White is the emblem of light, religious purity, innocence, faith, joy and life. In the judge it indicates integrity; in the sick, humility; in the woman, chastity. Red, the ruby, signifies fire, divine love and royalty. White and red roses express love and wisdom. Blue, or the sapphire, expresses heaven, the firmament, truth from a celestial origin, constancy and fidelity. Yellow or gold is the symbol of the sun, of marriage and faithfulness. Green, the emerald, is the color of spring, of hope—particularly of the hope of immortality and of victory, as the color of the laurel and palm. Violet, the amethyst, signifies love and truth or passion and suffering. Purple and scarlet signify things good and true from a celestial origin. Black corresponds to despair, darkness, earthliness, mourning, negation, wickedness and death.

A Rhapsody on a Mutton Chop. When a primitive man wants breakfast he takes a sheep, kneels upon it, holds it between his legs and cuts its throat. He skins it, and, taking a slice out of it, fries it on the coals for breakfast. We also demand not less imperatively cutlets for our breakfast, but we manage it another way. We procure an individual some way off to look the beast and another out of our sight to cook it. We have a paper frill put around the bone to disguise it, and set a pot of flowers straight before us to look at while we eat it; but, to the sheep—to the sheep—it can make little difference which way it is eaten. We still do our unclean work, but we do it by proxy. And it may be questioned whether what we gain in refinement we have not lost in sincerity.—Fortnightly Review.
