Republican Ticket.

President—Hon. William H. Taft, of Ohio. Vice President—Hon. J. S. Sherman, of New York. State Treasurer—Hon. R. K. Young, of Tioga County. Auditor General—Hon. A. W. Powell, of Allegheny County.

THE most noteworthy indication that President Taft is gaining ground daily is the declaration of Governor Hadley of Missouri, in a speech on Thursday, that he would support the President for re-election and asked all his friends to join him.

In his testimony before the Senate Investigating Committee on Tuesday William Flinn, of Pittsburgh, admitted under oath that he had written the agreement whereby the late Senator Quay, J. O. Brown and himself were to form a political copartnership for the exploitation of the State, but said the purpose was to "goldbrick" Senator Quay. If Mr. Flinn is a goldbrick artist, why is it not more probable that he is now making a strenuous effort to goldbrick the Republican party?—Punxsutawney Spirit.

P. M. SPEER is a self-made man. A farmer's son, his early years were spent on the farm. He attended the country school. When far enough along he taught school, earning money to go through college. He then fitted himself for the bar. As an attorney he was and is second to none in this section of the country. He served as city solicitor for Oil City, district attorney for Venango county, as member of the legislature and is our present member of congress. He has worked hard all his life and richly deserves re-election.—Blizzard.

SENATOR DIXON, Roosevelt's campaign manager, admits to having received approximately \$90,000 not included in the accounts of the national treasurer of the Roosevelt organization. The principal part of this amount was received from George W. Perkins, president of the Harvester Trust, Dan R. Hanna, of the Western Railroad combination, and Frank A. Mausey, Steel Trust magnate and magazine publisher. William Flinn of Pittsburgh, another "angel of reform," admitted under oath that he contributed \$144,000 to the slush fund in the interest of "pure politics," but denied that he had offered a paltry one or two million to be appointed United States Senator from Pennsylvania.

A VOTE for P. M. Speer is a vote to reelect to Congress the best man, by all odds, that is before the people of the 28th district today. He has fulfilled every promise made to the people two years ago, and has championed every cause that would be for the betterment of the laboring man and the common people. No corporate interests have any string on him and none ever will have. He is to be trusted to the very limit and he will be found true to every trust the people may repose in him. Loyal to his constituents and working for their greatest good has been the history of the man. There is no spread-eagle about Speer, and yet he is by far the brainiest candidate in the field. The whole district knows this, and as to his return to Congress by a most decisive majority, there should be not a question of doubt.

THE Bull Moose page in the Eminton News, which is marked "adv.," says that all the newspapers in the district, with the exception of the Eminton News and the Sharon Telegraph, "are under the control of the dirty corporation bosses." By some this statement might be taken seriously, but to those who know it will only occasion a broad smile. With the exception of the two papers named, we do not know of another in the district that demands a cash price from the candidates it supports. We are not complaining if these two papers grant all they can from the rotten game of politics; that is their privilege. But when the Bull Moose "editor" of the Eminton paper comes to placing the newspapers with a conscience in a false position the animus is apparent. While we don't have any acquaintance with any of this so-called "dirty bunch of corporation bosses," whoever they are, we are pleased to say that this paper has never been included in the class that is controlled only by the "long green." The Eminton paper as the politicians well know, always has its hand out, while the one in Sharon was on the job so hard in the Republican Congressional primary campaign of two years ago that it levied an advertising "assessment" of over \$4,000 on the two candidates.—Franklin News.

—The man who compiles election statistics at last has done something useful. He has devised a get-rich-quick scheme which seems to be devoid of blow holes and other flaws. This is the way it goes: Line up a Wilson man and bet him \$5 that his candidate will be defeated. Then get a Taft enthusiast in the same way and complete the process by making a bet with a Bull Moose supporter. Of course you will lose one of those bets, but you are sure to win two of them in the end. The only risk is the possibility that the election will be thrown into the House of Representatives and your \$15 investment will be hung up for a time. Of course, if everybody tries to do it there will be trouble. It takes three suckers and another fellow to work the trick, and the male trouble is to get the suckers.

Further Condemnation of The Dams.

