"I WILL not stand for re-election," says Senator Platt, which is very well, as it is not at all probable that N. Y. would stand for it either.

COL. BRYAN has been the guest of honor at more banquets than any other public man in America, and his life has been singularly free from indignation and the presidency.

DELAWARE now has a law making it a crime to drink on a railroad train in that State. People will now begin to be thankful that it doesn't take long to get out of the state.

WHEN ten years old the present president of the United States was the spokesman for a party of boys who collected and gave a library of forty-five books to the crew of an American clipper ship. The tendency to talk in a patriotic strain was no doubt noticed at an earlier age.

THE Pittsburg Post suggests that, as a matter of retributive justice for appropriating more money than the State's revenues amount to, the governor should veto the appropriation for the salaries of the members on the ground that there was no money left to pay them.

NOW THAT the Corey-Gilman nuptials have been consummated a new code of morals has been established, under which if a woman marries a man when he is poor, he is entitled, when fortune smiles upon him, to put away his wife who shared his poverty and to spend \$5,000,000 to buy a younger face. If there is such a thing as retribution this man and woman should experience it.—Oil City Bizzard.

THE legislature left 580 bills in the Governor's hands to be acted upon either favorably or adversely within thirty days from adjournment day. Many of these bills are of no special account and can be disposed of without much ado, but there are some which seriously concern the public and will require much hard thinking on the part of the good executive. These are, generally, appropriation bills, which will require much pruning if they are to be kept within the bounds of revenue receipts. The legislature has dumped a huge task upon Governor Stuart but he will be equal to the occasion, we're thinking.

THAT New York minister who married W. E. Corey and Mabelle Gilman has repented and asked forgiveness from his congregation. He has also admitted his willingness to surrender the \$1,000 fee which he received for the five minutes work. He has atoned for his misdeed as far as he is able and his experience in this particular will probably have a tendency to lessen the possibilities of such disgraceful marriages as the one under consideration. But after all, we don't like the Rev. Mr. Clark's apology. If he had any excuse for marrying the couple he should have stood by his guns instead of groveling around to retain his job.—Titusville Herald.

A MOST inexcusable blunder on the part of the printer has led to the killing of the bill introduced by Hallings of Venango in the senate at Harrisburg and Milliron of the same county in the house, providing that municipalities may purchase private water company plants for municipal use and bond them to secure the purchase money, the bonds to be redeemable in 30 years or sooner. In the bill which passed and signed by the presiding officers of both branches and is now in the hands of the governor, the bonds are made redeemable in "30 days" or sooner, which is simply absurd. Senator Hallings is very much put out about it, as the bill applies to Franklin especially. There is no way of rectifying the matter, and the bill is a dead letter, as the governor would not be asked to approve it as it reads at present.

THE Pennsylvania legislature has passed a bill making vaccination compulsory in a community only in the event of an epidemic of smallpox. This act will entirely relieve the situation. This reminds the Titusville Herald that it was among the first of newspapers, if not the first, in Pennsylvania, to take up the cudgel against the vaccination law of 1895. It made vaccination a qualification of admission to the public schools. The result of Dr. Dixon's attempted enforcement of the measure two years ago was to inter-

fer so seriously with the schools that genuine alarm was created. Gradually the opposition to the law spread over the state and it is doubtless true that the majority are pleased with a new act which repeals the former one. Unless there is an epidemic of smallpox in a community it is no longer compulsory to vaccinate children in order to send them to school. This means that aside from a few congested districts in the foreign quarters of large cities there will be no vaccination unless under the wishes of the person submitting to the operation.

Starr and Surroundings.

The few sunshiny days that lately passed over this part of the continent left marks as if it might be best to proceed with the tilling of the soil, as the trees are showing signs of approaching summer days.

The roads are getting an overhauling at present, of which some were in great need, and they could bear more of the good work if more funds were applied.

If hearing is believing, same as seeing, there will be no need of those chicken and turkey fanciers to get out of this part of Forest county to get birds to bring home ribbons with from the approaching poultry shows, as the surroundings will be able to show as good feathers as need be to gain a place at any show.

Fatal Wreck P. R. R.

Engineer John J. Flaherty and conductor Wm. F. Malone, both residents of Oil City, were killed in a wreck on the P. R. R. that happened to a work train near Maceo, about four miles above Tidout, last Friday morning. The engine was running backwards at a high rate of speed and pulling a car loaded with rails and a caboose, in which were the brakemen and a dozen Italian laborers. The conductor was in the engine cab sitting on the seat with the engineer, and fireman, R. J. Biscoe was seated on the opposite side. While rounding a sharp curve the tender wheels left the track and the engine turned over on its side, plowing into the embankment. As soon as the engine was derailed the heavily loaded gondola car back of it struck the engine, the jar being sufficiently heavy to break loose the steam pipes leading to the gauges and safety valve and in an instant the three men were enveloped in steam. The fireman escaped with but slight scalds about the back of his neck. He is unable to account for his remarkable escape.

The dead body of Engineer Flaherty was found beneath the dome of the engine and his body had been almost torn into shreds. He had been disemboweled, both of his legs had been cut off and his arms broken and there was a punctured wound in his throat and the back of his skull had been crushed.

When the men took hold of Conductor Malone to drag him from the wreck the flesh peeled off in their hands. He had been literally cooked to death, although he was still gasping for breath. He was dead before he could be taken from underneath the engine.

A distressing feature of the fatality was that Mrs. Malone, wife of the dead conductor, bringing her small child from a visit at Olean, arrived at the scene of the accident before the bodies had been recovered. She arrived in Oil City in the afternoon on the same train as that carrying the body of her husband and was in a state of collapse and hysteria.

Engineer Flaherty who was aged about 30 years, is survived by his wife and four children. Conductor Malone was aged 25 years.

Relief from Rheumatic Pains.

"I suffered with rheumatism for over two years," says Mr. Roland Curry, a patrolman, of Key West, Fla. "Some times it settled in my knee and lamed me so I could hardly walk, at other times it would be in my feet and hands so I was incapacitated for duty. One night when I was in severe pain and lame from it my wife went to the drug store here and came back with a bottle of Chamberlain's Pain Balm. I was rubbed with it and found the pain had nearly gone during the night. I kept on using it for a little more than two weeks and found that it drove the rheumatism away. I have not had any trouble from that disease for over three months." For sale by Dunn & Fulton.
