DEATH OF LORD LYNDHURST. The last steamer from Europe brings inteligence of the death of

John Singleton Copley, Lord Lynd. hurst, the distinguished jurist and statesman. A son of the famous self-educated artist Copley, he was born in Boston, Mass., in 1772, and in his third year moved to England. He was educated at Trinity College. Cambridge, and received the highest honors of the University .--Soon after he revisited America, returning to England in 1798, to prepare for the practice of the law, which he commenced in 1804, and slowly but surely toiled his way up to eminence in his profession, leaving his name upon the records of several of the most important state

His success was from this time continuous, and he successively fill-State, being solicitor general, attorney general, master of the rolls, and finally, in 1827, chancellor, under the title of Baron Lyndhurst. Originally a liberal, he entered Parliamont in 1818 a tory, but afterward accepted inet of Canning, and retained it like the dawning of a spring morn through three administrations, in ing. the last favoring the Catholic emancipatien scheme, which he bad opposed two years before.

Under the administration of Earl Grey he was appointed lord chief baron of the exchequer, and on the nomination of the Peel cabinet of 1834, was restored to the chancellorship, but resigned soon after, and became an active leader of the oppo-

By his first wife, the widow of Lieutenant Colonel Charles Thomas, he had three children, and three years after her death he married at the age of sixty-five a young Jewess beauty, Miss Goldsmith, and by her he had a daughter. His power as a speaker was very great, and his opinions carried the greatest weight. A writer in the Atlantic Monthly. who saw him in Parliament in 1855, says: "It was singular and somewhat touching to mark the deterence paid by the peers to him, as he spoke upon that cceasion."

PLANTING APPLE OROHARDS.

in our apple orchards are planted simply an unmitigated nuisance, and in its labors." too distantly apart. Many farmers should be frowned upon by all sinlook upon the space usually occu- cere lovers of social peace and hapthe trees, and we cannot cultivate nearest body of water, and become down his head as though ashamed to the orghards as we should like, from food for respectable fishes. In Scotland the harvest will only be a full however, will not only do no damage average one; in Ireland, perhaps at to the apple tress, but the contrary, best only an average, but on the whole we could never say with more form temperature-protecting the literal truth, "Thou crownest the roots in summer agains' heat and year with Thy goodness, and thy

The Lordon News says: 'Owing to the large increase in the yield, the harvest is estimated to be worth £20,000,000 to £30,000,000 more than that of last year, and there will consequently be no necessity for the importation of large supples of breadstuffs from abroad.

KEEPING GRAPES.

We are in the habit of keeping grapes for common use during the winter in the following manner:-Cut the bunches carefully off the

not freeze, and they may be kept There he stands at the case and good till spring.

Dr. Moore, the metaphysician, thus speaks of the effect of light on body and mind:-"A tadpole confined in "It is a great thing to mind one's darkness would never become a trog; and an infant being deprived of heaven's free light will only grow the direct sunshine never reaches, the hideous prevalence of idiocy startles the traveller. It is a strange, melancholy idiocy.

Many citizens are incapable of any articulate speech; some are deaf, some are blind, some labor under all these privations, and are all misshapen in almost every part of

EFFECTS OF ONE GLASS.

On passing through one of the him a tract, he said, "I knew your voice as soon as I heard you, sir: I have heard you before to-day, sir."

After a few words of explanation, I found that we had been at one time members of the same congregation, and sat under the same faithful ministery I anxiously inquired how it was that he had fallen so low as to become an inmate of a prison. "A glass of ale, sir, was my ruin,"

"How could that be?" I asked. sir, very intemperate, but was happily led to give up drinking entirely, although I did not sign any pledge, which I now lament. I became a regular attendant at a place of worship, and joined the congregation .-I went on very happily for some turning from ---, when I met with touched that ONE GLASS!"-Band of Hope Review.

BIG LIFTING.

Dr. George Winship, the strong man of Boston, now raises daily the extraordinary weight of two thousand six hundred pounds. The weight he raises upon a platform suspended from his shoulders by means of a shoulder bar and a quantity of leather straps. The Doctor thinks he shall continue his experiments until he can raise 3,000 pounds. This, he believes, is the practical limit for one of his organization and constitution. He was not originally of a robust fra. 1 e, and was a week and sickly youth when he first began his lifting experiments. He is a small man now, not weighing quite 140 pounds. He is of opinion that men superior to him in point of physical endowment may be trained to raise far greater weights.

poverty soon overtakes her.

