The first authentic information from Kansas City, Kan., was received last night. In that district 20,000 people are homeless, many have been drowned and the number cannot be really estimated. The property loss has been heavy. The situation there is a parallel to the situation here-apparently no better and no worse.

There is no great probability that there will be further loss of life, if the river does not rise very suddenly. All through the wholesale districts and in body, will recover; Frank Rice, arm the east and west bottoms there are people still in the houses, many of them anxious to be taken away, a goodly number of them content to remain where they are with all the chances of flood. The police have done wonders in rescuing people, and have probably brought 250 of them safe to the high ground since sunrise.

In the east or west bottoms a num ber of obstinate people are still clinging to their homes. Although the police have run boats beneath their windows and offered to save them, they refuse to leave and will take their

chances for another night at least. It is utterly impossible to form any estimate of the number of dead in Kansas City. There have been manifold stories of how boats laden with people have been seen to sink-there have been reports without end of bodies seen floating by on wreckage, of precipitation as compared with the men who have tried to drive wagons laden with their household effects The drowth is ruining crop prospects against certain death in the swift curof all kinds hereabouts and truck gar- rent and gone down in the flood. It is the general belief, however, among those close to the senator that he still doubts the advisability of the adoption of a resolution indorsing President Roosevelt's candidacy by this year's convention. But it is pointed out that in deferring to the president's judgment and expressed wishes Mr. Hanna demonstrates that his original position in the matter was at no time prompted by personal antagonism to President Roosevelt.

August W. Machen Arrested. By far the most sensational development of the postoffice investigation occurred Wednesday when August W. Machen, general superintendent of the free delivery service, was arrested on a warrant issued on the information of postoffice inspectors charging him with having received "rake offs" from contracts made with the local firm of Groff Brothers for a patent pos-

tal box fastener. The warrant specifically charges him with receiving \$18,981.78 since Aug. 8, 1900. It is alleged, however, at the department that this amount does not represent all that Machen obtained in connection with those contracts, it being charged that he has profited by them for several years prior to the date of the first contract
