Tionesta, Pa.

DEAR SIR:-A new word has come into use in paint; it is strong. Strong paint is paint as strong as paint can be. Weak paint is paint not so strong.

If one paint takes 10 gallons to do a job and another 15, the 10-gallon paint is the stronger.

If one paint wears 10 years, and another 5, the 10-year paint is the stronger. The strongest paint is the one that takes least gallons and wears longest. But do such differences exist? Yes and greater. Devoe is the strongest of all. A job that takes 10 gallons Devoe takes more than 20 of some. And a job ne sister also survive – Jerre of near Oil | of Devoe wears several times as long as a job of some paints.
