# An Importer's Clean-up Sale of Fine China

The house of George Borgfeld & Co., the largest importing house in these United States, if not in the whole world, are soon to move into their immense twenty story new building.

While in their present building, a week or so ago, our Mr. Smart succeeded in securing several thousand dollars worth of their finest imported china at about one-third of their import price.

For the past week or more we have been assorting and marking these lots and are now holding a

## RICHEST WOMAN IN WORLD

All E. H. Harriman's Great Wealth Bequeathed to His Widow.

A hundred words, each weighted with approximately \$1,000,000, and containing in their entirety the last testament of E. H. Harriman, makes his widow, Mary Averell Harriman, probably the wealthiest woman in the world. It is perhaps the briefest will on record for the disposal of an estate of such magnitude. All his property is left to Mrs. Harriman.

Wall street estimates that Mrs. Harriman will inherit in realty and personal property between \$75,000,000 and \$100,000,000. Mr. Harriman's private fortune is supposed to have been greater than this by many millions, but there is reason to believe that his unmarried daughters Marj and Carol, his married daughter, Mrs. Robert Livingstone Gerry, and his two sons, William Averell and Roland, together with his surviving sister, Mrs. Simons, and other relatives, have all been substantially provided for.

The will is dated June 8, 1903, and is witnessed by Charles A. Peabody, president of the Mutual Life Insurance company, who drew it, and C. C. Tegethoff.

Mrs. Harriman was Miss Mary Averell, daughter of W. J. Averell, a wealthy banker of Rochester, N. Y. If the estate measures up to the expectation, Mrs. Harriman, according to the common estimate, is the wealthiest woman in the world. Mrs. Hetty Green's holdings have been estimated at \$40,000,000, those of Mrs. Frederick Courtland Penfield, who was Anne Weightman of Philadelphia, at \$30,000,000, and those of Mrs. Russell Sage at a like amount.

## TO REMEDY LAW'S DELAY

President Will Recommend to Congress Appointment of a Commission.

Speaking with great earnestness to a mass meeting in Orchestra hall in Chicago on Thursday night, President Taft declared that no question before the American people today is more important than the improvement of the administration of justice, and announced his intention of recommending to congress the appointment of a commission to take up the question of the law's delay in the federal courts. The president said he hoped that the report of this commission, when rendered, would serve also as a guide to the states of the Union in effecting remedial legislation.

Mr. Taft devoted the entire first part of his speech to the subject of labor and said he intended to recommend to congress in his first message legislation to carry out the promise as to injunctions—that no injunction or restraining order should be issued without notice except where irreparable injury would result from delay. In which case a speedy hearing should be granted.

The president declared anew his belief in organized labor and congratulated the leaders of the movement that "they have set their faces like flint against the doctrines of socialism."

## DELINQUENT YACHT OWNERS

Collector Loeb Sends to District Attorney List of 21 For Prosecution.

Collector Loeb of New York has sent to the United States district attorney for prosecution a list of 21 delinquent yacht owners who have thus far refused to pay the tax which went into effect under the new tariff law on Sept. 1. The law imposes on all foreign-built vessels owned by Americans, a tax of \$7 a ton or 35 per cent of the vessel's valuation.

Among others, the list prepared by Mr. Loeb names James Gordon Bennett, owner of the Lysistrata, \$13,601 due; Mrs. Robert Goebel, owner of the Nahma, \$12,180; Eugene Higgins, owner of the Varuna, \$11,018; George J. Gould, owner of the Atlanta, \$9,121; Cornelius Vanderbilt, owner of the North Star, \$5,712; W. K. Vanderbilt, Jr., owner of the Tarantula, \$368.

Joseph Pulitzer has paid \$11,249 on his Liberty, and Frederick Gallatin \$2,856 on his Riviera. Frederick W. Vanderbilt has requested appraisals on his yachts the Conqueror and the Warrior.

## 200 NEVER SAW A LIVE PIG

And These High School Girls Live in Kansas City.

The recent statement of a girl student at the Central High school at Kansas City, Mo., that she had never seen a pig was considered rather a remarkable admission by the professors to whom she was reciting. But when a half dozen other young women confessed that they, too, had never seen a live pig the professor concluded it was time that his pupils should begin to grasp a knowledge of everyday things.

The fact that so many students in one class were unacquainted with pigs only through hearsay led an inquisitive reporter to see how extensive the ignorance of the pig really was. The canvass of three Kansas City high schools revealed the fact that nearly 200 young women, mostly of marriageable age, had never seen a live member of the porcine family. And this in Kansas City, the second largest live stock market in the world.

## Has Some Friend Told You of Foods Shot from Guns?

Folks who eat Puffed Wheat and Puffed Rice are sorry for those who don't.

So they tell of these foods to others, and the others tell others. That's how the use is spread.

Please ask some housewife to tell you how her folks enjoy these foods.

Or try them yourself. One package of Puffed Wheat, at a cost of ten cents, will reveal a new delight.

You will know, for the first time, how good cereals can be made.

You will see grains that are crisp and nut-like, puffed to eight times their natural size.

You will see grains made four times as porous as bread—ready to melt in the mouth.

You will see grains made digestible—with every starch granule exploded.

And you will see foods that children like better than any foods you know.

Puffed Wheat—10c

Puffed Rice—15c

These are the foods invented by Prof. Anderson, and this is his curious process:

The whole wheat or rice kernels are put into sealed guns. Then the guns are revolved for sixty minutes in a heat of 550 degrees.

That fierce heat turns the moisture in the grain to steam, and the pressure becomes tremendous.

Then the guns are unsealed, and the steam explodes. Instantly every starch granule is blasted into a myriad particles.

The kernels of grain are expanded eight times. Yet the coats are unbroken, the shapes are unaltered. We have simply the magnified grain.

One package will tell you why people delight in them. Order it now.
