Beautiful Carpets and Rugs.

Spring is the best time to buy new floor coverings. Our large carpet stock includes every known and standard quality, and the patterns we show are such as give a room that comfortable and cozy effect. The stock includes Ingrains, Tapestries and Body Brussels, Wiltons, Axminsters and Velvets. Our immense display of rugs is a source of commendation from every buyer who visits our store. The line is conveniently displayed on a rack and can be seen to advantage in five minutes. Better comparisons can be made and a better choice can be had. We invite you to come and see the unusual qualities, unusually pretty patterns and the unusual values we offer.

\$1.15 Velvet Brussels. 89c Yard

Not remnants, but choice 1906 styles of such makes as Smith's, Imper ial, &c. With or without borders.

\$1.35 Velvet Wiltons. \$1 Yard

Such standard makes as Sanford's, Beatty, &c., a:1 the new spring culor effects, floral patterns, scroll patterns and the popular self colored greens and reds.

75c Tapestry Brussels, 55c Yard

Over a dozen patterns to select from and every one of them new and desirable. You can depend upon it, you're buying this grade just 20 cents a yard under everybody else's price.

\$25.00 9x12 Rugs.

Either Axminster or Body Brussels. Take your choice from a splendid

KILL TYPHOID, SAYS DR. DIXON

Observe Simple Precautions and It Is Easy.

CUT DOWN DEATH HARVEST

Advice to Nurses, Attendants and Others In the Sick Room.

"Wipe out typhoid by killing the germs contained in the discharges of the patient before they leave the sick cular on typhoid fever addressed to nurses and attendants in charge of persons suffering from this infectious

"I want to send that message ringing through the whole state," said Health Commissioner Dixon the other day. "I want to get every local Board of Health to see that in every home where there is a person ill with typhoid fever, the physician, the nurse the duty of letting no infection from their patient be the cause of giving the disease to another, and the way to do this first of all is to kill the germs of the disease that comes from the patient before these germs leave the sick room. I am determined that the appalling harvest that typhoid is reaping in Pennsylvania shall be cut down. It can be done-it must be done. If, beginning today, the nurse or attendant in charge of a typhoid fever case will see to it that the discharges from the patient are thoroughly disinfected before they are carried out of the room in which the typhoid victim is confined we can almost wipe out typhoid in a ways in the world to blot out a disease that is appallingly epidemic throughout the whole state, if only each and every person to whom this message is directed will hear it and

In his typhoid circular Health Commissioner Dixon sets forth simple methods of killing the typhoid germs before they are carried out of the sick

Secure any of the following disinfectants: Kreolin, Lysol, Tri-Kresol, Chlo-rinated Lime (chloride of lime or bleaching powder), or a 40 per cent. so-lution of Formaldehyde, which is pre-

ferred.

Make up disinfectant solutions from

before emptying the same. Never empty the discharges upon the surface of the ground, or into a stream, even though disinfected.

If the discharges are emptied into a

never be buried until after being thoroughly disinfected, and then never less
than one foot deep nor within one hundred feet of a well or water course.
If a privy well is used, empty three
gallons of any of the disinfectant solutions into it daily.
Keep constantly on hand a basin or
other vessel containing one of the solutions mentioned for the purpose of
washing your hands.
Wash your hands in the solution
immediately after handling the patient,
the discharges, or any of the body
clothing.

clothing. Keep constantly in a convenient place a tub or other proper vessel containing a sufficient quantity of one of the disinfectant solutions in which to soak all of the patient's bed and body clothing

clothing.

(If Chlorinated Lime is used for this purpose, one-half pound should be diluted with eight gallons of water.)

Place all such clothing in this vessel immediately upon its removal from the bed or body of the patient, leaving it in the disinfectant solution for at least three hours, after which it should be boiled thoroughly for at least one hour. Do not permit the use by others of drinking vessels or eating utensils used by the patient, until boiled for at least one hour.

least one hour.

Do not eat or permit others to eat scraps or remnants of food left by the

Burn all such material at once Add a disinfectant solution to all water that has been used for bathing the patient, and dispose of it in the same manner as the body discharges.

Do not throw this water on the surface of the ground

face of the ground.

Thoroughly disinfect all discharges from the mouth and nose.

If received in vessels treat as all

other discharges.

If received in handkerchiefs treat as bed clothing, or if received in old linen burn the same at once. Thoroughly screen the room to ex-clude all flies and mosquitoes.

Destroy all insects in the room.

Exclude domestic animals.

Do not kiss the patient.

Do not encourage visitors to the sick

Aside from their disturbing influence on the patient they may through care-lessness contract the disease.

