Good Roads Law Proposed.

In the state senate last week the Sproul good roads bills were introduced. They provide for a state bond issue of \$50,000,-000 for construction of good roads. Before such bond issue can be made, however, there will have to be an amendment to the state constitution, and this feature has been provided for by the introduction

of an amendment which must be approved by two successive legislatures and will play the team of the Union Church then go to the voters of the state for ratification. If it meets success in the present legislature and that of 1913, and the people approve it at the election of the latter year, direct legislation for the loan can be passed by the legislature of 1915. Four years must elapse before the big

fund is available, but in the meantime the state can go ahead at road-building on a smaller scale through appropriations from current revenue.

The people of Forest county will be interested to know that the proposed road building would bring them great benetits in the way of through roads that would always be in condition for travel and be built and maintained wholly by the state.
