The Season's Popular NECK FURS In All Fashionable New Shades and Sizes.

The opportunity to see everything new in Furs is here. Numerically our stock is stronger than any ever before shown here, and a highly important feature of it is the complete showing of those furs that are bound to become scarce when cold weather sets in.

Shapes, sizes, proportions and styles are altogether the handsomest and most delightful ever seen. In them are embodied the very latest and cleverest fashion ideas, each model having its own individual charm.

It's generally considered to be a difficult feat to pick out the

A Rare Chance to Make Some Money

We have just secured a thirty-years' lease on a section of land in Flat Creek, Montgomery County, N. Y., about one and one-half miles above Sprakers Bason, a station on the West Shore Railroad. This property contains a large and valuable deposit of Lead, showing by assays over 80% pure galena (within 5% of the richest specimens known). Five business men of Buffalo, N. Y., have organized a company, The Montgomery Mining and Reduction Co., with a capitalization of six hundred thousand dollars, par value of shares one dollar each. (Fully paid—non-assessable. Incorporated under the laws of Arizona).

We want to sell just enough of these shares to furnish funds to equip and work one of the five true fissure veins contained in this property. It will not require much money to equip for working, as there is plenty of timber on the property for erecting buildings, mine and milling purposes. We shall not attempt to build smelter now, but ship our ore in car lots to a smelter from which we can get cash returns within a few days from dates of shipments. Do you realize what a chance this offering presents for a profitable investment?

You do not have to go so far afield as the Western States or thousands of miles away, but so near that you can visit the property at little expense or loss of time.

There is an increasing demand for lead, which now exceeds in value the production of silver in the United States. The smelting companies stand ready to pay us cash for every ton of ore we can ship to them.

This is simply a business proposition where you are sure to make some money on the shares you will buy.

Not a mining scheme, as usually presented, and if you have a few dollars that are not at present working—here is the opportunity that you want.

Let us give you full information. MONTGOMERY MINING AND REDUCTION CO.
