In noting the fire at the Grandin lumbering plant at Eagle Rock the REPUBLICAN gave a large share of the credit to the Oil City fire department for saving what property was rescued from the flames. A correspondent calls our attention to the fact that this was not wholly correct, and says in regard to it: "Your account gives the firemen all the credit of putting the fire under control. Of course they did very good service after they got there and got their machine to working, but the fire was under control by the time they got around. Now, the credit belongs to the crew and outside assistance from the immediate neighborhood. The firemen did not arrive until the boarding house was out of danger and the mill and store were reduced to a level with the ground. If you will make a correction in your next issue it will be very satisfactory to all concerned. The reason I know, I worked in the mill and was there from the start of the fire to the finish."

Woman Beat Two Men.

We suspect you'd like the tale, how a woman beat two hardware dealers in Girard, Pa.

Devoe salesman tried his best to get those men to sell Devoe lead-and-zinc in that bright town; and failed. Reluctantly took Mrs. E. R. Bowman, druggist.

They said they couldn't sell paint for more than \$1.25 a gallon. Mrs. Bowman can. She has sold about all the paint, that has been sold there since.

She knew Devoe; had sold his artists' materials. Had some sense and force, besides; she easily learned that cheap is dear in paint, and told the people.

Mr. Burt Young bought a gallon Devoe for rooms that had always taken a gallon of other paint; had half left.

Mr. John Hanna, grocer, thought it expensive before he bought it; brought back nearly half of his paint, and said it was the cheapest job he ever had.

Mrs. Bowman reports universal satisfaction. So much for cheap-paint town with a bright woman in it.

'Tween Hats
For 'Tween Heads, They're English, You Know.

"Tween Hats" are exactly what their name implies. They are designed particularly for the man who is hard to fit in a stiff hat. And they are English-made—which adds a whole lot to their individuality and popularity. They come in 'tween sizes, and will fit heads that no other make of hat will.

A 7, for instance, in an ordinary make of hat may be a little too small for you, while a 7 1/2 is a bit too large. This is where the "Tween" Hat comes in—'tween sizes.

All the new 1908 blocks. Of superior quality and finish—equal, so far as we are able to judge, to the best make of hats we know.

Price, \$3.00.
