TO HELP CROP MOVING

Treasury Will Make Deposits in Various National Banks.

Eddy Suit Discontinued - Secretary Root at Muldoon's-Woman and Boy Held for Murder-Gunboat for Naval Militia-Arab Horsemen Routed. New Dairymens' League.

Secretary of the Treasury Cortelyou has a new plan of depositing government funds in New York, Boston and other cities, to afford relief to the money market in the approaching crop moving period.

Secretary Cortelyou will, commencing this week, place each week at such points in the country as he shall designate government funds to such amount as he deems sufficient to prevent an acute monetary stringency and possible panic, when the demand for money is greatest at the height of the crop moving period. The plan of the secretary for mone-

tary relief is new to the financial world and one which he believes will prove more efficacious than the old method of the treasury department in waiting until the country was severely shaken financially and then coming to the relief at the last moment by placing a large deposit of government funds in New York banks. Secretary Cortelyou did not state how much money he would deposit each week, though he indicated that the amount

would equal the situation.

Discontinuance of Eddy Suit. A sudden though not wholly unexpected ending of the masters' hearing in connection with the suit in equity brought by relatives for an accounting of the property of Mrs. Mary Baker G. Eddy, leader of the Christian Science faith, came in the superior court room at Concord, N. H., on Thursday, when former Senator William E. Chandler, senior counsel for the relatives or "next friends," announced to the board of masters that they had filed a motion with the superior court to dismiss their action. The suit was brought on the ground that Mrs. Eddy, being incompetent on account of age and infirmities, to manage her own affairs, was the victim of persons associated with her in Chris-

as defendants. Three masters were appointed by the superior court to determine the question of Mrs. Eddy's competency. The reason for the petition for dismissal as stated by Mr. Chandler, was the belief that success along the lines desired could not be obtained and the unprofitableness of any immediate result of a decision in favor of the next friends in the exact issue as now framed, compared with the burdens and disadvantages to be endured both before and after such a decision.

Shells Mey Down Arab Horsemen. STIFF General Drude has sent out recon soltering parties from Casablanca and has cleared the country within three miles of his outposts. A French column consisting of a company of sharpshooters, a company of the foreign legion and a section of artillery, which performed this maneuver, was assailed by a large number of Arab horsemen, who with reckless courage rode within 200 yards of the French

guns. The fierce shell fire, however, mowed down their ranks and forced them to fly. They carried away a number of dead and wounded. The French column pursued the enemy for over a mile. Captain Benoit and six French privates were wounded. The attacking Arabs are never twice from the same tribes, those who once undergo the French shell fire do not return.

STEAMER SUNK AT DOCK.

Passengers and Crew Escaped, Garge Almost a Total Loss.

San Francisco, Aug. 27.- The Pacific Mail Steamship company's steamer Acapulco, Captain D. C. Trask, yesterday turned turtle and sank at the company's docks in this city. All the passengers and crew escaped, but it is believed that the cargo consisting of general morchandise will be almost a total loss, as the hull of the vessel lies in about 15 feet of water.

The vessel was scheduled to sail for Panama and way ports at 1 o'clock yesterday afternoon and was taking on her last supply of coal when the accident occurred.

It is supposed to have been caused by the listing of the vessel as the coal was being loaded on one side. She went down slowly, and all those on board had time to clamber on the dock. One man who was asleep at the time was roused and he succeeded in saving his life.

The Acapulco is an ocean steamer 290 feet long, 40 feet wide and 20 feet deep, with a gross tonnage of 2,572. She was built in 1873 by the Harlin & Hollingsworth company, Wilmington, Del
