Judge Hinckley filed an opinion last week in the case of Moland Bros., of Oil City, against E. L. Myers, of Endeavor, refusing to open the judgment. This case was argued at the February term of court.

The crusade against the sale of candied violets and other flowers adulterated with coal tar dyes is to be pushed in all cities of the state. The first arrests were made in Philadelphia on Friday, and more will follow. Inspections along this line have been made in several eastern cities of the State.

Last week, through the Arner agency the Wheeler & Dusenbury company at Endeavor received \$150.00 for loss sustained in the burning of one of its dwellings houses ten days prior, and at the same time C. G. Thompson, who occupied the house, received a check for \$125.00, covering his loss on damaged household goods to the same fire.

Mrs. F. W. Dreyer, who was the delegate from the Stewart Run church to the annual meeting of the Allegheny Conference of the Wesleyan Methodist church, which was held last week at Canton, Ohio, returned Monday and reports that the conference sent Rev. and Mrs. Levi Fenton, now of Bradford, Pa., to the Stewart Run charge. The church was without a regular pastor during the past year, being supplied, Rev. A. C. Hall, who was pastor of the church two years ago, was sent to Brown Hill, near Youngsville, Pa.

—It's a trifle early for snake stories, but the REPUBLICAN, as usual, has its competitors "frazzled" again. Last Wednesday, the first day of spring, Henry Glassner of German Hill, dispatched a spotted adder a few rods from his house that measured two feet and was lively as a cricket in harvest time. Knowing Henry to be an absolute teetotaler we accept his story without a grimace.

—Fred V. Brown returned last week from Philadelphia where he had closed the arrangements for the transfer of the general agency of the Penn Mutual Life Insurance Company from John F. and G. E. Brown to himself. This agency has been successful under the management of the late John F. Brown and Fred V. Brown has been under his father for the past few years and is capable of carrying on the business on the same high plane. —Clarion Republican.

—The people of Connelleville spent a day of terror on Thursday when news came that the big Indian creek dam, fourteen miles above the city, was in danger of going out. For several hours the town was on the verge of a panic. Fortunately the waters began to recede and the danger was soon over. The people of Tionesta, Oil City and Franklin have the same experience coming to them if the proposed dams on Tionesta creek are ever erected.—Titusville Herald.

—It was in the early days of the railroad and Aunt Ruth had boarded the train for her first trip. Her maid had neatly arranged her corset, handkerchiefs, and reticule around her, but there was some trouble with the engine, so that the train did not start at once. Aunt Ruth had spread out her ample skirts like an open fan, and her little feet were daintily perched upon a footstool. Just then the conductor passed through. Touching him lightly upon the arm, she said, "You may tell them I am seated and am ready to go now!"—April Woman's Home Companion.

—Any distribution of prizes involving the element of chance is a lottery within the prohibition of the laws of Pennsylvania, according to an opinion rendered last Monday by Judge George S. Criswell, of Venango county. A Franklin druggist had advertised he would give away a piano to the person turning in the largest number of coupons received in return for each purchase in his store. The judge holds that it was unlawful. The winner, he points out, receives something out of all proportion to the cash or labor invested, while the others get nothing for their labor, anxiety and services.

—In accordance with the general policy of the Pennsylvania R. R. for the encouragement and promotion of agricultural development, a farmers' special train will be run in co-operation with Pennsylvania State College, School of Agriculture and Experiment Station, on April 5th and 6th, stopping at most of the principal stations between Erie and Renovo, Pa. The nearest stopping point to Tionesta will be at Warren, where the train stops from 9:00 to 9:50 a. m., April 5th. Free lectures will be given to all interested in agricultural development, and the topics for discussion will be: Hay, wheat, corn for ensilage, orchard culture, use of lime and fertilizer, stable construction and sanitation.

—The early spring demonstrations in the Demonstration Orchard in each county of this State conducted under the direction of Prof. H. A. Surface, Economic Zoologist, have been concluded, and the demonstrators are now giving their attention to the subject of the Supervision of Orchards, where they go to personally visit orchards for the purpose of examining them and telling the owners how to treat them to get best results in fruit production. There is a large list of these orchards in each county, and the demand for this work has increased to such an extent that it will be impossible for the limited number of inspectors to take more such orchards to visit before the end of the dormant season.

—The news of the discovery of the south pole by Scott, the Englishman created great excitement during the past week, and no where was the intelligence received with greater interest than among the tourists who are spending the winter and spring in Punta Gorda. Five of these enterprising gentlemen immediately got their heads together and organized an expedition into Lake Okeechobee and the Everglades. They left early Tuesday morning in the good ship Guide, Captain Keen, and expect to penetrate far into the "Glades." One of the party is commissioned by several big Northern papers, and an interesting story will no doubt be forthcoming.—Punta Gorda, Fla., Herald.

The latter clause of this item has reference to our townsman, Wallace Chadman, no doubt.

—The borough school resumed operations Monday after a ten-day precautionary suspension on account of scarlet fever developing in two families who were sending pupils to the school, although residents of the township. There are no cases in the borough, and those of the township are progressing so well that any further outbreak is not looked for, the quarantine being strictly observed. This is indeed fortunate, and with the exercise of caution and common sense there need be no epidemic, and the disease can be confined to its present environment, which is the family of Wm. McKee on River Hill, where nine have taken the disease, all of whom are doing well, and the family of A. L. Thomson at Jamieson station, in which the one daughter is practically well again.

