# the toothsome vegetables of the season if you will call at the White Star Grocery, Suit Styles -Conscience is something that troubles for Spring.

No very radical changes have been attempted in men's styles for spring. Rather is the tendency towards conservatism-less of the extremo close fitting back and flaring skirts-less of the "pugilistic" shoulders and more of an effort to give a well shaped man a natural look.

But fabrics and patterns have changed, and a visitor to our store will instantly note the difference between those now shown and last year's styles. We show everything deserving of place in a good clothing store.

The new mixtures of olives, blues and browny with (almost) invisible stripes and overlaids, together with the more pronounced patterns afford ample opportunity for satisfactory selection.
