

The Fate of the "Essex":
It seems from the details of the news brought from New Orleans by the New Brunswick, arrived at New York, that the steamer Mississippi, lost in the line of the fleet while attempting to pass Port Hudson, on the night of the 14th, in going up the river, was struck by three or four shots only, and the damage was comparatively insignificant—but when nearly in the centre of the range of batteries, the smoke and steam from the boilers in advance, and batteries, so enveloped the ship that the pilot lost his bearing and the frigate grounded on the right bank of the river. For forty minutes she was under a terrific fire from the rebel batteries. During this time she fired two hundred and fifty rounds. During all the time she was under fire there was no particular excitement aboard.

After the order to abandon her was given, the boats were lowered, and four wounded men put in first; the crew then filled the boats. Many jumped overboard, expecting to be saved, and a few were supposed to have been drowned. Those who reached the levee were taken off by the Essex, to the number of fifty or sixty. When the crew were all off the ship, Capt. Smith and Lieut. Derby sprinkled tar-pentine in the ward-room setting it on fire. The Captain of the fore-hold fired her forward, and the Captain and Lieutenant pulled for the Essex. The Mississippi was soon in flames, and the fire presently reaching the magazine, the ship was blown up with tremendous explosion. About 25 or 30 were killed, and four wounded, during the action.

Deceased Soldiers.
In return for the courtesy of the rebels in forwarding us lists of Union prisoners who have died while confined in their prisons, our Medical Department has caused a similar list of rebel prisoners, who have died while in our custody, to be prepared with great care and forwarded to Richmond. It embraces about two thousand names, and is believed to be almost absolutely complete. It is not supposed that the list furnished us by the rebels constituted a fifth of the number of our men who have actually died in their hands. The mortality in their prisons is known to have been much greater than ours; and there are large numbers known to have been taken by them who can only now be accounted for on the supposition that they are dead.

Keeping Horses' Legs and Feet in Order.
If I were asked to account for my horses' legs and feet being in better order than those of my neighbor, I should attribute it to the following circumstances:—First, that they are all shod with fine nails, so placed in the shoe as to permit the foot to expand every time they move; second that they all live in boxes instead of stalls, and can move whenever they please, third, that they have two hours' daily walking exercise when they are not at work; and fourth, that I have not a head-stall or rack-chain in my stable. These four circumstances comprehend the whole mystery of keeping horses' legs and feet in sound working condition up to a good old age.—*Miles on the Horse.*

BREAD 1800 YEARS OLD.
An important archaeological discovery has just been made at Pompeii, of a mill with a great quantity of corn in excellent preservation, and an oven with eighty-one loaves, arranged in rows, and but slightly affected by the heat of the lava, having been protected by a quantity of ashes which had covered the iron door fitted to the mouth of the oven. These loaves have all been got out entire. A large iron shovel, for introducing the loaves into the oven, has also been found on the spot, with a remnant of its wooden handle. This is the first discovery of the kind on record. Not far from this place, 55 silver and 561 bronze coins have also been found.

Fleeing from their Friends.
The city of Lexington, Ky., is crowded with refugees from Southern Kentucky. Secessionists not less than loyalists flee to our lines for protection, dreading conscription more than they love the Confederate cause. They uniformly represent that the invaders are seizing all the stock and grain left in the country, and are sending what they do not require for themselves South.—They do not respect the "reserved rights" of their friends any more than the forfeited rights of their enemies. Military necessity is the plea—and the impression is made general.