Boll all water used for domestic pur-

Follow these rules during the entire illness, do not relax them during con-valescence, but continue until entire recovery, as the specific germ of ty-phoid may exist in the stools or urine of typhold patients for at least four weeks after the disappearance of the

Upon the termination of the case bedding freely with a 40 per cent solu-lion of Formaldehyde. Roll up and allow to remain for twenty-four hours, then expose to fresh air and sunlight for twenty-four hours.

The room should be thoroughly disinfected after the recovery of the pa-

Save these instructions and heed them if you have a typhold case in

A GUARANTEED CURE FOR PILES. Itching, Blind, Bleeding or Protruding Piles. Druggists are authorized to refund money if Pazo Ointment fails to cure in DECEIVING THE PUBLIC.

sible Stage Tricks.

Explanation of the Seemingly Impos-

When you see a man come out on the stage and shoot the ashes off a cigar which is being smoked by an assistant, don't believe all you see. A hat pin is run through the cigar, the point just reaching the ash. The assistant just pushes the knob at the other end and down falls the ash to great applause on the part of the audience. Of course, only blank cartridges are used. Breaking two glass balls with two pistols is almost as simple. One of the pistols only is loaded, and with shot; the other has a blank cartridge. The loaded pistol is aimed between the two balls and shot scatters, breaking them both. Extinguishing several numbered candles by number on request of the audience is seldom more than a hollow joke. Behind each candle is a room to lay other fellow beings low hole in the target. An assistant hidwith this disease." Such are the in- den behind it simply blows out the structions that Health Commissioner candle, taking care to blow the right Samuel G. Dixon gives in his new cir- candle at the right time-that is when the pistol cracks.

Painting a complete picture in a jiffy in presence of the audience is also artifice. What looks to you like an immaculate and untouched canvas is in reality a finished picture covered with whitewash. All the "artist" does is to simulate painting. while he merely wipes off the whitewash with his brush. The result is an excellent picture.

Those awfully heavy looking dumb bells of the strong man are someor attendant shall be impressed with times somewhat hollow at the core. You will notice that they are always put in the same place, preferably on a special platform when the man from the audience is invited to lift them. Under the platform are powerful magnets holding the weights down. Suddenly roll the bar off the platform and you can probably lift it with one hand, as that operation releases it from magnetic control.

Irrigation in the Platte.

Expansion by irrigating has meant that the desert land of the Platte valley now blossoming as the rose and selling from \$10 to \$300 an acre. Fifty years ago it was considered worthless. Over 500,000 people year's time. I realize that this is a live in the irrigated terrritory of this big "if," yet it is one of the simplest stream, including those of Denver, Cheyenne, Laramie, North Platte and other places. The measurements of the water used and the water returned to the stream reveal the fact that a large proportion of the water diverted by a particular canal is not wholly lost, but returns to the stream and is used over and over again. Some of the measurements showed that in low water the return seepage tends to increase the flow of streams rather than cause diminu-

The Use of Glass Coffin. That glass coffin in which Tamagno, the great singer, was buried Make up disinfectant solutions from the above by adding three teaspoonfuls of Kreolin, Lysol or Tri-Kresol or eight teaspoonfuls of the 40 per cent. solution of Formaldehyde to a pint of water, or one-half pound of Chlorinated Lime to one gallon of water.

Keep constantly in the bed-pan urinal, chamber or commode or vessel intended to receive the discharges from the bowels or bladder, a moderate quantity of the disinfectant solution selected, and after receiving the discharges add a quantity to equal the amount of the discharges.

Cover and remove the vessel and allow the contents to stand for one hour before emptying the same. intervals these should be opened and himself inspected by the trustees. But the latter had had enough of the gentleman. They built almhouses with his estate.

The Kalser's Taxes.

Does the Kaiser pay taxes? Yes, to a certain extent, for it has just become known that he pays fifteen shillings a year for his gun license, which is probably more than King Edward does, if his majesty enjoys the same immuity from burdens of this kind as he does with respect to his motor car, which is the only one in the kingdom without a number. The emperor's ticket runs: "Valid for one year. Twelve months' shooting license for his Majesty the Kalser and King, living at Berlinfrom December 1 till November 30, 1906. Von Borries, Chief of Police, Berlin.

Labor in New Zealand. Labor is so scare in New Zealand that the Government of that colony has asked its High Commission in London to find in England and send out 1,000 laborers for the construction of a new railway in the North Island. They are guaranteed three years' work and inducements will be offered them to remain permanently. There is also great demand for agricultural laborers in Western Aus-

Underground Telegraphy. There is now underground telegraphic communication between London and Scotland. Germany's underground system dates from 1870. France followed suit, in 1879, as the result of a great storms that isolated Paris in 1875. Up to date her system has cost \$36,000,000, but is be lieved to have more than paid for itself. Lines constructed in 1880 are still in excellent condition.
