Mr. Lewis Withdraws.

The following letter to the commissioners of the counties comprising the Twenty-eighth congressional district has been sent by George Lewis, of Oil City, named as Republican candidate for delegate to the national convention: "To the Honorable, the Commissioners of Forest County: Gentlemen—Owing to business engagements that will take me out of the county and require my attention during the entire month of June, in which the convention will be held, I desire to withdraw my nomination papers and retire from the contest for delegate to the Republican national convention of the Twenty-eighth congressional district. "GEORGE LEWIS."

The Derrick states that in framing his letter of declination Mr. Lewis fully appreciates the offers of support that have been voluntarily offered him by friends in all the counties in the district, and were it possible he would extend his thanks to them in person. Nothing but an extraordinary occasion would induce him to withdraw from the contest at this time, but the business that will engage his attention during the time the convention is in session necessitates his trip abroad.

HETTY GREEN, who enjoys the distinction of being the richest woman in the world, says that "one of the inheritances left me by my father was this injunction: 'Hetty, be honest always; never take an unfair advantage of anyone. And above all things fight for your rights. As long as you have health fight!' No doubt Hetty's great financial success in life is attributable to her staying qualities as a fighter and her stern honesty. The father's advice did not go awry.

DICKINSON, the Democratic candidate for mayor of Titusville, defeated J. M. Critchlow, Republican, at yesterday's election. Potter, Republican, for Controller, and McCrum, Democrat, for City Treasurer were elected. In Oil City B. H. Carnahan, Republican, was elected mayor.

ONE of Uncle Sam's old monitors is to be experimented with as a target. They took their share of that sort of work during the civil war and made the other side sorry that they were targets also.

Honson again declares war and says that we must prepare to fight not only Japan but England also. It's a question whether this young man needs a keeper or merely a governess.—Phila. Inquirer.

THE result of the Republican primaries in Ohio last week, where Taft carried every county in the State, means that the big War Secretary will have a solid delegation from that State at the Chicago convention in June.

Our Congressman Active and Faithful. [Special to Warren Mirror.]

Washington, D. C., Feb. 15.—The publication during the past week of the letter of ex-Congressman Sibley to Major McDowell in which the former declined to be a candidate for Congress this year and urged the renomination of Congressman Wheeler, confirms the exclusive prediction made in these dispatches about two weeks ago. Here the publication of the letter was received with pleasure by the friends of Mr. Wheeler and the latter was kept busy receiving the congratulations of his colleagues not only in the Pennsylvania delegation but from other States.

Mr. Wheeler is making a good record here, is always to be found in his seat when the House is in session and is ever watchful of the interests of his constituents. For a new member he had advanced fast in mastering the details and as he is willing to work everything brought to his attention is rapidly disposed of. And in Gus, B. Evans he has an ever willing aid and hard worker.

On Friday last, Congressman Wheeler had an opportunity to help two employees of the Washington Navy Yard, who were formerly residents of Warren. Owing to a lack of appropriation, over 500 employees of this yard had been discharged and among them were these men, Messrs. Black and Quarstrom. The latter served in the Spanish-American war as a member of the 16th Pennsylvania Volunteers and was present at the skirmish in Porto Rico, where the regiment behaved so gallantly. Later on he reenlisted, saw service in the Philippines and was highly commended for gallantry.

Messrs. Black and Quarstrom called upon Mr. Wheeler at the New Willard and told him of their trouble. Donning his overcoat, Mr. Wheeler proceeded at once with them to the Navy Department and called upon Admiral Mason, chief of the bureau of ordnance, who had charge of the work in the yard. To him, Mr. Wheeler briefly related the facts in the case and insisted that it was the duty of the government to do all in its power to help its employees till over the present hard times. As a business man, Mr. Wheeler stated that it was his intention to protect all of his employees as much as possible and he thought the government should do its share. He also called special attention to the soldier record of one of the men. Admiral Mason acted promptly and directed Messrs. Black and Quarstrom to return to the Navy Yard and resume the work upon which they were engaged. Until Congress makes a deficiency appropriation they will lay off four days a month, but that is a trifle as compared to entire cessation of work. Naturally, Messrs. Black and Quarstrom were loud in their thanks for the effective work done in their behalf by Mr. Wheeler.

The omnibus war claims bill which passed the House on Friday last carried an appropriation of \$669,52 for Frank E. Foster of Warren County. Mr. Wheeler was on hand during the entire discussion of the bill and voted aye on its passage. C. W. M.

Anthracite as a fuel has arrived at its 100th year. It would be impossible to measure the enormous amount of pleasure and profit derived from hard coal during this century. The world, however, is more interested now in the problem of how much longer black diamonds will last than in scoring up the benefits derived from them in the past. So far as known the only body of genuine anthracite on earth is confined to a small area in the state of Pennsylvania, and it is being mined at the rate of approximately 65,000,000 tons a year.

G. W. Hamilton, an electrical machinist, employed in the railroad company's telegraph shop, has invented a clock that will run two years without winding. The clock is also automatically lighted in the evening and electrically illuminated and is all in all a marvelous piece of mechanism. He has one of the clocks in operation at his home, where it is a subject of great interest to his friends who have called to see it. It is a large affair, standing seven feet six inches high. The clock beats seconds and is mechanically wound every two years. It is fitted with a bed room electrical alarm contrivance which goes off at whatever hour it is set for, at the same time turning on the electric lights throughout the house.—Altoona Gazette.

\$100 REWARD. \$100. The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surface of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. CHENEY & CO., Toledo, Ohio.
