Should Strive to Shelter Industry From Destructive Competition From Foreigners and Encourage Upbuilding of New Industries

The most imperious obligation upon any nation is to find for its people amployment at productive industry. The fact that two-thirds of the land in Ireland lies fallow, that one man in thirty in the British islands is a pauper, that millions of people have fled from those shores, and that England can produce but three months' supply of food for a population that ought to be able to feed itself, is the incontrovertible proof that her economic system is Wrong.

Man at work is the most valuable asset of a nation. An idle man, consuming without producing, burns the candle at both ends, and is worse than worthless.

Individuals cannot provide conditions under which productive industry may be successfully conducted. The law-maker must create the conditions, The development and maintenance of industry being vital, the duty of the law-maker is to shelter industry from destructive competition from foreigners and to encourage and stimulate the upbuilding of new industries.

To permit hostile fleets to batter down our cities would be less foolhardy than to suffer Europeans to de stroy the processes by which our people earn their bread and enrich the nation, while they urge it toward independence.

rapidly.

trader.

spite of or not."

Philadelphia Press:

The Times goes on to refute the

free trade assumption that our work-

ingmen are prosperous not because of

protection, but "in spite of it." It says

A Fence Around the Garden.

The protective tariff is in the nature of a fence around the garden, to protect the worker and his product from marauders.

As the population expands and old industries grow fast, new industries must be encouraged so as to draw off redundant labor into fresh channels. Thus in 1890 we imported all the tin plate, of which we are the largest users in the world. Twice Great Britain throttled un-protected American ventures in tin plate manufacture. In the McKinley tariff we put a protective duty on tin plate. In 1891 we made at home 2,000,000 pounds. In 1905 we made 1,000,000,000 pounds. In 1891 the British maker, having a monopoly, charged Americans \$5,34 for a 108-pound box of coke Bessemer tin plate. In September, 1904, the American mills sold the same article for \$3.30 a box.

Who Pays the Duty?

What has that duty cost the Amer ican consumer? Nothing! He has saved millions of dollars under the protective duty, made employment for 40,000 American workmen, and a home market has been provided for large quantities of American material.

The history of the beet sugar industry runs along the same li o doe

Times last year discussed the matter Undermining of the Tariff Will Pro editorially on the basis of figures col lected by the British Board of Trade: "The workman in America enjoya an enormous advantage over his fel low in England-an advantage fat

greater than the latter enjoys over All through this year mills in this the German or Frenchman. He earns country in nearly if not quite every more than two and a guarter times as line of manufacture have been so much money, and works shorter hours for it, so that his hourly rate of earn been much behind with their orders. inge is as 240 to 100, or pretty nearly Of what use to worry about foreign twice and a half as much. Against

trade when you cannot make all the that enormous difference in wages goods that are wanted at home? No there is something to be set in the sane man regards with indifference way of expenditures. Rent is twice export business for the country at as high and food is about one-third large; but if a Massachusetts man higher than in England, but the cos can sell in New York more fabrics of living altogether is only as 152 to than he can make what impulse can 100, or about half as much again. The he have to seek for customers in Lonmargin is clearly large, making pos don or Paris or Calcutta? sible a command of the necessaries

man of the Country.

And why should he be expected to and conveniences and minor luxurle make sacrifices to get that trade? How of life that is both nominally and can you expect him to agree that the really greater than that enjoyed by tariff behind which he finds an insathe corresponding class in this coun tiable market for goods, a market having actually riotous prosperity shall

The Times adds that "the advantage be cut and amended and patched and enjoyed by this country in regard to cobbled so that there shall be a betthe cost of food is even less than i ter chance to push American goods looks. A workman living on the across the seas?

money for such purposes:

that of the pearl button business. For centuries worthless shellfish have grown and perished in the mud of the rivers of the Mississippi valley while we bought pearl buttons by hundreds of tons from Europe. We put a protec tive duty on pearl buttons, and lo! the valueless mussels in the slime became sources of wealth, and now we beat the world on buttons, employ large numbers of American folk in the man ufacture and add to the nation's wealth.

A competent tariff means no will fully idle men. A tariff with cracks in it, a half-tariff, a tariff with no mar gin for fluctuating prices and chang ing conditions, must mean Americans out of work because Europeans do the work that should be done at home. Fortunately the nation adheres ton

aciously to the right system. CHARLES HEBER CLARK.

In Saturday Evening Post.

Opposed to Protection.

Mr. Wilson has proudly boasted that he is a Democrat, both by inheritance and conviction. That means that he is unalterably opposed to the system of protection to American industries as devised and maintained by the Republican party.

Professor Wilson taught the theory of free trade to his classes in political economy at Princeton university; he has embodied his views in print and has denounced protection from the lecture platform and the political stump.

Mr. Taft, on the other hand, has always been a consistent supporter of the principle of protection and the determined opponent of the doctrine of free trade. The issue between the two clearly joined.

The question is, Shall the American people, favored as they have been by protection, prosperous as they are by reason of the benefits of a protective tariff, abandon all these benefits and risk a return to the soup houses of the Cleveland administration, by supporting a candidate who, however he may shine as a pedagogue and an executive, is pledged to war against the protective policy, to the injury of the manufacturing interests of this state. That is the issue on which the battle must be fought in this nation; the issue on which by an appeal to the intelligent voters of this nation.

The Wilson Fall Frost.

The free trade Evening Post publish es a lot of figures to show what would happen if all the states voted the same as Vermont in November.

A two-and-three-makes five school boy could tell the free trade Evening Post that if all the states should vote in November the same way Vermont has voted Taft would have the whole electoral college

It came early, but it came with a bite to it-the Wilson fall frost. Bryan and Parker were both elected in Angust and buried under a snowstorm of ballots in November, and Wilson is burrying to the same snow pile.
