The eastern or Baltimore bank of the Monocacy is • for the most part steep and wooded, but with frequent slopes and openings, which would enable an army on the defensive to be flanked without much difficulty. The western or Frederick bank is comparatively smooth and even. Neither of them at this season is anything like so formidable as those of the Antietam, from Keadysville to its mouth on the Potomac. Otherwise the two rivers have a considerable resemblance to each other. West of the Monocacy to Frederick and thence to the base of the Catoctin mountain, and even half way up its slope, the country is comparatively smooth and well cultivated, looking in many respects like the valleys of Orange

county, of which it is a prolongation FIRST IN THE MARKET! geographically. Four years ago no person could travel through it without being struck by the apparent content-ment and order which prevailed among its population, which bore no resemblance to the ordinary type of the Southerners. Fredrick city, situated in this valley, looked then and still looks the very picture of neatness and comfort, as it was of prosperity and loyaity. On the eastern side of the bridge the

country looks differently, being more hilly and heavily wooded. The hills rise into a range of mountains which traverse the state from north to south, being the continuation of the chain which leaves the Hudson at West Point, and passes through New Jersey and Eastern Pennsylvanis into Maryland. Most of it would be found exceedingly difficult of passage by any army in face of an enemy of half its strength—the hills, ravines, and woods forwing so many natural means of defence for a distance of fitty miles, until the open country is reached near Balti-

The railroad bridge, about three hundred feet long, has had an interesting history. In September, 1862, although constructed with iron only, it was blown up by the rebels to check the arrival of reinforcements from Baltimore to McClellan's army, the man who fired it paying the penalty with his life.-Subsequently the garrison which surrendered at Harper's Ferry, upon being paroled, encamped there for a time; and if we are not mistaken a small garrison has been maintained in that neighborhood ever since.

On the western side of the river the railroad forks, a branch of three miles passing up on the right to Frederick, while the main stem bends to the left toward Point of Rocks on the Potomac. The Catoctin mountain is a range run-- ning parallel with the Blue Kridge, about an average distance of ten miles on this side. The Village of Middletown and Burkettsville are in the valley between the two, the former on the western slope of the Catoctin, and the latter at the base of the Blue Ridge, near the battlefield of Orompton's Pass. The turnpike, a national road bridge, is lower down on the Monocacy than the railroad bridge, the distance be-tween the two ranging about half a

PRESERVING FRUIT WITHOUT SUGAR.— Where it is desired to keep fruit without sugar, put it in bottles, fill them with cold water, and loosely put in the porks, which should be long and soft and previously soaked in hot water.-Bet the bottles in cold water and heat it-up to boiling; let it boil five or ten minutes. Then, with a mallet or other convenient instrument, force the corks in deep and tight, wire or tie them down, and the work is done. We have seen strawberries and other fruits kept in this way for more than a year.

They treat results as it they were causes; and so no relief is found

WHAT IS THE CAUSE OF THESE DISEASES very frequently? There is the secret—solitary self-abuse, practiced by thousands. Commenced when love, at school or elsewhere, it is kept up even during young manhood, producing mental and physical prostration. If continued, these diseases and even understones are the result. If the victim be conscious the cause of his decay, and quit it, he suffers under those terrible nocturnal and involuntary emissions which weaken and shame him, till life becomes grievous.—Thus place between certain decay and premature death and horrible suffering, the wretched victim rushes to SELF-DESTRUCTION, or sinks to an untimely grave. If he emancipates himself before the practice has done his worst and anters matrimony, his marriage is unfruitful, and his sense tells him that this is caused by his early follies.

WE, whose names are underwritten, having used the light Hubbard Mower, take pleasure in recommending it to the Farming public, as the best Machine extant; and we feel confident that those who wish to purchase a Mower will be satisfied that they have made a good investment of their money by purchasing the light Hubbard. We have used the above Mower during the whole of the past harvest without the necessity of stopping to repair; such is the strength and firmness of the Hubbard that with the proper care all the unrecessary expenses and loss of time rawonded which is so common with other Mowers. In short, the Hubbard fully comes up to our expectation, agreeably to the recommendation given it. Not only on account of the elegancy with which it performs the work but also the ease to the team with which it is done. The draft is lighter and the horses necks never suffer from soreness. All this is avoided on account of the Machine being so perfectly balanced. The Jubbard excess other Mowers on account of it doing the work as as itsfactority in driving slow as met, which also enhances the safety of the Machine on irregular or rough places.