"FATHER WALDO." A writer in the New York Observer gives the following account of

this most venerable patriarch: "While at the Synod I learned that Father Waldo was in the city, and that it was his birthday-one hundred and one years old I could not resist the desire to see this won-derful "old man." Calling with a and decrepid age, a slow and feeble step, a trembling voice, and a dim eye. None of that at all. At once, an elastic step descended from the chamber, and a form straight as an arrow was before us-a well-formed, fresh and vigorous man, we should have said, of about sixty: cheerful, loquacious, ready-witted, fucctious, full of anecdote and recollections of men and events of our earliest youth: an astonishing memory. He said: "I have just come from Oswego,

where I have been to help organize a new association, and I have written to Dr. Sprague that I could ride five hundred miles further. I will show you my letter." At once, with a firm step, this centenarian and more went to his chamber and back again as quick as a youth, and read us his epistle. It was well written and peculiar.

We inquired into the habits of our venerable father and of his family. He had always enjoyed good health and great equanimity of mind. He said: "When I was a boy I quarreled with my breakfast, and my father took me to the shed and gave me an appetite in a moment, and I have had no trouble with a stub-born will since. I hardly know what anger is." He added: "I have known little domestic comfort. My wite was deranged forty years, and my son died in the Insane Asylum.' I said to him: "Do you know how he died?" "No," he replied. I gave him a detailed account of the sad end of his promising son, his escape from the Asylun, and entanglement in the salt marshes of Cambridge, and the cold he there contracted, which ended in death. All this, with the last weeks of his raving at Andover were new to the father, and he, with wonderful vivacity, said: "How did you know all this?" I was in the Seminary with this lovely young man, and among the mourners of his early and sad disso-"Sixty-four." Ah, you are only a boy." With such a specimen of graceful age, vigor of years, and promise of usefulness for time to come, we concluded to be young; work on, and pray for life and vigor in the cause of our Saviour. From this scene, we would say: Or all things, study to maintain vigor of health, equanimity of temper, cheer-

ADVICE RESPECTING THE EYE-SIGHT.

Too strong a light in a sleeping

room is bad; especially if the bed is opposite the window; for to wake suddenly out of sleep, with a strong glaring light on the eyes, cannot but eventually injure the strongest and most healthy sight; and where it is naturally weak, or there be any hereditary disposition towards a debility in the organs, this custom "I was at one period of my life, must of course exercise very pernicious effects. Persons waking from sleep should have the eyes prepared by a subdued light first, and if the sight be good, the time occupied in partially dressing will be quite sufficient to prepare the organs for meeting a stronger body of light. This years, until one evening I was re- is especially to be remembered in summer time, where the chamber has some friends from Hull. They pre- an eastern aspect. Eleven hundred It sheds a halo of brightness around boys and girls are paper-stainers, the holy altar of home, and fans con-and eleven thousand work in the tinually the pure and lovely flame potteries. The statistics are part of a remarkable statement recently made in Parliament by Lord Shaftesbury, who produced evidence to show thing which may come in its way. --first, that nineteenth-twentieths It shows us how to be philosophers of these children work in ill ventilated factories; secondly, that the mortality among them is frightful, in the thorns that may beset our path. consequence of the poisonous airs By all means, then, should the wife they are compelled to breathe: third- cultivate a spirit of contentment in ly, that the young people of the lamind and enfeebled in body by evil | most trying scenes of life. - Ameriassociations, overwork and a total want of educational advantages.

Here are some additional facts likewise given on the authority of Lord Shaftesbury:

"In the pillow-making trade, the children suffered very much, espec cially in their eyesight from overconfinement in ill ventilated rooms. In many cases they had become iror chimney-sweepers. Although an act of Parliament has been passed openly, and pertinaciously violated. The act was in itself imperfect, but but in the country there were 2,000, and the number was increasing from came forward generally to give evidence against the continuance of this abominable system. It seemed that these boys were subject to a ence neither in or out of her sight. frightful disease called the chimneyhardened. And how was this done By rubbing chiefly their elbows and knees with the strongest brine. The child had to be taken before a powerful fire, and so great was the agony of this operation that they had to be driven to the place by the blows of a cane. After this they were sent out to work. Thoy often came back with their elbows and knees streaming with blood, and in this condition they were again held before the fire, and the brine was again rubbed in. Such were the excruciating and torturing agonies which were inflicted on these miserable children. He asked were these things to go on ?-Were they to call themselves a free country, or a Christian country. where these things were prepetrated against persons who were every whit as good as themselves, except in their worldly condition.?"

In the United States, with all the heinous faults laid at our door by the Tory Journals of England, there are no children of whom these things can be said. It has been left to the "guardians of civilization" to guard the entrance so well that civilization cannot enter.

THE WIFE.

in which we find women exerting and youth, and hopes to deliver it to the most important influence. There is not probably, in the whole scenes of life armed by those good tered upon the unchanted ground, I the window, if reading by daylight life of woman an era so particularly principles which her child has first interesting as that at which she assumes this high relation. Up to If we draw within the circle of our this period, she has been under the own contemplation the mothers of a guidance and protection of those who felt the warmest interest in her welfare, and gratified her every ing not on frail and perishnble matreckless and joined a set of counter- head form the shade.
