Watten for the Bradford Porter.] 18478 on Geology.—No 13. GOLOGY APPLIED TO AGRICULTURE.

In formation and composition of That the difference in soils in daptation to agriculture, depends the different qualities, is acknowldby every farmer. I propose in reform to show, that all our soils are he ruins of pre-existing rocks; that rpossess qualities dependent on the possess of those rocks; and that powledge of the composition of inous sential to the agriculturalist. the explanations given in preing essays, it will be unnecessary lo state again the manner in which riolence of ancient causes has disand distributed the soils of the but I propose to show some of rays by which milder means are forming the bases of our soils .-of these means the atmosphere that breathe is not the least important. is imperceptible influence the hardwas become corroded and rough, ate constantly yielding a portion of suffice to the surrounding soil. the process is busure. It is this cause that shened the exterior of the granite that has decomposed the edges of every limestone cliff, estroyed the architectural beauty ne of the finest structures of Eu-The products of this destruction form the soils that support our

usts, too, in our cold climate, do to destroy the consistency of ; their action is only mechanical, with every returning winter they penetrate, and thus expose an adal surface to the action of atmos-

flowing of water has a two-fold in the formation of our soils ; for motion grinds and wears every hat obstructs its course, it carries ducts to distant places, and mixher their different substances, rariety to soils, and fruitfulness

hims view of the origin of our will require but little to show qualities depend upon the om which they have been de-Were all the rocks simple boad were the soils obtained from amixed, we could easily detect plates; but such soils would be Enproductive. Kind nature thas not so jordered; for most acks are compound bodies, and nev of water has done much to a their products.

however, in limestone districts, sabound with a large amount of nd are consequently well adapand climate to the growth of Soils in countries, abounding mite and other plutonic rocks. more silex and allumina, are and harsher, and are better fitted growth of grasses.

soils derived from the fossiliferals, are more diversified in their dwing to the variety of this

sometimes impossible to estith accuracy, the effect of present mer causes, combined, and we enfore compelled to submit our pacareful chemical analysis to the its qualities. This is always method of determining the point, ten leads to highly useful results. H. S. & M. C. Mercur, the practical farmer it is easier | Tracy & Moore, space the soil he works with the John F. Mesns & Co. from which it has been derived. Burton Kingsbery, milli slew simple tests is soon led :- has if it is harsh and gritty, scraighes glass by gubbing it upon collins silex in proportion to this | E. S. Clark, It will effervesce or boil by B. B. Smith, Pagratic acid on it, it contains linhas the odor of clay when depon, or moistened, it is argiand forms a wet soil. If it Tha rose color when placed S. W. & D. F. Pomeroy, hot from, it contains magnesia; Adams & Orwin, contains much potash it gives Tic acid the color of lye. Now lests are easy, and can be perir any one. The soils to be Wm. Gibson, should be taken from below L. S. Ellsworth; ce so as not to be mixed with E. & G. Truman, emould. No experiment will of these qualities singly in a of for it is a mixture of many ensures fertility. We may fall of these principles exemthe soils of our own county. soils of our hills are mostly composition to the beds of thich they lie. This is a sandby geologists granwacke, composed of a mixture of allu-Edsilexous earths, with a trace non, and magnesia. The upof our country are consequenta mixture of argilaceous and

imbouchre of all our side hill the soil is of the same characabove reward will be given for the dog and been formed most by the of our native rocks.

hver valleys, we have a mix products of northern rocks hanwacke of our hills. With tention we can find nearly a tall of the rocks of New York riels of our river valley. These a la all cases characteristic of weition of the soil, although and gypsum of the protean Alew York are wanting in having probably been pul-Beir transportation and mix-

ed with the soil so as to be imperceptible to the eye, or carried beyond and deposited in more tranquil waters .-The importance of a knowledge of ge- of general assembly of the commonwealth of ology to the agriculturalist, must be obvious to the most casual observer. With it, he is able to take advantage of nature in all his operations. No variety of soil is suited to the growth of all vegetables alike, and by comparing and combining the qualities of earth, he is able to assist nature in her operations, and read a bountiful harvest, where barrenness and sterility would otherwise to have been. H.

Married,

In Nichols, N. Y., on the 29th ult., by the Rev. S.J. Gibson, LEMURL S. KINGSBERY of Sheshequin, to MISS SARAH OSBURN of the for-

Part and parcel of the above notice was a portion of the good things attendant upon a wedding feast, for which we tender to the couple who have thus ventured

🐧 "On matrimony's fickle sea" our grateful thanks and wish them happiness and prosperity in their new state, and that

"Upon thy neck light hang the chain, For Hymen now hath bound ye, O'er thee and thine may pleasure reign, And smiling friends surround ye."

In this Borough, on the evening of the 3d. inst., by the same, NATHAN B. HARRISON of Albany, to Miss ELLEX C. Ives of Monroeton.

NOTICE

S HEREBY GIVEN that the following classification of Retailers of Foreign Goods and Merchandize has been made by the subscribers, and that the Associate Judges and the Commissioners of Bradford county will meet at the Commissioners office in the Borough of Towards, on Tuesday the 26th day of March next, to hear those who may feel themselves by their expansion the rocks that aggreeved, and are desirous of appealing from
