What Is a Mule?

A queer customs ruling relates to that noble animal, the mule. An 6 31 American contractor took some mules into Mexico for use upon some con struction work there, and upon the completion of the contract brought the mules back to Texas. The customs officials insisted upon his paying duty, but the contractor claimed free entry for the mules as "articles of American growth returned without being advanced in value." The offi cials declared, however, that the board of appraisers has sustained them that mules are not "articles." What then, are they? If they are persons they are certainly entitled to come back home. Since the decision that a hen is not a bird, the customs service has got its natural history fearfully and wonderfully mixed.

Get Close to Nature.

Says a philosopher: "Observe nature. When you come to a barnyard 4 89 go in and see the pigs and fowls and the cows. Climb a fence now and then and go into the fields and look 19 70 at the crops or the cattle. I know of no place where there is more philos-12 00 ophy than in a barnyard. You can learn much from animals. Within 9 08 their circle they know much more 2 18 than we do."

Good Hint. Those who keep up a regular correspondence with several friends will 3 02 find it a good plan to keep envelopes addressed to each of them in some convenient place, and into these to slip newspaper cuttings and notes of 9 20 things which will interest each particular correspondent. When the time comes to write the letter it will be 7 38 comes to write the letter it will be 5 53 found that the task is practically ac-

One Firm Has 9,000 Patterns on Its

Books for Germany Alone. An extraordinary thing about the cutlery trade is the variety of knives made. At the Suffolk works in Sheffield, for instance, they have 10,000 different patterns on the books. They make sometimes 3,000 patterns to or-

der at one time. The same thing is true of the large cutlery works at Soungen, in Germany. One firm has 9,000 patterns for Germany alone. New ones are constant-

ly coming out, The Suffolk works have averaged ten new patterns a week for two years. This is a trade that will not be standardized, which is one reason why America has failed hitherto to

compete. -- Cassier's Magazine.

Antelope Increasing in Idaho. T. P. Palmer, assistant chief of the United States Biological Survey, has written to State Game Warden Ben Gray asking for estimates as to the amount of antelope and moose in this State. The antelope are on the increase, according to information which has been received at the office of the Game Warden, particularly in the Mackay district, where they have recently been seen in large numbers.

Despite the protection on moose they are still extremely scarce in this State and are to be found only in the few isolated valleys of Idaho which have not been taken up by ranchmen and where they are being protected by the farmers in the hills near by.

The antelope are increasing fast in the State under the protection which is afforded, and it is said they have fared extremely well for the last few years with the wolves and other beasts of prev.-Idaho Statesman,

Girls Run the Elevator.

M#waukee boasts of something new girl elevator operators, duly licensed by the municipal inspector and certified to be competent not only to run lifts but to make ordinary repairs on them.

There are two of them and trey have solved a problem for the Young Women's Christian Association manegers, who stacked up against a combination of a building with elevators and a rule against men employees. As "the head of man" was not allowed "to set foot' in the Young Women's Christian Association, the officials had the two young women take a course in elevator running and repairing, and now everything is lovely .-

Quick Painting. In the sidewalk over the extension of the subway station at Lenox avenue and 125th street there is a ventilating grating composed of removable sections, each maybe three feet long by a foot and a half or so wide. To paint this grating in place with a brur's would be slow work. The way they actually do it is to lift out a section at a time and lay it in a shallow pan filled with paint. Thus the section is painted all at once and top and bottom in next to no time, and then it is laid in another shallow empty pan to drip.-New York Sun.

The Important Question

The new fireman was telling his wife about the fire. "It broke out at midnight in the Von Biffers' house on the avenue," he sald, "and just as we got there Miss Von Biffer came stumbling out of the flames and smoke, carrying her little niec- all wrappel up in her arms. It

was the bravest act I ever saw." "Who was she wearing?" inquired the fireman's wife,-Cleveland Plain

An Old Delaware Church. Old Swedes Church was the scene of impressive exercises at the morning service, when the 212th anniversary of the historic old building and burying grounds was celebrated,

This wonderful structure is just as stable as it was more than two centuries ago, when the wives of the Swedes who built the church carried the mortar to their husbands and sons engaged in its erection.-Wilmington News.

