A Boston preacher informed his congregation that in eight years the reign of the devil will come to an end. But what we would like to know is when this rainy season is coming to an end.

Following is the list of letters lying unclaimed for in the Tionesta, Pa., post office for week ending June 11, 1907: O. J. Jones (two letters), E. L. Deunsmore, D. S. Knox, P. M.

The Kellektiville concert band is making arrangements to be in attendance at Warren's celebration on July 4th. In addition to their regular part in the program they expect to give an afternoon concert which will include some of their best selections.

Joseph Swanson, of Brookston, father of the young man drowned in the Allegheny river above Warren a week ago, offers \$25, and the citizens of Sheffield \$100, as a reward for the recovery of the body. A body found floating in the river two miles below Irvinton yesterday is supposed to be that of young Swanson.

The harvest of the rattlesnake crop seems to have begun in earnest. Sim Hood brought one into town Thursday from down the river, John Wilson came to town Saturday with one which he killed across the river, and on Sunday a party of young men brought in two from the den on the hill across the river. A third one which they saw escaped under the rocks.

During an electric storm that passed over Fagnudon on Saturday lightning struck a derrick on E. R. Young & Son's lease. The derrick was badly splintered and the tubing in the well was split for some distance, a rather unusual freak of the electric fluid. Half a dozen strings of tools are running in the Fagnudon field and business there will be brisk during the summer.

Don't forget John E. Clarke's lecture at the court house next Friday evening at eight o'clock. The Detroit Free Press says of him: "Clarke is one of those rare men so seldom met who has learned the secret avenue of the human soul. His lectures, 'To and Fro in London,' is full of ethics of humanity; wit, humor and pathos. He holds his hearers at his command. Moral teaching, like a golden thread, glitters through it all. And the beauty of all is, one enjoys a delicious, satisfying after-taste, like good cheese after dinner." Admission 25 and 15 cents.

Mrs. Samuel P. Bates, aged 70 years, mother of Congressman Arthur L. Bates, of Meadville died Monday afternoon as a result of injuries received by being run down by an automobile on Saturday. One arm, her collar bone and several ribs were broken and her skull was fractured. The automobile was driven by Chas. Hunt and carried four Allegheny College girls, who had been out to see the college parade.

Postmasters in this section have received notice that beginning July 1, and continuing until Dec. 31, all mail matter received and dispatched must be divided into its respective classes, weighed and an accurate record kept of the same. The order is a general one and applies to all U. S. postoffices. It is presumed that the figures thus obtained will form the basis of future contracts for carrying the mail, and the enactment of new postal laws.

Prof. G. W. Mitchell, of Marienville, has been appointed a member of the committee on permanent certificates for Forest county, to fill the vacancy of Prof. J. O. Carson, resigned. Miss May Whaley, of Endeavor, and Miss Blanche Pease, of Tionesta, are the other members of the committee. The committee will meet for the purpose of conducting examinations June 30th and 21st, in the high school building in Tionesta. Candidates for permanent certificates are requested to keep these dates in mind.

The school board of Kingsley township met Saturday and decided on the adoption of a two-year high school course for the Kellektiville schools where four rooms will be necessary for the accommodation of the pupils. At Mayburg another room will be added, making two at that place, to accommodate the rapidly increasing population. A new building will be erected and a school established at a point near the J. A. Jones place on the road leading from Nebraska to Marienville. Saturday, June 22, has been set for the election of teachers for the ensuing term.

All of the liquor dealers and hotel keepers of this city unwittingly broke the license laws on Saturday, by keeping open until 1 o'clock in the afternoon. The new primary laws require that bars, etc., be closed from 1 until 9 o'clock on primary elections. But the fact that delegates to the state convention were being balloted for made the primaries a general election, and the bars should have been closed all day. Judge Bouton got busy on the telephone in the afternoon and the bars did not reopen until this morning after closing at 1 o'clock Saturday afternoon.—Bradford Record.

Last week Hon. N. P. Wheeler, of Endeavor, presented two beautiful oil portraits of the late Jahu and Livingston L. Hunter, of Tidouite, who were warm friends of Mr. Wheeler, to the directors of the Hunter Memorial School to be placed in that handsome new building. This fine work of art was done by Mr. Wheeler's brother-in-law, Mr. Carl F. Smith, of Washington, D. C., whose excellent reputation as an artist is well known in art circles in this and European countries. The gift is a most appropriate one and the authorities and patrons of the school have expressed their high appreciation of Mr. Wheeler's thoughtfulness.

The Proper Oil Co. finished a well last week on the Emerson tract, in the Cropp hill field, which will make an average producer for that territory. The same company finished its well on the Bowman tract, near Muzette, in Kingsley township, last Thursday, at a depth of 2106 feet, and it was no good as far as oil was concerned. They found the Clarion, Queen, Baitown and Cooper sands in the order named, with a slight show of oil in the latter. A fair flow of gas was struck in the Queen sand at about 1675 feet, and the casing was sold to Wm. Shoup, of Muzette. The gas will be piped up for use in his house and in the school house.

