Charles L. Schultz of Dunkirk Tells How He Regained His Health.

When six months ago I began using Thompson's Barosma, I had made up my mind to sell out and go out of business, but a friend of mine asked me if I had taken Barosma. I had not, but was willing to try most anything and began using it as directed. I was very pale and weak. I continued using it as directed and today I weigh 55 pounds more than when I com-menced using Barosma, I was a skeleton compared with what I am now and shall remain in business. When I would get up in the morning I would feel doll and sleepy and not rested, felt like going back

Gartenbaum Finds

a Hard Problem

BY I. FREIDMAN

The younger boys in the night school, who fell just short of the vears when they might have taken life seriously, paid no attention whatsoever to him and the older men, who were entirely absorbed in themselves and their work, were scarcely aware of his existence. But to all this neglect on the part of his schoolfellows Wilhelm Gartenbaum paid little attention; in fact, he was scarcely aware of it; for he was so taken up with his studies and his desire to learn that he gave neither thought nor heed to aught else.

Wilhelm Gartenbaum was a very old man-a very old man by comparison at any rate, for he was easily the oldest man in the school and perhaps the oldest man who attended any of the various night schools. He took his honors quite philosophically and without conceit, as he took all else that befell him, saying merely that some one had to be the oldest and the honor happened to have come to him.

All but fourteen of his seventyfive years had been given up to hard, unremitting toil-toll to support his parents; toil to support his own children; toil from the day he had landed in America until old age made it impossible for him to toll any longer. There had always flamed in his heart the hope that some day he might find time to study, to learn and educate himself. His heart was withering and drying now, but the flame burned there still with all the vigor and fervor borrowed from youth, even though its light fell on a hope turned to ashes

Somehow to-night his school tasks did not go as well as usual and the oldster felt disheartened and discouraged. His aged mind, forced to fit into the lessons more proper to youth, felt quite as uncomfortable as the aged body that he was forcing to fit into the small desk that a child had occupied during the day. The uselessness of effort, especially the uselessness of effort at his age, depressed him, as it will depress all of us at times, even the youngest, the most favored and the most gifted.

Still, Wilhelm Gartenbaum tugged at his long white beard determinedly, shook his head resolutely, set all his doubts and perplexities to one side and struggled with the difficult problem in fractions again. Slowly, carefully, cautiously the old man worked his way along, much as a stranger feels his way from place to place in a house that is dark.

He was quite sure now-so certain was he of each preceding step that he had solved the problem correctly. The tense expression that had puckered up his careworn face left it and gave way to a smile of satisfaction.

His heart beat quicker, happier, and the phrase, "It is never too late " took on a new and bigger meaning to his more optimistic frame of mind. But all his joy gave way to sorrow, and a sort of despair seized him when he attempted to prove his answer-the teacher had taught him the method the night before-and found it altogether wrong.

For a while Wilhelm Gartenbaum sat rigid, his chin on his hand; one might have thought him a bust carved out of stone, so stlent did he sit: then his elbow moved, much as a piece of marble might drop, and accidentally he pushed his arithmetic off the desk. He stooped to pick it up, gathering as he did so a few loose pages of foolscap that had been folded between the pages of the book and dropped out of it. For it was used by the pupil, whoever he was, that occupied the desk during the day, and, therefore, that it behooved its occupant by night to be careful of both book and contents.

He was putting the sheets of paper back whence they came and he was absently staring at the numbers written on one of them when gradually they made an active claim on his

Then Wilhelm Gartenbaum noticed with a shock of surprise that here, correctly solved and proved, was the problem that he had tried and failed to work out. And he was following the successful arithmetician's figures in a breathless sort of excitement when his eye fell on the name, "Fritz Gartenbaum," written in the upper left-hand corner of the sheet of foolscap.

'For a while old man Gartenbaum lapsed into his statuesque repose, then his face wrinkled and puckered and tear after tear coursed stealthily along his cheek and down his white

The Pangs of Hunger.

Hunger is one of the trials that explorers of the polar regions have to encounter very often. Captain Scott in his recent volume has this description of an unpleasant experience in the farthest south: "My companions get very bad food dreams; in fact, these have become the regular breakfast conversation. It appears to be a sort of nightmare; they are either sitting at a well-spread table, with their arms tied, or they grasp at, a dish and it slips out of their hands, or they are in the act of lifting a dainty morsel to the mouth when they fall over a precipice."

His Case.

"When you were married did your

wife promise to obey?" "Well, I should say not," responded the careworn citizen. "I can't even get my children to do that."

Croup Cured and a Child's Life Saved. "It affords me great pleasure to add my testimony to that of the thousands who have peen benefited by Chamberlain's Cough Remedy. My child, Andrew, when only three years old was taken with a severe attack of croup, and thanks to the prompt use of Chamberlain's Cough Remedy his life was saved and today he is a robust and healthy boy," says Mrs. A. Coy, Jr., of San Antonio, Texas, This remedy has been in use for many years. Thousands of mothers keep it at hand, and it has never been known to fail. For sale by Dunn & Fulton.

FAMOUS LONDON STREET.

It Was Christened by Sir George Downing One of Cromwell's Chaplains.

Downing street, which it is proposed to take legislative steps to "stop up and discontinue as a thoroughfare," had a fairly long and interesting history before its official record com-

It owes its name and origin to Sir George Downing, a political Vicar of Bray, who was one of Cromwell's favorite chaplains, and later so ingratiated himself with Charles II. that the King heaped substantial favors on him, including the gift of a valuable tract of land on which Downing street arose. Downing built "four plain square brick mansions" on it with "back fronts" to St. James's Park, "fit for persons of honour and quality, each having a pleasant prospect, with a terras walk." In the eighteenth century the street had degenerated into shabbiness; most of room, beguiling the time with cold the dingy buildings were used as end was a rather low chop house, Tha Cat and Bagpipes, patronized by Boswell, while in one of the houses Smollett struggled to earn a living as a surgeon. It was only in 1735, when Sir Robert Walpole moved from St. James's Square to the famous No. 10, that Downing street first assumed the official character which has made It the "most famous street in the world."-Westminister Gazette.

Some Odd Pockets.

"A Music pocket?" said the tailor. "Oh, yes; for professional singers 1 otien make music pockets. They run across the back of the coat, as a ru.e. above the waist, and they hold, without crushing a half dozen songs.

"I have three or four detectives among my patrons, and in their business suits I always put handcuit pockets. These pockets are in the sleeves. Their advantage is that the handcuffs can be drawn forth without the prisoner's seeing the action. When a rambunctious prisoner sees a detective's hand go toward an ordinary pocket he knows what is coming and prepares accordingly; but with my special pocket, the handcuff is on him before he knows where he is at.'

Apparently Healthy Enough. It has been reported to the Camil-

ford District Council in England that at a house in St. Cleather two of the occupied bedrooms have no windows, but only open apertures. It was stated that the house was very clean, and that no person had died there recently until 80 years of age, and some were 90. The council decided to call on the owners to put windows in each room.
