The signing of the proclamation by President Taft admitting Arizona as a state on the 14th inst., makes that the Valentine state of the Union, and Uncle Sam will hereafter have 48 stars in his statehood crown.

Out of the 1,076 delegates that will compose the Republican national convention at Chicago in June, President Taft's friends predict that he is sure of 780 or first ballot or 241 more than would be needed to nominate him.

AN unknown friend (?) sends us a copy of the "Index," an illustrated publication in which is a marked article, profusely illustrated, on the "Utility and Beauty of Dams." No doubt the article is inspired and published at this time by some of the people back of Tionesta and Clarion dam project.

Five times out of ten the most poorly ventilated building in town is the church. People complain of feeling drowsy during the sermon. Sometimes it is the minister who is to blame, but more often it is the lack of ventilation.

HARRISBURG. A protest has been lodged with the State Water Supply Commission against the incorporation of the power companies which propose to erect large dams in the Clarion and Tionesta rivers by the State Conservation Association.

A STATE PROBLEM

WHAT TO DO WITH PROPERTIES IN NEW PARK SITE IS THE QUESTION.

FOUST AFTER THE BAKESHOPS

Typoid Fever Epidemic Reported at Coatsville—State Health Department Takes Charge of Water Supply Plant.

Harrisburg.—The state will have a new problem of housekeeping on its hands within the next few months when the houses bought by the Capitol Park Extension commission begin to accumulate.

The board will decide what to do with the properties. The last purchases will not be made until 1915, owing to the manner in which the appropriation is distributed, so that if properties are good the state may decide to rent them.

It is probable that before very long steps to have a commission named to study the method of treatment of the park, this commission to be composed of eminent landscape architects familiar with development of public buildings and properties.

To Clean Up the Bakeshop. "We are going to chase the drug store out of the bakeshop just as we have gotten it out of the candy store and the meatshop," said Dairy and Food Commissioner James Foust in speaking of the prosecutions for the sale of cream puffs with adulterated "filler."

Because of the development of 200 cases of typhoid fever in Coatsville, the state health department has taken charge of the plant of the Borough Water Co., which supplies the town with water from Sucker run and Heffners creek.

A force of watershed inspectors, engineers and physicians were sent from the state health department, with instructions from Dr. Dixon to co-operate with the local health authorities. A temporary plant will be erected for treating the water supply, and the town will be placarded advising all persons to boil the water.

The readers of this paper will be pleased to learn that there is at least one dread disease that science has been able to cure in all its stages, and that is Catarrh.

The act authorized the governor to appoint a commission of seven members, two of whom were to be employers of labor, two employees in mines or industrial establishments, or accredited representatives of such employees, two learned in the law and one experienced in making investigations.

The governor is empowered to name the chairman of the commission, and Prof. Behlen, the expert investigator appointed to membership, is to be the secretary.

The commission is to employ counsel and necessary clerks and stenographers. The commissioners are to serve without pay, except the secretary, who is to have \$4,800 a year.