—From a private letter from our old friend and former Forest county citizen, L. J. Osgood, whose home was at Endeavor, but is now Fairfax, Washington, we take the liberty of quoting a few lines: "I am still among the living, but confess I have had a close call for a trip over the great divide, but am feeling much better now. For five weeks I was in the hospital and no one but myself thought I would weather it through, and I wasn't so awfully sore about it either, but now I can eat three square meals a day and relish them. I had an ulcer of the stomach, which proceeded to eat off an artery, so they told me, and the hemorrhages came near fixing me. I passed through a very critical operation, it being a choice between the knife and the box, and I chose the knife, and so I am here today. 'Twas mighty tough, though, going three weeks without a bite to eat. However, I am feeling fine now considering what I went through, but it will be a month or more yet before I am able to work. Kind regards to all my old friends."

—The Spring Term at the Clarion State Normal School opened March 25th. Review classes in the common branches have been organized for those preparing for the county examinations. Special work is offered in Agriculture, School Management, School Law and Methods in Music and Drawing. Students may enter at any time. Write for catalogue and circulars.

—Charles Black, tax collector of Barnett township, is suffering from a serious case of blood poison. Two weeks ago he cut one of his fingers and within a few days past his arm has swollen to twice its natural size causing great suffering with possible serious results.

—Henry Kaman, of German Hill, who has 300 acres of land under lease at Ludwigs, Clarion county, drilled in a good gas well last week on the Frank Broad farm, which is good for 500,000 feet per day. The gas was developed in the Clarion sand at 1050 feet. He will drill his next well on the Fidler farm. He has a good market for the gas, which will be sold to the Tri-County Gas Co.

—The death of Mr. and Mrs. John S. Smith, of Punxsutawney, on Friday and Saturday, week of that nature that brings no acute sorrow. They were the parents of Hon. W. O. Smith, editor of the Spirit, of that town, and had arrived at the ripe ages of 86 and 79 years. They had been married 62 years and their home life had been one full of love and joy in each other's companionship. For years Mrs. Smith had expressed the hope that she might live just long enough to know that her life-long companion had gone, and then follow him quickly. Her wish was granted. Mrs. Smith died on Friday morning. When the wife was informed she asked them to wait while for the funeral, and on Saturday she followed him, her last words being, "John, I am coming." Sweetest deaths could not be imagined, and sorrow can have no part in their passing.—Oil City Derrick.

—Our friend who is anxious to convert us from the belief that the proposed dams on Tionesta creek and the Clarion river are bad things for the people of this section has forwarded us several more copies of the Pittsburg Index, with a marked article on "Dams—American and foreign." As we have said before on numerous occasions, we do not like this dam proposition, and if there is anything that turns our mind toward some choice assorted dams—American and foreign—it is thinking about the avarice of men that moves them to seriously suggest a proposition so fraught with danger to the people for the benefit of the few. If the Index continues to publish these dam articles, and our ever zealous friends continue to send their dam articles to us, it may be necessary for us to erect a few dams ourselves to dam back the natural darts that arise within us.—Brookville Republican.

County Commissioners to Receive \$800.

Judge H. McKee decides that the salary of the Commissioners of Forest County is \$800 per annum, his opinion to that effect having been forwarded to Probationary Maxwell last week, the full text of which will be found on the first page of the REPUBLICAN today. The opinion is clear and unambiguous and settles the controversy arising from the act of the legislature passed in 1911, which, the court holds, does not apply to Forest county. An act applicable to all counties under 25,000 population was passed in 1909, fixing the salary in all such counties at \$800.

Commencement at Clarington.

The first session of the second annual commencement of the Clarington High School was held in the Methodist Episcopal church at Clarington, Sunday evening, March 24th, when Rev. H. E. The graduating exercises will be held Friday evening, March 29th, at 8 o'clock. After the exercises by the class, Prof. Wm. M. Stewart, of Slippery Rock, will deliver the address. Supt. J. O. Carson will also be present. All are invited to attend.

—James B. Hagerty, who spent the past fifteen months in the Oklahoma oil regions, came home Saturday, and doesn't expect to return to that state. He likes the country in many respects, yet it's not a one-sided affair and, like every other section, has its drawbacks. Wages are good and there is no industrial man need be idle, but the difference is fully compensated by the expensive living. In the summer the weather is well nigh unbearable, while the winter season is fully as disagreeable as in Pennsylvania. The cold does not reach the intensity of this section, yet is fully as "searching," the wind having a full sweep at a fellow in the open, and it's always doing business in cold weather. Mr. Hagerty met a number of former Forest county people while there, all of whom he reports as well and happy.

The ice went out of the creek from Buck Mills down Monday evening about ten o'clock, passing quietly through town and scarcely leaving a cake of ice on the shore. The ice from above having formed a gorge above Mayburg, the trains were compelled to spend the night above the gorge, as it was so dark they could not see to work their way through, but all arrived in town by noon the next day. We are glad to see our friend Sylvester Bennett in our little town again.
