

The Smart and Silberberg Co.

Sale of Beaver Shapes and Ostrich Feathers.

The Season's Warmest Favorites

The most popular by far of all this season's millinery are Beaver Hats and Ostrich Plumes. Even at this early date the demand for the former has been so great that the factories are sold way ahead. Prices are advancing every day, and even at the advanced prices deliveries are very slow.

We anticipated just this condition. Long, long before the season started we plunged on both Beavers and Plumes. We placed our orders when the prices were down, and they were liberal orders too.

Over 200 Beaver Shapes to Select From.

The \$ 6.50 ones are \$4.80
The 8.50 ones are 5.90
The 10.00 ones are 7.90

A \$3,000 ostrich stock to select from.
The most wonderful values ever heard of.

Wonderful Willow Plumes.

Absolutely without precedent that a Willow Plume, 15 and 20 inches long, was ever sold at the price we quote herewith:

\$ 7.50 Willow Plumes, 15 inches long, black and white	\$5.75
12.00 Willow Plumes, 17 inches long, black and white	7.35
15.00 Willow Plumes, 20 inches long, black and white	9.75
25.00 Willow Plumes, 20 inches long, black, white and colors	16.50

FAMILY FAVORITE ILLUMINATING OIL

makes the light that rests the eyes. Nearest approach to natural sunlight known.

Most economical too—burns to the very last drop without re-adjusting wick. Does not char, smoke or "smell." Clear, water-white, free from sediment. Not to be compared with ordinary tank wagon oil.

Ask your dealer to serve you out of the original barrel. Then you have the purest, best lamp oil made.

A Bank Account Helps Establish Credit

A savings account is a very good guide post to a man's character. The man who saves a little money regularly every week or every month shows himself to be prudent, careful, cautious. He exercises foresight and sound common sense—and is usually deserving of the respect of his fellow townsmen and generally gets it. Not so with the spendthrift; he is usually in debt or at periods at least hard pressed for funds—he is a poor credit risk. Establish a basis for solid credit by opening an account with us. Small accounts solicited.

This Week, A Dress Goods Sale.

The word "sale" implies less price for certain merchandise or it may signify an exceptional buying chance by reason of some special merchandising transaction. This is to be a sale wherein the price will range down to less than half and in which the quantity is so great that we've set aside an entire week for the occasion. Long toward the end of our season we've been having a dress goods. Now we'll reverse the order of things and have the sale at the beginning of the season. It's for the purpose of clearing the dress goods shelves of all odd pieces. Where there's a full color assortment in an particular fabric the price is not affected. But every odd piece of dress goods has a new valuation put on it today, which as stated above range down to less than half price. Note these important facts, not a piece in the lot but what's all wool and with one single exception all are absolutely perfect.

A Gun Must be Shot Every Minute

One of our mammoth guns must be shot every minute to supply the call for Puffed Wheat and Puffed Rice. For, last month, these foods were served for seventeen million meals. We ask you tomorrow to surprise your folks, and have one of them served on your table. When you see these crisp, gigantic grains, you'll not wonder that people like them.

Unbroken grains, puffed to eight times natural size—made four times as porous as bread. Grains with every starch granule expanded, so the digestive juices act instantly. Foods that are good—and good for you. Foods that the children like. You are missing more than you know while you cling to foods not nearly so enticing as these.

Puffed Wheat—10c Puffed Rice—15c

These are the foods invented by Prof. Anderson, and this is his curious process:

The whole wheat or rice kernels are put into sealed guns. Then the guns are revolved for sixty minutes in a heat of 550 degrees.

That fierce heat turns the moisture in the grain to steam, and the pressure becomes tremendous.

Then the guns are unsealed, and the steam explodes. Instantly every starch granule is blasted into a myriad particles.

The kernels of grain are expanded eight times. Yet the coats are unbroken, the shapes are unaltered. We have simply the magnified grain.

One package will tell you why people delight in them. Order it now.

Utica, Oct. 12.—His ambition to bring to camp a deer that he had shot cost William McIntyre of New Shelton his life. McIntyre went into the Adirondacks several weeks ago and one day killed a deer near Beaver river. He was a long way from camp and rain was falling, but the hunter determined to carry the carcass to camp on his back. He struggled through the wet foliage for miles with his burden and reached camp cold, wet and exhausted. McIntyre soon became ill and paralysis came upon him. He was removed to Faxon hospital in this city, where the doctors diagnosed his case as multiple neuritis, a very uncommon disease, which affects the nerves and causes paralysis. It is caused by cold and exposure and is practically beyond reach of medical treatment. The disease progressed gradually until McIntyre's whole body was helpless and he died.
