

The Smart and Silberberg Co.

S. & H. Green Trading Stamps with all cash purchases.

Colored French Linenes 15c

45 inches wide—price was 25c. The first shipment we received of these goods sold very quickly. This led us to believe we could not get too many of them. This was a mistake; the second lot did not sell nearly so fast. We learned that there is always a probability of getting too much, even of a good thing. That's why these really pretty suitings are now being offered at less than manufacturer's cost. They are 45 inches wide—colors are white, grey, rose, linen, sky, Alice and grey.

36-inch Colored Crash Suitings.

10 cents now, were 20 cents. Colors are white, sky, Alice, rose, amethyst, linen and grey. This is just another case of over-buying. We didn't guess right, so we must take our loss. The manufacturer's price is 15c, so we stand to lose 5c on every yard.

An Item to Interest the Men.

25-cent "True Shape" Sox 15 cents. In black, tan, grey, green, helio and most any wanted color. This is a decided bargain for the men. We doubt if there is a better hose sold anywhere at 25c than the "True Shape."

25c Colonial Draperies 15c.

The other day we placed our order for new Colonial Draperies for fall. Before they arrive we want to close out the present stock. That's why this price—15c.

Reduced Prices on Women's Summer Suits.

To make room for Fall Goods we are closing out the finest Linen Suits in the store. Suits that ought never to be sold at less than regular worth. This includes all styles and shades of Real Linen and Ramie Suits. Finest materials, latest styles. Suits worth \$7.50, \$8.50 will sell at \$3.50. Suits worth \$10, \$12, \$13.50 will sell at \$5. All this season's styles.

The Value

Of stocks fluctuate, and there is always a risk of loss in purchasing them. The conservative investor will find one of our

Four Per Cent.

Certificates of Deposit will return a sure and fair rate of interest, and he avoids all worry and knows he can secure his money when desired. Business by mail given special attention.

The Trust Company as Guardian

When acting as guardian, the Franklin Trust Company takes entire charge of the estate, managing it in conformity to the law, or if appointed by will you may be sure that the provisions thereof will be carried out to the letter and prompt and careful attention given to all details at all times. The individual who acts as guardian sometimes dies before the children become of age, thus involving costly legal proceedings and loss of property, or he may mismanage the estate to take advantage of the minors in his charge. You may be familiar with experiences of this kind, where women and children have lost heavily because of the failure of supposedly honest guardians to prove trustworthy.

Owing to the security which this company offers and its perpetual life, there is no possibility of such occurrences when it acts as guardian.

Total Assets \$3,000,000.00

THE ZANZIBARIS.

Dense Stupidity and Amusing Blunders of the Natives.

In the "Autobiography of Sir Henry M. Stanley" the author says of the colored natives of central Africa:

"Good as the majority of Zanzibaris were, some of them were indescribably and for the most unfortunately dense. One man who from his personal appearance might have been judged to be among the most intelligent was after thirty months' experience with his musket unable to understand how it was to be loaded. He never could remember whether he ought to drop the powder or the bullet into the musket first. Another time he was sent with a man to transport a company of men over a river to camp. After waiting an hour I strode to the bank of the river and found them paddling in opposite directions, each blaming the other for his stupidity and, being in a passion of excitement, unable to hear the advice of men across the river, who were bawling out to them how to manage their canoe.

"Another man was so ludicrously stupid that he generally was saved from punishment because his mistakes were so absurd. We were one day floating down the Kongo, and, it being near camping time, I bade him, as he happened to be bowman on the occasion, to stand by and seize the grass on the bank to arrest the boat when I should call out. In a little while we came to a fit place, and I cried, 'Hold hard, Kirango!' 'Please God, master,' he replied and forthwith sprang on the shore and seized the grass with both hands, while we, of course, were rapidly swept down river, leaving him alone and solitary on the bank. The boat's crew roared at the ridiculous sight, but nevertheless his stupidity cost the tired men a hard pull to ascend again, for not every place was available for a camp.

"He it was also who on an occasion when we required the branch of a species of arbutus which overhung the river to be cut away to allow the canoe to be brought nearer to the bank for safety actually went astride of the branch and chopped away until he fell into the water with the branch and lost our ax. He had seated himself on the outer end of the branch."

"Water seeks its level" is an expression heard so frequently as to be almost trite, and yet the law has its exceptions. There are conditions under which water actually flows upward and rises above its source. If a glass tube be dipped into water the column inside will be above the level of the surrounding surface. Moreover, if a tube of half the diameter be substituted the column doubles its height. The water creeps along the inside of the tube, owing to the adhesion, and forms a cup shaped depression at the top.

An explanation is not difficult. It can be proved mathematically that if the diameter of a circle be diminished one-half the circumference is also reduced to that extent, while the area is one-fourth of its former value. The circumference of the column of water being reduced one-half, its contact with the glass, and hence the adhesive force, is also diminished to that extent, while the cross section, and hence the weight, is decreased to a fourth of what it was before. Therefore the second column can be twice the height of the first without exceeding the lifting power.

Remarkable as the underlying principles of this phenomenon undoubtedly are, nature made use of them long before man made their discovery. Every tree and flower adds its testimony. The core of a tree or plant, instead of being a single open channel, consists of a spongelike substance containing many miniature tunnels, through which the sap and moisture collected by the roots flow upward in small rivulets, rising higher and higher in sheer defiance of the great law of gravity.—St. Louis Republic

THE SKIPPER'S WHITE LIE.

What Happened at Night and What the Passenger Was Told.

It was a dirty night, to use a sailor's phrase, and the talk in one corner of the smoking room drifted to events at sea and the childlike faith that passengers repose in navigators.

Said the scientist who had been collecting specimens on a coral reef: "I've often heard men and women say they felt so safe with Captain So-and-so, and I've wondered, too, whether their sense of security would still be retained if these favored travelers knew exactly what happened on shipboard during a voyage. For my own part, I have more confidence than ever in a captain of my acquaintance since I learned that he could tell a white lie when it was necessary to calm the fears of a nervous traveler. It so happened that one foggy night I was awakened by the sudden stoppage and reversal of the engines. I jumped out of my bunk, went on deck and was told by the second officer that we had had a narrow squeeze. It appeared that we had nearly run down a schooner as she silently crossed our bows and disappeared into the haze.

"Next morning a woman passenger who sat at the captain's table asked him whether the engines had been stopped and reversed, and he replied: 'Yes; we sometimes do this to test the engineer's watch and see if our machinery is in proper order. We do it at night so as to create no excitement.' Then he got the woman to describe what she had heard and asked her: 'Did you find much time between the stopping and reversing?'

"No," she replied. "Then," said the skipper, "that showed how well everything was working, did it not?"

"When I got the skipper's ear I told him confidentially that I didn't think the schooner's engines had worked as well as ours, and he remarked that it might have been worse. Whether he meant the lie or the incident I didn't inquire, but I suspect it wasn't the lie."—New York Post.

Knew What She Was Doing. Pastor—I was sorry for your wife during the sermon this morning, doctor. She had such a dreadful fit of coughing that the eyes of the whole congregation were fixed upon her.

Doctor—Don't you be unduly alarmed. She was wearing her new hat for the first time.

"In the Shadow of the Chair."

A man who was tried for his life has written a powerful story of which the above is the title. Only two men living know who wrote it, so carefully has the author concealed his identity, and yet in telling of his terrible ordeal he gives a picture so vivid that one feels he has held back nothing. It is a wonderful story and you should not fail to read it in the beautiful monthly magazine which is free with The Pittsburg Dispatch Sunday, August 14. The stories in this handsome magazine are all by the best writers of the day. Some of the other good ones are: "The Breach," by Mabel Herbert Urner; "The Discoverer," by Charles Belmont Davis; "Cinderella of the Stage Door," by Grace Sartwell Mason; "Johnny M'Donald, the Two of Him," by Dave King; "The Man in Black" is the title of a strong serial, the first installment of which will be in the issue of August 14. It will be continued in the regular edition of the paper. You will like the magazine. It's free, but to be sure of getting it leave your order with the newspaper early for The Dispatch of August 14.

