## Women's Exquisite Tailored Suits.

A Brilliant Showing and Very Moderately Priced.

No stone has been left unturned to provide a stock of women's ready-to-wear apparel second to none in Pennsylvania, both in regards style and price range. Rack after rack, case after case fairly bulge with suits arrayed for your choosing. Owing to our syndicate of stores the best makers in the land strive to give us the best effort of their productions, and, mark you, the best values too, hence we are enabled to offer such excellent values.

### Nobby Hats for the Young Miss.

Just received a big assortment of ready-to-put-on hats for the younger generation. Inexpensive, yet as full of style as an egg of meat—\$1, \$1.50, \$2, \$2.50 and \$2.90. A big range at the latter price and it is this lot we expect will be the most popular.

### Smart Sailors Again.

Many a year since the plain mannish straw sailor hat enjoyed any great degree of popularity. Eight years ago, we remember, it was difficult to supply the demand, so urgent was it. Unless all signs fail, history will repeat itself this season. Everything points to a revival, but the trouble is manufacturers are unprepared. Every retailer in the land is clamoring for sailor hats, but there isn't enough to go around. With our usual forethought we made preparations. Four dozen arrived a short time ago, while ten dozen additional are in transit. The rough braid has the call. Black is favorite, next comes white.

### HEAT OF HIGH HATS.

#### A French Physician's View as to Diseases Engendered.

A French physician has been taking notes on the temperature in high hats. In the early morning, when the doctor was walking in the Bois de Boulogne, while the shade temperature was 77 degrees, the instrument inside the hat registered 90. At noon, when the outer air was at 90 degrees, the temperature inside the hat was 103. In the evening, with a cool breeze at 68 degrees blowing, the top-hat temperature was 88. The doctor read a paper before the Academy showing that this unnatural heating of the head causes many nervous diseases and affectionsof the brain.

#### Foretold His Death.

Bismarck's anticipation of the date of his own death is not generally known. About nineteen years ago, during a debate in one of the great military schemes, he refused to interfere with the Septennate bill on the ground that he expected to live another three years, but to die within seven. In other words, he calculated on living till 1890 and on dying before 1894. As a matter of fact, his prediction was not far wrong, for, though he actually lived until 1897, he was politically dead as soon as he went into retirement at Friedrichshuh.

#### China's Coal Mines.

Hongay, Tonkin, China, has the safest coal mine in the world. The working is on the side of a hill, which is one solid block of coal about 200 feet high. To get at the mineral it is necessary only to remove a layer of schist on the surface. The coal, which is of good quality, is mined to the extent of about 1,000 tons a day. There is a good deal of dust, which is used for making briquettes. The staff of the mine is composed of fifty Europeans and 3,500 natives.

#### What a Photograph Told.

A woman with an exceptionally clear complexion recently sat for her photograph. On receiving the proof she took it back to the artist and complained of a number of small spots on the face which marred an otherwise perfect picture. The photographer was at a loss to account for this, an examination of the negative failing to give the slightest clue to the source of trouble. A fortnight later an eruption of spots broke out on the woman's face, which proved to be the first outward symptoms of a very severe attack of smallpox.

#### Pheasants in Minnesota.

Present indications are that in a few years Minnesota will contain a good stock of Chinese pheasants as a result of the introduction of that gamey bird of beautiful plumage by the State Game and Fish Commission. The commission has 312 young birds ready for distribution in small quantities to points in the State where they can be guaranteed protection from hunters for ten years, which the law allows them.

#### Living in South Africa.

Prices are high in South Africa and bills for laundry are frequently exorbitant. Persian, Kaffir and Cape women do the work after a fashion. "One usually pays £1 \$5 per month a head," says a woman correspondent, "and the woman who washes for you takes everything for that, but is apt to vanish for a month on end with your clothes!"

#### Powerful Searchlight.

The searchlight on board the British battleship Dreadnought is of a new type, being double-ended, so as to throw powerful beams of light in exactly opposite directions to facilitate semaphore signaling. Each light is of nearly 50,000 candle power, and placed on top of the tripod mast, will be visible twenty miles.

#### Effect of Alcohol.

A Berlin periodical, the Literarische Eco, has collected and printed the opinions of over 100 authors on the effect of alcoholic drinks on brain work. A large majority of them pronounce it to be injurious, and advocate moderation or abstinence in the use of alcohol.

#### A Dying Necklace.

The famous "Mme. Thiers' pearl necklace," part of the legacy left to the French republic by President Thiers, is said to be dying. It is a well known fact that pearls turn black and die unless worn frequently next to the skin. The necklace is in the Government museum and is valued at nearly \$60,000.

#### His Varied Career.

Vere Goldthwait, one of the most interesting personalities of the Boston bar, has had a romantic career. He is the son of a well known Boston physician and for a number of years travelled with a wild West show. For a time he was one of the known cowboys of Colorado. He attracted considerable attention recently by publishing a book on Ingersoll.

#### Made a Poor Showing.

The Tokio papers are extremely sore at the poor result shown by the Chinese students who have studied in Japan at the civil service examination held in Peking. It is stated that the students who received their education in England and America succeeded remarkably well in the examination.

—My arm was covered with twenty-one running sores and swollen to twice its natural size. San-Cura Ointment removed the pain, drew out the poison and healed the arm in an incredibly short time. B. D. Dutton, Titonville, Pa. San-Cura Ointment, 25c and 50c. Dunn & Fulton.

