To Care for Venango's Prisoners.

Forest county does not have any prisoners in its equnty jail and, evidently, it wants some, for the County Commissioners have received a letter from the Sheriff stating that he will be glad to accommodate Venango county's jail prisoners during the construction of the jail in this county next summer. The commissioners have practically decided to accept the proposition.

It is likely that Venango county will be without a jail for six or eight months and there is no place in the county where prisoners can be cared for. The Forest county iail is located at Tionesta and the train service between Franklin and that place is good. The authorities will be able to go up in the morning and come noon and come back in the evening. The Meadville, but the jail at the former place having been built in 1846, is unsafe. The secure. It is usually empty, and the Sheriff will probably be glad of an opportunity to make a little money keeping Venango county's prisoners,-Franklin

Fire at Mayburg.

Saturday morning last about 8 o'clock, the dwelling occupied by Fred Horner and family, at Mayburg, was discovered to be on fire, and while help responded quickly to the alarm, the building could not be saved, but burned to the ground. As ill luck would have it, the large pump which controls the water pressure in the village, had been taken spart for the purpose of making some repairs not fifteen minutes prior to the starting of the fire, otherwise the building could have been saved. Mr. Horner's household goods on the first story were about all saved, but those on the second story were all consumed, entailing a loss of about \$200, with no insurance. The loss on the dwelling. which was the property of the Watson Lands Lumber company, about \$500, was covered by insurance. The origin of the fire is not known.

The baby of the family narrowly escaped, the bed clothing on which it lay having taken fire, but it was rescued un

A Costly Lesson.

Last Friday a week Frank, the 12-yearold son of Chas Day of Tidioute lost a foot while trying to jump a freight train passng through that place. The News notes the fact in these wholesome words which apply in almost all localities, Tionesta being no exception: "The report is that twenty-one little boys were on the train at the time. Just how the Day boy was hurt is immaterial. The fact is that he -Mr. and Mrs. J. J. Landers left Sun- and the rest were where they had no business to be. How to stop this train jump-Landers is attending U. S. District Court ing? We don't know. We know of some parents who resent being told that their are others who find the matter the problem of their lives. This accident will serve its lesson for a week or so and then the business will be resumed. The doctors removed the left foot of the Day boy about three inches above the ankle and the lad seems to be getting along all right. But, he like the rest, was 'having a good time,' and goes through life cripple. In time the rest, if train jumping is persisted in, will either be crippled or fill a grave in the cemetery."
