San Francisco Disaster Almost Paralleled at Valparaiso, Chili.

Colector Murray Not Guilty-Bounties on Marriages-Government Buying Silver - New G. A. R. Commander. Biggest Lake Steamer Launched. Jerome Candidate For Governor.

At 7:32 o'clock last Thursday evening Valparaiso experienced an earthquake of great severity and during that night 82 shocks were felt.

Most of the buildings of the city were either ruined or damaged. The loss will be enormous, probably reaching \$250,000,000.

· Two thousand persons killed is considered to be a fair estimate of the casualties

Vina del Mar (three miles from Valparaiso and having a population of over 10,000), Quirihue (225 miles to the southward with a population of 2,500), Salto Limache (15 miles to the northwest with a population of 6,500), Quillota (25 miles to the northwest with a population of 10,000) and villages all around were destroyed.

Most of the damage was due to fire which started immediately after the

Collector Murray Not Guilty.

Fred O. Murray of Buffalo was acquitted on Thursday of the charge of grand larceny in connection with what has been known as the grave yard scandal. Murray was tried on au indictment charging the larceny of \$29,304 on June 11, 1901.

After the prosecution had closed its case, and before the defense opened, Justice Sutherland directed the jury to give a verdict of acquittal, saying guilty knowledge of the transactions

Murray was county treasurer at the time John W. Neff was county auditor, Neff has been convicted of grand larceny for connection with the same affair, and is now under sentence. He is out on a certificate of reasonable doubt pending an appeal.

Murray is now collector of the port of Buffalo. He has been under suspension since the indictment was found against him.

Bounties on Marriages.

Swift & Co., meat packers of Chicago, have offered a sliding scale of wedding presents from \$50 to \$200 to all men in their employ who will marry. The reasons advanced by the company for the increased value of benedicts are:

A married man can be depended on better than an unmarried man. He has increased domestic responsibilities and takes his work more seri-

ously. He places his work higher in importance than does the youth whose brain is filled with thoughts of girls and light social affairs.

He is not as extravagant and flighty, hence can be trusted in financial matters to a greater extent than the single man.

The larger a man's family the more falthful he is to his work, his responsibility being such that he works more energetically for increased wages.

Price of Silver 66.62 Cents Per Ounce. Pursuant to the announcement of the secretary of the treasury on Aug. 1st that he desired to receive tenders of silver four bids were made to Director Roberts of the mint last Wednesday. The bids were opened and after being submitted to Secretary Shaw, it was announced that the government had purchased 50,000 ounces of silver, 999 fine, at 66.62 cents per ounce. It is not the custom of the treasury to announce the name of the individual or corporation through whom the silver is obtained and hence no name of the successful bidder can be given. It is the expectation that the government will require from 50,000 to 100,000 ounces of silver per week for an indefinite length of time. It is the purpose therefore of Secretary Shaw and Director Roberts to receive bids on Wednesday of each week here-

after until further notice. Cannon's Presidential Boom. Coincident with the launching of a presidential boom Joseph G. Cannon, speaker of house of representatives. was nominated unanimously for an 18th term in congress by the Republican congressional convention of the 18th Illinois district. Resolutions were voted by the delegates setting forth their unanimous belief that Speaker Cannon is the fittest candidate of the Republican party for president of the United States. Speaker Cannon thanked the delegates for their indorsement and said that while he did not seek the nomination for president no man | dergoing an operation for stomach | wounded.

In 1906 the articles which showed each an exportation of between \$50, 000,000 and \$100,000,000 were five in number-copper manufactures, refined mineral oil, corn, flour and manufact ures of cotton. A decade earlier, it 1896, but two items fell into this

group-refined mineral oil and flour. In the fiscal year just ended 17 ar ticles or classes of articles showed each an export value of from \$10,000, chemicals, oats, vegetable oils, timber corn, wheat, cattle, tobacco, leather cotton manufactures, copper manufactures and boards.

Raw cotton still occupies first rank and provisions second. Iron and stee manufactures have taken third place and refined mineral oil has dropped from third place in 1896 to fifth place

Copper manufactures also show a notable growth, having advanced from 11th place in 1896 to fourth place in 1906. While flour shows an increase of \$7,000,000 in the decade, its relative position among the leading articles of exportation has chauged from fourth in 1896 to seventh in 1906; and wheat, whose exportation of forty millions gave it sixth place in 1896, has receded to 13th place, with a total exportation of \$28,750,000 in the year just ended.

Agricultural implements exported are five times as great in value as in 1896, and this large increase has advanced the position of that class from 23rd in 1896 to 14th in 1906.

Railroads Raise Age Limit.

Pittsburg Aug. 21.-Railroads enter ing Pittsburg are in sore straits for men to man their trains. Some of them have raised the age limit established for new employes some years ago, while others are abandoning it altogether. The tremendous increase in freight business finds them all short handed, while at the same time the Western roads are draining the Eastern market of all available men to help move the phenomenal crops. Advertisements are appearing in all the local papers for men to fill positions as brakemen and conductors, wages are being advanced and every effort made to increase the working forces before the heavy rush of fall freight busi ness causes a complete blockade
