One other son conducted a confectionery store on Main Street and he ran into the street and dashed for the bill. Austin Horror Causes Water Commission to Hesitate.
Word comes from Harrisburg to the effect that the State water supply commission is "holding under advisement" the project of Pittsburg financial interests to gobble up the water power in the valleys of Tionesta creek and the Clarion river, and there is some question when the commission will finally dispose of the applications. It would seem from this report that the horror at Austin had some weight with the commission in deciding not to act on the applications although the commissioners themselves have only made the bare announcement, giving no reasons.
So the project is not yet dead, and the people may still look for trouble, notwithstanding the fact that the terrible calamity that has befallen the inhabitants of Austin and Costello should forever deter the authorities from granting such privileges to any corporation.
The snake is not dead by any means, and will bear watching.

UNNATURAL DROWSINESS.
Karl de Schweinitz, executive secretary Pennsylvania society for the prevention of tuberculosis, says: "Don't yawn. Next time you feel sleepy after a brisk walk in the autumn wind. You feel sleepy. Usually you blame it on the air. You are right. It is the air—but the inside air, not the outside air that is to blame. Outside air is fresh, and has plenty of oxygen. It makes the heart beat rapidly. The blood rushes through your arteries. You feel wide awake. Inside the windows are closed. Perhaps the fire is burning. This and other people in the room use up the oxygen. You have to breathe stale air. Soon the heart is beating slowly. You become drowsy, sleepy, yawning. You throw the beginning of a headache. Then you open the window and see how soon the fresh air will wake you."