—Gently moves the bowels and at the same time stops the cough. Bee's Laxative Cough Syrup. Contains Honey and Tar. No opiates. Best for coughs, colds, croup and whooping cough. Satisfaction guaranteed. Children like it. Mothers endorse it. Sold by J. R. Morgan.

### MANIFOLD VARIETIES OF CORN.

#### Cultivation Results in Existence of Five Hundred Kinds.

A surprising history is presented in a recent report to the Department of Agriculture with reference to one of America's greatest contributions to the food supply of the world, Indian corn. Under the effects of cultivation the recognized varieties have increased from the few known by the early explorers to more than 500. The variations in size are interesting, especially as regards the height of the stalk. This runs from a foot and a half for some kinds of popcorn to twenty-two feet for a Tennessee variety, and thirty or more for varieties grown in the West Indies.

The expert who has reported to the Department of Agriculture on the subject describes one group in which each kernel is surrounded by a husk, and the ear thus formed is itself enveloped in husks. Some classes of popcorn have ears only one inch long, while the ears of common corn sometimes attain a length of sixteen inches.

#### Earth's Shaky Foundation.

There is never a day on which some part of the earth is not shaken; and it is probable that not even an hour ever passes without some kind of an earthquake in some part of the earth. The truth of this statement may be inferred from the fact that in Japan alone 8,331 earthquakes were recorded between the years 1885 and 1892. The great majority of these shocks are tremors detected only by instruments, or, if noticed by man, of such slight intensity as to cause no alarm.

#### Earning Starvation Wages.

A woman who has applied to the Lambeth Guardians for relief says she is a buttonhole maker, is paid twopenny a dozen and that it takes an hour and a half to make them. Evidently there are still people who sing the song of the shirt.

#### Population of "San Juan Hill."

On "San Juan Hill," bounded by West Sixty-first and Sixty-second streets, Amsterdam and West End avenues, in New York city, is a block that has 6,173 inhabitants. It is the most populous block in the world.

#### England's Monster Trumpet.

A monster trumpet which was used to summon the people to church in the early part of the last century is still to be seen at Braybrooke church, England. It is sixty-six inches long.

#### Nova Scotia's Fish Record.

The reduction works at Canso, Nova Scotia, handled 1,200 tons of dogfish in 1905 and produced therefrom 9,000 gallons of fish oil, besides 200 tons of fish scrap, which makes a good fertilizer.

#### Where Rents are High.

People who think rents are high will be interested in knowing that a single room in Cornhill, London, recently rented for \$18,000 a year. The rents there are the highest on earth.

#### What Concrete Has Done.

The use of concrete already has thrown thousands of stone masons and cutters out of work throughout the country. In some large cities whole buildings have been constructed of the material.

#### Introducing Electricity.

The Sultan has given up opposing the introduction of electric light in Constantinople, and ere long that city will be lighted at night for the first time.

#### Where Snow is Sold.

Snow is sold for a cent a pound in the north of Sicily. It is a Government monopoly and after being gathered on the mountains is retailed for refrigerating purposes in the cities.

#### A Cat's Estate.

A cat named Pinky has died at Wilkesbarre, Pa., leaving an estate of \$20,000 to a sister cat. Each of the cats inherited \$20,000 from B. F. Dilley, an eccentric millionaire.

#### Remarkable Substitution.

In order to replace a lost thumb, a young man in Berlin has had a great toe amputated and grafted on the stump. The operation has proved successful.

#### Queen Elizabeth's Stocking.

In 1570 Queen Elizabeth was presented with a pair of silk stockings by her tire-woman and afterward never wore any other kind.

#### Composition of Radium.

Some of the greatest authorities on radium now incline to the belief that it is a compound rather than a chemical element.

#### Antique Fire Alarm System.

New York City's fire alarm equipment is the most antiquated of any in the large cities of the world.

#### Artistic Brickwork.

There is a modern chateau in Normandy, France, which is constructed in such a way that the brickwork resembles intricate embroidery.

#### Vegetarian Restaurants.

Berlin's thirty vegetarian restaurants receive the bulk of their patronage from students whose monthly allowances are nearly exhausted.

## Display and Sale of Curtain Piece Goods.

A sale of such importance as will interest every woman whose house-cleaning reveals the necessity for replacing old curtains.

This is to be no small affair. While we do not handle curtains this showing of Curtain goods by the yard can't help but impress you with the fact that we do go into the yard goods end of it on a very comprehensive basis. Six center aisle tables have been cleared; the several lots arranged according to price and the yard price of each will appear on large ticket.

Every woman who knows the greater economy of buying material by the yard should come to this sale. Attention of those who have never curtained their home in this manner, is called to the fact that but five yards is required for the average pair of curtains. To finish the ends, all the work required, is the work of a few minutes. The saving is a big item.

## Men's Oxfords.

We sing our Oxford song quite often. We've got Oxfords worth singing about too. There's nothing a man wears that is apt to excite so much criticism as his Oxfords. Our Oxfords are right—we know it, and it is for this reason we call attention to them so frequently.

The leathers are Patent Colt, Vici Gunmetal and Patent Kid. Lace and blucher cut. Many new kinds in ties. All the new edges and toes.

**\$3.50, \$4.00 and \$5.00.**

Same prices other stores quote, you'll say. True, and the price means nothing unless you see the shoes at the price. That tells the story. Come and see them.