The Oil City Blizzard of Friday contained the following: A correspondent, whose communication is valued by us, writes as follows, in regard to the proposed Tionesta dam: "Do not the people of this valley realize the menace that is hovering over them? Are they going to stand meekly by and permit a lot of grafters and moneyed sharks to sneak in and rob them of their property and lives? A dam such as they intend to erect is certain to give way in time, and it would not leave a dry spot big enough to stand on this side of Cincinnati. The moment it is erected property in this valley would depreciate 50 per cent. The Johnstown and Austin dams ought to be sufficient warnings. The rock foundation in this state is not suited to dams, and even if it were, we do not want them. We have been progressing, slowly but surely, and it would be an outrage to see the work of years crumble into nothingness." The words of wisdom quoted above are none too strong. They are well considered and worthy the thoughtful attention of every man and woman in this valley. We must agitate and create interest on the part of the busy people, who are engaged in their various labors and do not ordinarily give public matters much attention. Such good people often take it for granted that others are able to keep watchmen on the towers who will note the movements of the world at large and of our small section of it. But too much faith is almost as bad as distrust. This matter of the condemnation of property, with all the difficulties and dangers involved, is not to be thought about after everything else is settled to our satisfaction. It is Dickens who said that "when the devil went about as a roaring lion he was not greatly to be feared." It is when he takes those trips of his, up and down the earth, that is dangerous to the sons of men. The very quiet in which this movement was conceived, the already large amount of time and money that have been put upon it show how deadly evil the whole scheme is. It cannot be possible that people will sit down and allow themselves to be defrauded. Up guards, and at 'em.

Kelleitville. F. Robbins moved his family from factory row into the boarding house above the factory, lately vacated by Donehue. The W. C. T. U. had a farewell meeting for Mrs. W. E. Frampton at the home of Mrs. A. H. Downing, Wednesday afternoon. Mrs. Wm. Watson and Mrs. John Peterson assisted the hostess with the fine luncheon which was served at the close of the meeting. Mr. and Mrs. Wm. Johnson, Mrs. J. Cousins and Miss Tillie were Warren shoppers Saturday. Misses Anna and Elizabeth Allaire spent Sunday with their parents. Miss Nellie Martink of Warren spent Sunday with her mother. Ed. Plattner was in Sheffield Saturday. Miss Mildred Plattner of Pine Camp has been attending school here and driving to and from her home, Wednesday evening Miss Cousins accompanied her home and on returning to school Thursday morning the horse became frightened at a sign board at the railroad crossing. Both occupants of the buggy were thrown out and were badly bruised but not seriously hurt. Miss Plattner is boarding with Mrs. Lawson now, so there is no need to drive the lonely road every day.

REMEMBER 1893-6. Now Prosperity Changed to Panic When Democrats Elected a President. In January, 1892, this country was prosperous, and all conditions indicated continuance of prosperity. In November of that year a Democratic president was elected. In 1893 the Democratic congress, convened in extraordinary session, began its anti-protection activities. After a time it enacted the Wilson low tariff law. In the early summer of that year came the panic. In the period from May 1 to July 23, 301 banks, with a total capital of \$38,000,000, suspended. The total number of banks suspended in that year was 585. In 1892 the total amount of liabilities on account of business failure was \$114,000,000. In 1893 the total was \$248,000,000. In the year 1893 railroad properties whose aggregate value was \$1,200,000,000 were in the hands of receivers. Between May 4 and Oct. 3 \$378,000,000 was withdrawn from national banks. In this state alone withdrawals of deposits from savings banks were \$34,000,000 in excess of deposits made. In the period from Jan. 1, 1892, to Jan. 1, 1893, there was a shrinkage of \$1,400,000,000 in the total value of farm products and live stock in the United States. In that period prices were lower, but hundreds of thousands were wageless and other multitudes worked at low wages and on short time. They had little money or none with which to buy the most ordinary necessities of life in adequate quantity. Now, after twenty years, the Democratic party is again asking the electorate of the United States to put it in control of national affairs in order that the performances of its last period of control and their disastrous consequences may be repeated. The Republican party, under whose administration during sixteen years the country has become newly prosperous and more prosperous than ever it was before, pledges itself to maintenance of the policies which restored and promoted prosperity. There is a paramount issue. What intelligent American can hesitate to make his choice?—Albany Journal.

Turkeys in Hawaii. In the mountainous districts of Hawaii wild turkeys are very numerous, and form an important resource for the wandering camper. They are, of course, imported American turkeys gone wild. Some of the stockmen liberated domestic turkeys, and they promptly took to a bold life and are thriving excellently, their only foe apparently being the mongoose, which ultimately will prove their undoing. This simply shows how readily domestic stock adapts to wild life when given an opportunity.

Flood Walls for Pittsburg.

And now the Pittsburg Flood Commission is strenuously advocating the erection of Flood Walls for that city to protect itself from damaging floods. Its engineers claim these walls will effectually avert disaster along the Wharves and will be the only effective remedy in case of overflowing rivers. However this may be, no man of sound sense longer contends that reservoirs or dams on the headwaters and tributaries of rivers will avert floods farther down the stream. Only theorists and wild visionaries hold to such sham conservation foolishness. Sensible people rightfully can see that schemes of that character would only bring on greater disaster in flood times, and that property losses would pale into insignificance alongside the terrible destruction to human life. Of course such wild ideas look good to the water power grabbers who would expect to use these reservoirs for the development of power and the generating of electricity. Why wouldn't they advocate the scheme that would bring more gold to their already over-loaded coffers, even at the expense of the sure destruction sooner or later of thousands of human lives and depreciation of millions of dollars worth of property.
