President—Hon. William H. Taft, of Ohio. Vice President—Hon. J. S. Sherman, of New York. State Treasurer—Hon. R. K. Young, of Tioga County. Auditor General—Hon. A. W. Powell, of Allegheny County.

LOUISIANA'S legislature has just approved the income tax constitutional amendment, and the three-fourths of states required to pass it is now nearly made up that final approval is apparently in sight.

If Woodrow Wilson could have knocked Bryan into a cocked hat last year where would Woodrow be this year? It is the wisest man who can make the worst blunders, from which nothing but luck can save them.

TACKLING shady legislation on appropriation bills in order to embarrass the president is one of the tricks of the present House. It then blames the veto for the break in paying current bills of the government. A House that stoops to such unbecoming to play politics against the welfare of the country every time.

Dam Charter is Held Up.

Thomas M. Jones, Harrisburg correspondent of the Oil City Derrick, sends that paper the following special dispatch under date of June 28, which is good news for the people of this section of the state:

"The good people living along Tionesta creek and the streams to which it is tributary may rest in peace during the year 1912, so far as having cause to fear the construction of a dam in the creek is concerned. That dam will not be built this year; in fact there will be no company chartered to secure water power by damming of the creek. The State Water Supply Commission, as has already been pointed in the Derrick, has decided to hold under advisement the application of the Forest Hydro-Electric Co. for a charter, through which charter it proposes to dam the Tionesta, pipe its water to the Clarion, and shut off the supply that finds its way into the Allegheny past Oil City. Now, holding a matter under advisement generally means that it can be taken up at any time, but the commission has done better than that. It was told the Derrick correspondent today that the charter for the new company will be held under advisement until the next Legislature can have an opportunity to consider legislation suggested by the commission to regulate the construction of dams and defining definitely the powers and duties of such corporations. That in short, means that the Forest Hydro-Electric water snake will not be heard of again until the year is out, at least, for the Legislature will not meet until next January, and by that time there will be other legislation that will curb the grasping propensities of these fresh-water pirates, who have no regard for life or health. The snake has been scotched for a time."

Commenting upon the foregoing the Derrick says: No action will be taken on the application for a charter for the water privileges of Tionesta creek until the Legislature can pass upon certain legislation to be presented to that body by the Water Supply Commission. This news from Harrisburg will be read with pleasure by the people of this section, and it will bring a feeling of relief to the whole community.

When it was known that the matter had been taken under advisement there was a general feeling of apprehension that the application might be granted, even in the face of the protests from our citizens. That it was not flatly refused was a surprise. That any State commission, having power over the rights of its citizens, should for a moment take into consideration the advisability of endangering the lives and property of a large community was a strange thing. That it should not have acted quickly was perplexing, and that it should take the matter under advisement for further consideration caused anxiety. It appears from the news received that the proposition is to come before the Legislature in some shape, and no action will be taken by the Commission until after that body meets next January.

The fourth of July celebration in our town was a great success and much credit is due the Carndon Band, which did very well in furnishing music for us. The picnic was well attended, as were also the races in the evening, which were the feature of the day. Taken all in all, Cherry Grove is a pretty good place to be on a fourth of July. O. E. Rupert and sons attended the celebration at Mayburg and report the day a very pleasant one. The parade was very good and the ideas represented were pleasing to the extreme. The music furnished by the Kelleitville band was very good and showed clearly the ability of the players of this organization. The day passed off without any trouble of any kind until the ball game was called, then it had to rain as usual, but Kelleitville got enough time to put the cat onto the Mayburg team to the tune of several scores to nothing. In the evening the pyrotechnic display was indeed grand, but when a spark set the rockets flying every way there was some excitement for the time being. Edward Hurch, who was on police duty, was hit by a rocket while on the railroad and at first it was thought his injuries were of a serious nature, but after a close examination by Dr. Serrill it was found that the injuries were not of a serious nature, although it will cause Mr. Hurch to lose a week or so.

Keep Cool.

Karl de Schweinitz, secretary Pennsylvania society for the prevention of tuberculosis, offers these timely suggestions on the prevalent hot spell:

These are the days of sunstrokes. Everybody is complaining of the heat. One way to avoid discomfort in summer is not to think or talk about the hot weather.

Give up the habit of looking at the thermometer. Don't fume and fuss about things. The man who keeps cool mentally nine times out of ten keeps cool physically too. Wear loose fitting clothes. If you are a man have the courage to go without a coat wherever and whenever possible.

Eat about half as much as you do in winter. Vegetables, salads, fruit, soup and ice cream are to be preferred to heavy foods. Don't touch beer or alcoholic drinks. They are frequently the cause of sunstrokes. Drink water, butter milk, lemonade and other fruit beverages.

Don't overdo anything—either eating, exercise or worry. If you suffer from sunstroke it will be your own fault. Be temperate in everything and you won't mind the heat.
