CUBA'S NEW GOVERNOR.

Charles E. Magoon Expects a Peaceful Administration.

Collision of Hudson River Steamers. Mississippi Dam at Keokuk-General Wood's Report-Marriage of Bertha Krupp - Hearst Accepts Democratic Nomination.

Sunday was Charles E. Magoon's first day at the palace as governor of Cuba and passed busily but quietly. Governor Magoon said to the press

that he was looking forward with confidence to a peaceful administration. He expressed the warmest appreciadon of the work accomplished by Messrs, Taft and Bacon,

The governor sees no reason to anticipate further sudden changes in the situation. He is of the opinion that now governmental matters will be commonplace compared with the exciting and rapid developments of the past two months.

Governor Magoon has announced his decision of postponing the appointment of the cabinet officers indefinitely. His intention is to consider thoroughly the conditions and needs of each department. This can be better accomplished at the outset by having the subordinate heads report direct to himself. By this method the governor believes he will be better enabled to select the ministers best fitted for the respective posts.

There will be a strict accounting of the expenditures incurred by the American army of occupation as chargeable to Cuba.

American Policy In Cuba.

The revolutionists' committee, with which the American commissioners dealt in inducing the rebels to cease hostilities and negotiate peace, on Friday at Havana conferred with Governor Taft, Assistant Secretary of State Bacon and Charles E. Magoon, who is to succeed Mr. Taft as provisional governor, and later expressed satisfaction with the position taken by the provisional government.

Headed by Alfredo Zayas, the committee visited Governor Taft to request him to declare the policy of the United States toward Cuba and the policy of the provisional governor concerning appointments to public

The Americans listened carefully to the representations of the committee and then Governor Taft replied that he could not outline the policy of the United States more clearly than was done in his proclamation establishing a provisional government for the Island.

Heiress Becomes a Slum Worker.

Heiress to millions, Miss Margerie Palmer, of Colorado Springs, Col., the eldest daughter of General William J. Palmer, has renounced the fashionable world and become a work er among the poor of the London slums. She has entered the training school of a big London hospital, concealing her identity, it is said, that she might better pursue her chosen

calling. Miss Palmer inherits her philanthropic instincts from her father, one of the pioneers of Colorado. General Palmer has always been identified with the growth of the state, and amassed millions in its progress from the territorial days. A large share of his money has always gone to charitable and educational work

General Palmer is commonly known as the father of the Rio Grande Western road and has always taken a great interest not only in the property itself, but in the army of employes. He sold the road a little more than five years ago for \$6,000,000. Just prior to-his retirement he distributed among employes of the company \$1,000,000 of the earnings of the road in the shape of preferred stock. He remembered everybody, from Colonel Dodge, a high official, who received \$100,000, to the section foremen, who received \$2,000

Keckuk Dam 6,000 Feet Long.

Hugh L. Cooper, the Wall solved the problem of how to harness the waters of Niagara and who drew | chairman of the Democratic state comtue plans which made it possible to accomplish that greatest of all feats in the line of electrical development, proposes to build a dam 6,000 feet long across the Mississppl river at Keokuk, at the foot of what is known as the Des Moines rapids,

Large dams have been built before, albeit none so large as the proposed

dam at Keokuk, which, it is expected, will be built within the next two years. The great Niagara Falls proposition was so enormous that for a time the country laughed and said that it was not possible to so control the mighty forces there as to get 200,000 horse power for commercial purposes.

But when the world's greatest dam at Keckuk is completed, the big power house, 1,862 feet long, will contain 47 immense generators, with a capacity of 4,500 horse power each, or a maximum capacity of 211,500, to be utilized in operating the industrial wheels in many cirles.

Wood Argues Against Reduction. An argument against reduction in number of troops in the Philippines is made by General Leonard Wood, commanding that division, in his annual report. 'The total garrison on June 30 last numbered 20,043 men. "We are far from home," says General Wood, "and in case of foreign disturbance, even with all our troops concentrated at Manila, the force available would be Larely sufficient to defend it from serfous attack. Moreover a strong garrison should be maintained here until conditions pertaining to the civil government are well established and the animosities and disappointments incident to the building up of a local government under new and perhaps strained conditions have passed away."

Mexican Veterans Grow Few.

The annual reunion of the Mexican War veterans of Illinois convened at Pana last week. The attendance showed a large decrease in the line of the old soldiers, as only 25 were registered. Many of them bave not seen each other in years. The youngest of the number present is 76 years of age and the oldest 87. The addresses of welcome were made by Mayor Schuyler and Dr. J. Huber. The principal speakers for the occasion were ex-Congressman B. F. Caldwell and Governor Charles Deneen,

Stirring Political Campaign.

The political campaign has become more active and promises to be still livelier from now to election day. In New York state Charles E.