Daniel and the Lions. The Rev. Charles H. Spurgeon was fond of ... joke and his keen wit was, moreover, based on sterling common sense. One day he remarked to one of his sons:

the lions didn't eat Daniel?" "No. sir. Why was it?" "Because the most of him was backbone and the rest was grit."-Youth's Companion.

Wastage Through Circulation on Brit-

ish Gold and Silver Coins. It is the duty of each loyal subject not merely to refuse gold coin that is

under a certain weight but to break

"Every person," the act reads, who shall by himself or others, cut. break or deface such coin tendered to him in payment and the person tendering the same shall bear the

But in spite of this act it is a risky business interfering with coins which you may suspect to be under weight or spurious. Some months ago a Grimsby woman offered a half sovereign in payment of goods to a local shopkeeper. The latter put the coin in a testing machine, and as it

broke in two refused to take it. The coin, however, was pronounced by experts to be perfectly genuine, and when the case was taken into a court of law the shopkeeper was ordered to refund ten shillings to the

Money, both gold and silver, wears out at a startling rate. It is reckoned that there is usually a hundred million pounds in gold coin in England, a very large proportion of which is locked in the strong rooms of banks. Yet of that which is in active circulation the wastage is so great that during every twelve months seventy thousand pounds' worth of gold and silver are rubbed off into fine dust .--Pearson's Weekly

Foretold in a Dream. A fatal accident that was foretold in a dream was described in an inquest at Old Hill, near Birmingham, on the body of a miner named Benjamin Westwood, who was killed at the Fly Colliery.

His brother William said that one night he had a dream, and in it he saw his brother killed. He added: "I did not go to work the next morning, for my dream made me so ill that I was unable to leave my bed, and have been unable to do any work since.

"In my dream I saw a considerable quantity of coal fall from the roof on to my brother, knock him down and kill him, and from what those who witnessed the accident have told me, my dream was fulfilled. I did not go to my brother's house to warn him, as I was too ill to leave home."-London Chronicle.

Mistook Snake for Whip.

George Deady, a farm hand living in Wilsonville, had a hot time recently end he fainted dead away from fright Deady picked up what he thought was the tip of a horse whip in the grass beside the road, only to find that the orse whin was alive. It proved to he a black snake. It wound around Dency's arm a d poked its head in

Deady's face and grinned at him. Deady let out a yell that could be heard all over Wilsonville and ranto Henry Pearl and implored him to pull the snake off his arm. Pearl resed to meddle, saying he was no nake charmer, hereupon Deady dinted in the road, Pearl says the uske then uncolled and wiggled off nto the bushes. It was about five est tang.-Hartford Courant,

Perci. and Shad Hatching. The work of fish batching by the overnment at the fish hatching staon located at the mouth of the Susmehanna River, off the shores of his vincinity, has been more succesaful this season than for some

years past. Up to this time there have been 100,000,000 of yellow perch fry hatched out and 640,000,000 white perch, which have nearly all been distributed in Maryland. There have been about 10,000,0000 shad fry hatched and distributed, which is largely in excess of last year's work.-Elkton correspondence Caltinore American.

An Ohio Crow Hunt

The annual crow hunt was started several years ago by business men in Medina who loved to roam the woods. They choose sides and elect their captains each year.

The side having the least number

of birds must give a banquet to the winner. It is supposed to be an honest hunt, but each year brings out crows that have been bought and placed in cold storage.

In the count to be made hawks figure 20, crows count 10 and woodchucks 5. Wadsworth correspondence Cleveland Platndealer.

A New Trout Story.

While John Hamilton was sawing a log in his mill at Montela, Sullivan county, he opened up a hollow log from which flopped a trout 27 1/2 inches long and weighlag seven pounds. The hole in the end of the log lying in the pend bad evidently been its home, and when that was pulled from the water the trout evidently swam the wrong way and became wedged in the cavity.-Fair-

A prominent actor is credited with this bit of wit and wisdom relating to his art:
