosevelt asked him what he thought of acre. You may ask the question, if this the situation in Washington. Sniffing a is the case, why do not the people here invest? They do. And there is no community in the world who back their faith in their surroundings to a greater extent than do the people of the West. But you must realize the extent of the proposition, the vastness of the land that there is in the West. Few of the Eastern people have any conception of the large amount of land that this part of their own country contains.

There is no man who will work, and the West does not extend an invitation to any one who does not work, who cannot do well. No matter what his trade or occupation may be, there is occupation for him in this country. It he be a farmer, the rich soil is here which will produce in abundance all he may desire and far beyond his capacity in the East. Where the same platform in St. Louis on the oc- irrigation is used, and you cannot farm easion of the dedication of the St. Louis | without it, the farmer is never dependent fair, and curiosity is keen in anticipation on rain. He does not, as they do someof the receptions given the two political times in the East, have prayers offered for the refreshing rain to make his crop grow, all he has to do in this land of sunshine is to turn the water on and the the country of Cleveland's Gorman-Wil- ground will give her increase, many hundred fold. Will the people do it? Where penters were a scarce article here last summer and are likely to be this. If a blacksmith or a stone mason, there is work and in plenty. While there is room for all honest men and women in kee.

The vastness of the West and the differcrowded East would do well to investigate. Where there are hundreds of men for one position with you, there are places waiting for them somewhere in this country.

It does seem strange to me that when the railroads are offering such low fares comfortable as at the present time, that more of the men of the East do not come out and investigate for themselves. In coming to Pocatello, you can get into a GERMAN legislators continue to agitate car at Chicago, and remain in it until measures aimed at American industrial you arrive at this place. We extend a cordial invitation to all our friends to come to Pocatello, to visit land awaiting man's turning into fores, in fact to view the wonderful possi-bilities that nature with her bounteous ture that is in my power to give I shall be pleased to give to anyone asking for it.

Mr. editor, we will be pleased to show you the land in this part of the West if you get tired of printing after you have made your fortune-for we know from experience that there are many fortunes in the newspaper business in the East(?) W. C. MILTENBERGER. Pocatello, Idaho, March 25, 1903.