LAW OF GRAVITY VIOLATED.

Conditions Under Which Water Actually Flows Upward.

"Water seeks its level" is an expression heard so frequently as to be almost trite, and yet the law has its exceptions. There are conditions under which water actually flows upward and rises above its source. If a glass tube be dipped into water the column inside will be above the level of the surrounding surface. Moreover, if a tube of half the diameter be substituted the column doubles its height. The water creeps along the inside of the tube, owing to the adhesion, and forms a cup shaped depression at the top.

An explanation is not difficult. It can be proved mathematically that if the diameter of a circle be diminished one-half the circumference is also reduced to that extent, while the area is one-fourth of its former value. The circumference of the column of water being reduced one-half, its contact with the glass, and hence the adhesive force, is also diminished to that extent, while the cross section, and hence the weight, is decreased to a fourth of what it was before. Therefore the second column can be twice the height of the first without exceeding the lifting power.

Remarkable as the underlying principles of this phenomenon undoubtedly are, nature made use of them long before man made their discovery. Every tree and flower adds its testimony. The core of a tree or plant, instead of being a single open channel, consists of a spongelike substance containing many miniature tunnels, through which the sap and moisture collected by the roots flow upward in small rivulets, rising higher and higher in sheer defiance of the great law of gravity.—St. Louis Republic

Annual District Report

Of Kingsley Township, Forest County, Pennsylvania, for the school year ending on the first Monday in June, 1910:

Whole number of schools	18
Average number of months taught	8
Number of male teachers employed	1

SHERIFF'S SALE.

BY VIRTUE of a writ of Testatum Fieri Facias to Forest County, issued out of the Court of Common Pleas of Marion County, Pennsylvania, and to me directed, there will be exposed to sale by public vendue or outcry, at the Court House, in the Borough of Tionesta, Forest County, Pa., on

FRIDAY, AUGUST 19, A. D. 1910, at 1:00 o'clock p. m. the following described real estate, to-wit:

DANIEL STEINER vs. E. W. BARR, MYRL BARR, Testatum Fieri Facias, No. 20, August Term, 1910.—(Waivers.) Geo. F. Whitmer, Attorney.

All the right, title, interest and claim of the defendants of, in and to all that certain lot of land situate, lying and being in the village of Marionville, Jecks Township, Forest County, Pennsylvania, bounded and described as follows, viz: Sixty-six feet front on South Forest street from corner of Cyrus street northward to a post; thence east one hundred and fifty feet to a post on an alley; thence south sixty-six feet to a post on the corner of Cyrus street and an alley; thence one hundred and fifty feet west to the place of beginning. Known as lot No. 32. Having erected thereon one one-story house 16x24 feet, with all 16x24 feet attached, containing six rooms. Also one barn 16x16 feet, and other necessary out-buildings. One well of water.

Taken in execution and to be sold as the property of E. W. Barr, Myrl Barr, at the suit of Daniel Steiner.

TERMS OF SALE.—The following must be strictly complied with when the property is stricken down:

1. When the plaintiff or other lien creditors become the purchaser, the costs on the writs must be paid, and a list of liens including mortgage searches on the property sold, together with such lien creditor's receipts for the amount of the proceeds of the sale or such portion thereof as he may claim, must be furnished the Sheriff.

2. All bids must be paid in full.

3. All sales not settled immediately will be continued until 2 o'clock p. m., of the next day, at which time all property not settled for will again be put up and sold at the expense and risk of the person to whom first sold.

"See Purdon's Digest, Ninth Edition, page 446 and Smith's Forms, page 384. S. R. M. AXWELL, Sheriff. Sheriff's Office, Tionesta, Pa., August 2, 1910.
