

Table with columns for 1910, NOVEMBER, and 1910, with sub-columns for Sun, Mon, Tue, Wed, Thu, Fri, Sat.

In dealing with the tariff when in power the Democratic party has achieved one thing that was perfect—a perfect middle.

The result of the election in New York clearly demonstrates that large sums of money, judiciously spent, still continues to cut ice up there, opines the Punny Spirit.

THERE is some comfort for Republicans in the fact that President Taft is stronger to-day than he has been at any time since his induction into office.

AN effort is to be made by progressives to reduce the power of the speaker of the next House. Since he is to be a Democrat, and that party having shown a decided tendency in the direction indicated, the movement is not only opportune, but ought to succeed with little difficulty.

THEY tell us the most trust has announced a cut in the price of pork. To be sure, why not? Isn't this hog-killing time, when every farmer in the country has a hog or two to sell? Why shouldn't the price be reduced by the trust? Now if the Ice Cream Trust will announce a reduction in price we may all be happy yet.

ACCORDING to the theory of some of our plighted contemporaries it is the duty of an ex-President to retire to the sequestered shades of oblivion and pretend not to be awake.—Punny Spirit. But the only ex-President on earth today isn't built that way. He's the wide-awake gent in this fair land, and that's what's making the most of 'em sit up and take notice.

TAKING the Punksotaway Spirit's view of the matter there is only one way out of it: "It is extremely probable that Woodrow Wilson is a bigger man intellectually than Judson Harmon, but it must be remembered that Harmon is an Ohio man, and it is immemorial usage counts for anything it is doubtful if it would be constitutional to elect a man to the Presidency who does not reside in Ohio."

ALL this talk about Roosevelt being "dead politically" has no credence even with the newspapers uttering it. They know better. Whatever Roosevelt's faults, a lack of red blood has never been attributed to him. The Democrats are the government, now, or popularly regarded as such. And a wave of popular discontent will be just as good for them to ride out on and Roosevelt in, as it was contrariwise.—Blizzard.

THOSE who hold up Theodore Roosevelt's "new nationalism" as a bugaboo to frighten the unthinking dare not quote Roosevelt's own definition of it, which is this: "What I mean by new nationalism is the effective application of the old moralities to the new conditions. Our first duty is to see that in political and industrial matters alike, there is no special privilege. All that I am trying to do in political, social and industrial matters is to make this land of ours more of a land where every citizen has a square deal." Is there a single thing wrong with that sort of new nationalism? We think not, and neither does the great mass of the American people, as you'll all wake up some morning to see.

THE following statement by Theodore Roosevelt, his first comment since the recent elections, will appear in the forthcoming issue of The Outlook. "On every hand, personally and by correspondence, I have been asked to make a statement regarding the election. So far as I am concerned I have nothing whatever to add or to take away from the declaration of the principles which I have made in the Ossawatimie speech and elsewhere east and west, during the last three months. The fight for progressive popular government has merely begun and will certainly go on to a triumphant conclusion in spite of initial checks and irrespective of the personal success or failure of individual leaders."

In opening his address before the National Geographic society, at Washington, Friday night, ex-President Roosevelt said: "Every dog has his day—but the nights belong to the cats." This was the only remark that could be construed as bearing on the late political unpleasantness, says the Oil City Blizzard. But, while refraining from any discussion of political matters, he improved the opportunity to make several little sardonic thrusts at his maligners and traducers, as, for example, when he said: "I am now going to shake hands with every blessed one of you who does not think his character will be hurt thereby." He has a happy faculty for holding up by the tail for public inspection the various forms of insincerity and false pretense employed by those hired to defame and misrepresent him.

MAJOR McDOWELL announces that he will positively not accept the Chief Clerkship of the next Congress, nor if the Democrats go down on their benched knees and offer it to him on a silver platter, knowing full well that they are seldom found on their knees and have renounced silver. He further says he will buy a plow, keep a bee and be found hereafter on his farm east of Sharon. The Major will now have a chance to realize the ambition he has long cherished. So long as ten years ago he addressed the Jackson Center harvest home picnic on the joys of the farmer's life, says the Greenville Record. In closing, he said: "It has been my life-long desire to spend my last days on a farm. It is the ideal life—to live upon a farm. I have one in my mind's eye now. The golden crops waving in the sun, the sleek equines neighing in the pasture fields, the placid sheep about the shady slopes, the fatted king upon the hill. Such a farm I would like; one that would be the waters of a sparkling brook at one end and a sparkling brook at the other end—in town."

