presence of each other. their duty to see that these are promptly on hand on the day of the primaries, WM. G. MORROW, Chairman.

THE Interstate Commerce Commission appears to be making it very warm for the coal trust.

The Democrats are beginning to talk of nominating a "safe, conservative man." This means a man who will be recognized by the trusts as one who will do their bidding.

It is noteworthy in connection with the present postoffice scandals, that in no instance is any official whose conduct is being investigated, an appointee of President Roosevelt.

Ir is no small compliment to the American schools of dentistry that practically all the crowned heads of Europe and their families will employ only American dentists.

SENATOR GORMAN is too wise to come out at this early day as a candidate for the Democratic nomination, but his press agents and political heelers are working

THE Bureau of Forestry estimates the forest area of the United States at 700,000,ber as they will yield.

the benefit of the protective policy?

THE Western Union Telegraph Company has closed its office at Butte, Mon-

Ir has finally become necessary for the Government to store, in an air and light proof safe, the original Declaration of Independence. This is due to the poor quality of ink used for the signatures, many of which have faded beyond recognition.

THE Wall street interests have made it attacked by fire. His clothes and shoes evident that they do not desire the elec- were burned almost entirely from his tion of President Roosevelt, but in the opinion of competent judges that will only strengthen the high estimation in road reached Crow's camp. They all which the President is now held by the tried to reach the green woods but were great majority of the voters.

in different parts of the country, advocatadd materially to the popularity of agricultural pursuits and emphasize the dig- ror and death, all rolled into one. nity of that profession. -

THE necessity for great quantities of timber for railway ties emphasizes the advisability of preserving the forests. It has been ascertained that each mile of the 250,000 miles of railway in the United States requires 400 ties per year. It takes 50 years to grow a tree that will make three ties and ordinarily requires 25 acres to furnish 400 ties.

THE Governor has approved the ballot bill which was drafted by a committee appointed by Senator Quay as Chairman of the Republican State Committee. The bill makes no material change in the present law, except that it requires the grouping of the candidates of each office under one head in the same column and in place of the circle at the head of the column it provides for a square opposite the name of each party. The new law will do away with the great blanket ballot, which is a whole lot to be said for it.

Great is the Potato.

A writer in an exchange says to day Germany fairly rivals Ireland with its potato crop and outdoes most other countries. Fully an eighth of the arable land of the empire is planted to this nutritious vegetable. Half the large yield is used directly as human food; a considerable other portion is given over to fattening other portion is given over to fattening.

Mr. H. P. Burbage, a student at law in Greenville, S. C., had been troubled for four for five years with a continuous cough which he says, "greatly alarmed me to fear that I was in the first stage of consumption." Mr. Burbage, having seen Chamberlain's Cough Remedy adpotato crop and outdoes most other counstock. There still remains an enormous vertised, concluded to try it. Now read surplus after that, however, and it is the
