,000,000 A Farmer Without Arms.

W. M. Beaucamp, Onondaga county, New Xork, appde to American Agriculturist an interesting account of a farmer he formerly traces who was born without armen lastend of applealing to the chartable for support, he commenced early to help: Silast. His populy was a hen and chickens next sent lamb, and afterward a shaggy colt. He took good care of thest, had received his stock, a little at a time until the became a prosperous farmer. Having no hands he learned to use his toes, which were longer than common. His legs were also very flexible, and by practice he was enabled to readily perform most operations with ease. He pot on and took of his own clothing, shaved and feed himself milked his own cows, and took part in most labors of the farm. He was temer to evil doers, whom he could faith to evil. He was powerfully built to be and shoulders. He would but the head and shoulders. He would but like a ram, or seize an offending urchin with his teeth, and shake him with bulldog tempoles. The steel at the age of aermarried three times DENNISTLA HOUSE

PRICE LIST.

OUR LATEST IMPROVEMENT: Patented September 17th, 1861.

This is an entire new idea, and its want has been noticed by all acquainted with Reed Instruments. The old Swell could hever be made to operate gradually: the instant the petal was touched for opening in the chance would be instantaneous and abrupt.

Our NEW BWELL is constructed on scientific principles, and we are satisfied, by our unstring study and experiments, that it is the only one by which the tone of Reed Instruments may be graduated from a mere whisper to the fall power of the instrument may be graduated from a mere whisper to the fall power of the instrument, that it is the only all that we could desire.

This, in connection with our DIVIDED SWELL [which we patented in 1855,] will be added to all the Mclodeons which we manufacture in 1855, and is now all that we could desire.

One other feature in our Mclodeons is the IMPROVED VALUE OR PALLIET, being a combination of cloth and leather, propared expressly for the purpose. This valve we have used for the past three years, and we find it to be the very thing that has been so long needed as a substitute for the India Rubber Valve, which has been in use ever since Mclodeons have been manufactured, and which has caused so much trouble by the dissolving and sticking of the India Rubber All of our instruments are now finished with this improved yalve, and we can recommend them with confidence.

Persons unacquainted with the Medocen and its history, will bear in mind that we are the plousers and leading manufacturers, not only in the United States, but is the world. We commenced the manufacture of Mclodeons in the fall of the year 1847, and since that time have finished and sold

TWEMITY SEVEN THOUSAMD

TWENTY SEVEN THOUSAND ! These instruments are now in see needly in the United States and Canada, but also in Europe, Asia, Asia, Asia. South America, and the West Indies, and from all these quasars we have the most failuring testimonials of the high estimation in which they are held. At all indistrial Exhibitions they have invariably been

AWARDED THE HIGHEST PREMIUM!

whenever exhibited in competition with others. We shall take pleasure in forwarding by heaft lat one own expensed our Historiated Cat-slopes, in which every instrument we manufacture is fully described and Historiated by olegant engravings.

If All Mejodeous of our manufacture, either sold by us of dealers in lawy actual Challed Justille Historia Cransia, are warranted to be perfect in every respect, and should any repairs be necessary before the expiration of five years from the date of ask, we bold ourselves ready and willing to make the same free of charge, provided the injury is not caused by sogident or design.

HOW OUR MANUFACTORY IS CONDUCTED. As we are the pioneers and leading manufacturers of Melodeous in the world, we have, of course, the advantage of securing the service of the best mechanics in the business, and very many of our workings have been with us since we commenced the manufacture of Melodeous. We employ none but the most thorough succhanics, and have never had an apprentice in the establishment.

Our work is divided into thirty-time different branches; each work-man has his own part to perform, and is never allowed to change facus one branch to another.

The different parts are seperately inspected, and passed from one to smother to add to other parts, until the Melodeou is complete.

The different parts are seperately inspected, and passed from one to smother to add to other parts, until the Melodeou is complete.

The different parts are seperately inspected, and passed from one to foreman and inspector of tuning; front, a foreman of machine; third a foreman and inspector of tuning; front, a foreman in the varmisalised department; fifth, a superintendent of the reset department.; In the duties of the foreman are onesons, it being his duty to select any give out stock, to carefully watch the making of the different parts, keep the departments we wouly belanced, and, in fact, to have an eye to everything, and keep everything straight.

We have mentioned the others to show that the utmost care is taken in every department.

We have membed the others to show that the utmost care is taken in every department.

OUR REED DEPARTMENT—Nuch of the good quality of the Melodapp depends on having passed, Sagds. It is necessary to have the most perfect machinary to tak, hurn, stamp, plans, de., D., as well as to use the utmost care in selecting metals, and using prop. Tpapportions for the courtposition of read metal.

The superintendent of this department has been with us since commencement of this business, and, being a practical worknown, has originated, improved and perfected all the machinery for making our reeds, and there are no difficulties in any other manufactory.

From the fact that our reeds are celebrated for their sufformity, evenues and succeives of four, we very often weeds evident for them, or additional from manufactories to supply them with what they expend to the second second of the court of our lustrement separate, we show a second secon

HOWARD ASSOCIATION,

Pittshurg.

W E would respectfully direct the attention of citizens of Waynesburg and vicinity to the vast and universally admitted superiority of the Pianos made by STEINWAY & SONS, New York.

The tone of these instruments more nearly resembles the "human voice" in the prolonged and singing qualities of their sound; and they combine in a wonderful degree POWER and SWEETINESS. Both for brilliant instrumental performance, and as an accompaniant instrumental performance, and as an accompaniant

We Challenge Comparison, and we Wasrant them superior in every respect to anything else
in the shape of a Piano Forte