Hotelville.

W. C. Hottel has moved his family to Halsey Pump Station, where he is employed by the United Natural Gas Co. Frank Cassatt is going to move next week to Jones Camp, above Marienville, where he is employed by the Collins Lumber Co. Mrs. J. B. Campbell returned home a few days ago from Westfield, New York, where she has spent the past four months picking cherries, grapes and other small fruits. David Weaver has been confined to the house for the past two weeks with stomach complaint. This has been quite a snug little winter so far, but it came too quick, as it caught some of our farmers with their corn and potatoes still in the fields. This is fine weather for hunters. Jas. Cuzzins and Jake Irwin, with their fine fox hounds, are out every day for foxes and they get a good many, too. Robert Black's three charming daughters, who have spent the most of the summer in New York state, are back home again with their many friends. Hiram Irwin, one of oldest residents, has been very sick for the past three weeks with asthmatic troubles, but is better at this writing. J. E. Cosgrove has been confined to the house for the last week with lung trouble, but is better now. Guy Leslie made the purchase a few weeks ago of a fine Scotch Collie dog. Ed. Meze has moved his family to the Boring Well, McKean county, where he is employed by the Standard Oil Co. Robert Black expects to move his family and household goods to Lawrence county in the near future, where he has purchased a large farm. Robert Bargerstock, of Redclyffe, purchased two fine cows from Mrs. Mary Meze one day last week. The birthday party and wood chopping, both of which occurred on the same day at Grandmother Ward's, was well attended and all report an excellent time. Cal. Kerr passed along our street last Wednesday morning with a fine leghorn rooster which he purchased from Ves. Fitzgerald. Albert Wolfgang has moved his family this week to Sheffield Junction, where he is employed.

Infantile Paralysis.

In view of the fact that there have been many cases of infantile paralysis the country over, it will be well to pay attention to an authority which says: "If a child has symptoms of the grippe, call a physician at once. If the child suddenly falls in play and then complains of pain in the back and shows a slight fever, call a physician. You cannot afford to lose any valuable time. Doctors do not know for a certainty whether the germ of the disease is bred in dirt, but be on the safe side and keep your premises absolutely clean." A medical expert in Cleveland has announced to the public the following: "Infantile paralysis is communicated to the human system through the membrane of the nose and throat; and it is in kissing and drinking that the greatest danger lies. Don't permit your children to drink from public drinking cups. Don't permit your children to be kissed by playmates or strangers or friends, and restrain your relatives. Use peroxide of hydrogen continually as a nasal spray and throat wash." So far as has been discovered, the germ of infantile paralysis enters the system through the mouth or nose. It is thought to be both infectious and contagious. The germ makes its way through the spinal column, eating away the tissues of the nerves. This is the early process of the disease during which time the patient suffers intense pain.

Nebraska.

T. D. Collins has returned from a trip to Baltimore. Mrs. Mary Thomson, of Tionesta, is visiting her daughter, Mrs. Wilbert McKean. Merton Klinefester spent Sunday with his father on Church Hill. Mr. Drake, of Boston, Mass., spent Sunday with friends in town. Mrs. Wm. Meyers was a visitor in Tionesta one day last week. Samuel Preston and Merton Klinefester attended the pie social at Kiser school on Friday evening, while Melvin Sibbie attended the one at Biocher school on the same evening. James Weaver, of Lickingville, has been doing some paper hanging at the hotel during the past week.

What Burbank Thinks of Drinking.