June 5, 1858, was the date of the "Big Frost," which ruined all the crops in this section of the county, and created consternation among the inhabitants, who imagined they were going to starve to death in consequence. There was a grand rush for buckwheat, and seed, in some cases, was procured from Maine by express. The result was a big crop of that cereal. The damage done by frost was far-reaching and resulted in many business failures. The country is much more largely developed now than it was then, and it will take something more than a little unseasonable weather to discourage us. Cheer up, the sun is shining somewhere.—Blizzard.

According to Lewis W. Hagenman, one of the oldest inhabitants of Reading, Pa., people nowadays, instead of complaining about the cold spring should be thankful that they did not live 75 years ago. Mr. Hagenman, who is in his 91st year, stated that just seventy-five years ago June 5th, four inches of snow fell over eastern Pennsylvania. "All the farmers hereabout," said Mr. Hagenman "were very much scared about their crops. Some of them became so alarmed that they scraped the snow off the young wheat with washlines for fear it would freeze. Those who tried to scrape the snow ruined the wheat, while the others who let it alone, sustained no damage. This weather isn't anything compared to what we need to have in the old days. It will come out all right if only the people have a little patience."

A recent visitor to Forest county relates an incident that shows that the human humor has not a monopoly of loving the black sheep in the family in the greater degree. William Shoup, of Muzette, owns a ewe which recently gave birth to twin lambs, one white and the other black. The mother sheep refused to have anything to do with the white lamb in a maternal way and the white outcast was in danger of starving to death when the children of the owner took it in hand and raised it on a bottle. The deserted one took kindly to the foster parents and has learned to depend upon the family to a degree that is making its nuisance. It will not stay in the field with other sheep, but when it is hungry, thirsty or lonesome comes to the house, paws at the doors and bleats until it gets what it wants, but which most of the time seems sympathy. It is an early riser, a vigorous protector against cold or other disagreeable weather and demands more attention than the entire Shoup family can afford to devote to it. Anyone looking for a lamb that can stand any amount of attention could probably secure this white outcast at a shade under the market price.—Terrick.

The fifty-first session of the Pennsylvania State Educational Association will be held at Greensburg, Westmoreland county, July 2, 3 and 4, 1907. Every teacher in the state should be a member of this Association. All members will receive a bound volume of the proceedings. The enrollment fee, which is \$1.00, may be sent to Prof. David S. Keck, treasurer, Kutztown, Pa. The National Educational Association will meet in Los Angeles, California, July 8-12, 1907. Pennsylvania has been honored in the choice of Dr. Nathan C. Schaeffer as president of this Association. Our state should send a large enrollment to this convention.

Contrary to prevailing reports and impressions, the new law governing teachers' salaries, goes into effect this year, and not next year as was generally supposed. The law provides that no school can pay less than \$40 per month. All teachers holding better than provisional certificates must be paid \$50 per month, provided they have had two years successful experience and present a certificate from the County Superintendent to that effect. Copies of the new enactment have been forwarded to the secretary of each school board in the county by Supt. D. W. Morrison, and the boards should give this law careful perusal.

A company was organized here last week composed of H. J. Kelly, of Pittsburg, T. D. Collins, of Nebraska, and O. W. and F. C. Proper, of Tionesta, for the purpose of placing on the market the white oil from the Proper wells on Fox creek, in Green township. It is the intention of the company to sell the oil as a hair tonic without any treatment or preparation, for which purpose a brisk market has already developed in many places, and it is predicted that it will be a big seller when attractively bottled and displayed. The oil comes from the ground about as pure as it could well be made, a recent test by Wells & Wells, refiners, of Cleveland, Ohio, showing it to contain 65 per cent. gasoline, 34 per cent. refined oil, and only one-quarter per cent. waste.

That dangerous and criminal practice—jumping on and off moving trains, against which the public, the parents and the press are constantly protesting, seems impossible to break up entirely. People living near or having business that requires their presence around railroad stations, see so much of this sort of vandalism by boys ranging in age from 12 to 15 years, and often older, that it has almost ceased to arouse their horror and anxiety. It is a fact that boys from this place make it a habit of jumping freights and riding to Hickory and back again with as much regularity as they eat their meals, incurring great and constant danger of being ground to pieces. Of course the parents of these boys are not aware of what is going on and if they were are powerless to stop it. Yet an example should be made of this lawlessness which would have the effect to stop it completely. The law is very stringent and should be invoked. Will it be done, or will the boys take warning in time? We hope they will.

We also learn that he has purchased the old Nathaniel Siggins homestead farm, in Harmony township, on which his father so long lived and on which he spent his last days, from the Bromley heirs, and which is much run down and in a neglected condition, and that it is his intention to beautify the same, it being his boyhood home.