Every one has heard of Luther Burbank who, on account of his marvelous achievements in horticulture and arboriculture, has been called the "Plant Wizard." A New York paper some time since sent a correspondent to seek an interview with Mr. Burbank. Among other questions propounded in the course of the interview, was this: "Do you think that whiskey and tobacco impair the faculty for work?" The answer will deeply interest many readers: "If I answered your question simply by saying that I never use tobacco and alcohol in any form, and very rarely either coffee or tea, you might say that was a personal preference and proved nothing. But I can prove to you most conclusively that even the mild use of stimulants is incompatible with work requiring accurate attention and definite concentration. To assist me in my work of budding—work that is accurate and exacting as watchmaking—I have a force of some twenty men. I discharge men from this force at the first show of incompetency. Some time ago my foreman asked me if I took pains to inquire into the personal habits of my men. On being answered in the negative, he surprised me by saying that the men I found unable to do the delicate work of budding invariably turned out to be smokers and drinkers. These men, while able to do the rough work of farming, call budding and other delicate work 'puttering' and have to give it up owing to an inability to concentrate their nerve force. Even men who smoke one cigar a day I cannot entrust with some of my delicate work. Cigarettes are even more damaging than cigars, and their use by young boys is little short of criminal."—Presbyterian Banner

—For pains in the side or chest dampen a piece of flannel with Chamberlain's Liniment and bind it on over the seat of pain. There is nothing better. For sale by all dealers.

Interview With T. D. Collins.

The New York World of the 11th inst., publishes the following interview with one of Forest County's well known citizens: "Give until it hurts," is the motto of T. D. Collins, millionaire lumberman from Pennsylvania, and he has been living up to it for sixty-five years. He talked yesterday with a reporter for The World, in the minister's study at Grace Methodist Episcopal church where he is attending the conference of the General Committee of Home Missions and Church Extension. This committee is the chief beneficiary of his charity. Collins looks to be sixty years old, but he is eighty. He has grizzly gray whiskers and piercing gray eyes that look from above sallow, sunken cheeks. He speaks with the twang of the down East and wears a blue flannel shirt and a ready made suit that perhaps cost \$20. He stints himself that others may have. But he has indulged in one luxury. A big diamond gleams from the flannel shirt. "What did Christ say?" Collins demanded, shaking a bony finger at the reporter. "Christ said, deny yourself." That means give more than you can afford, so that you will have to go without. That's the kind of giving T. D. Collins does.

MUST MAKE BIGGER GIFTS.

"No, sorry, I don't know what proportion of my income I give away. I don't want to know. Last year I gave away \$10,000. This year I'll give only \$15,000 because I'm buying some land. But I've got to make it up. Dearie me, yes, I must." And it is true Collins donates between \$30,000 and \$50,000 a year to his church. He lives in the town of Nebraska, Pa., and his house is no better outwardly than the house of the workers in his lumber mills. "You say John D. Rockefeller gives a lot of money," he said. "What does he give? He gives \$10,000 to some church and then he takes a hundred thousand dollars in rebates. What do I think he ought to give? I think he ought to give it all. That's what I'd do if I made my money the way he made his. HIS LIFE ONE OF HARD KNOCKS. "No, no," impatiently shaking his head, "I couldn't tell you my story if I sat here for the next twenty-four hours. It's a story of hard knocks. I worked for what I've got to give away. I worked hard on my father's farm near Cortland, N. Y. I went to school. I couldn't read or write. I saw where I was short of the other fellows. I went home and began to do outside work. I'd finish my work on the farm and after I was all through there, I'd go out and work for the neighbors. "About that time the Methodist minister came to our town. He was just a plain man. He wouldn't bag for contributions, but you gave what you wanted. I gave him that winter \$20 a month and I earned enough to pay my way at school besides. That's when I got the giving habit.

Infantile Paralysis.

In view of the fact that there have been many cases of infantile paralysis the country over, it will be well to pay attention to an authority which says: "If a child has symptoms of the grippe, call a physician at once. If the child suddenly falls in play and then complains of pain in the back and shows a slight fever, call a physician. You cannot afford to lose any valuable time. The RUBEROID Man. This picture of the RUBEROID Man is on the outside of every roll of genuine RUBEROID Roofing. There are more than 300 imitations of RUBEROID. This is one of the strongest proofs of its high quality. A worthless article is never imitated. RUBEROID Roofing. RUBEROID is the original ready-to-lay roofing. It has been in use for over eighteen years, and many buildings are covered with RUBEROID laid eighteen years ago. It is not only used on business buildings, barns and school houses—but also on private residences. It comes in attractive Red, Brown and Green shades. Write to-day for free books on roofing. The Standard Paint Company 100 William Street New York. Branch Offices: Boston, Philadelphia, Chicago, Kansas City, Atlanta, St. Paul, Cincinnati, Denver, San Francisco.
