GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR

No implement more important to the farmer than a First-class Grain Thresher and Cleaner—for none pays him so well and so

The above cut shows the only Geiser Mahine now built under the immediate eye of the old inventors themselves, with all the additional improvements made during the past 18 years, and now with first-class workmen & material

this Machine just stands high above all of its class. As a thresher it is equal to the its class. As a thresher it is equal to the best, as a cleaner it is superior to any existing Machine. This is admitted by all honest competitors. Indeed it is the only Machine that really can, by one operation, thoroughly thresh and clean grain fit for market. But the fact that grain direct from this machine commands from 2 to 3 cents a backles are the grain direct from the same than a same than a same than the same t bushel more than grain direct from any other machine, settles the question of its superiority as a cleaner over all others. Impartial judges at all the State and County Fairs thal judges at all the State and County Fairs where it was thoroughly and practically tested, in competition with other leading machines, always agree that it is more simple—more easily understood and operated by those unskilled in machinery—more durable—threshing as much and yet cleaning better—with less power and more comfort to hear the pay. to hands than any other machine in use-and besides all that is sold for less money according to capacity. These facts are further attested by the thousands of purchasers, some of whom have had them in use for the last 18 years. To supply the wants of all, we now make 4 sizes, viz:—From a 2 Horse Railway or 3 Horse Lever Power, to a 10 Horse Lever Power, with prices ranging from \$190 to \$360, without power. We also make the latest improved triple-geared Horse Powers, suitable for each size machine, ranging from \$90 to \$135, and all-fully and fairly warranted. As a medicine for children, the Panacea is, in every way, calculated to take the place of the endies variety of drugs which are annually sold for that purpose, and which are often very injurious. A medicine which posesses the qualities of a catharite as well as a mild alterative, and which is capable of arresting discase without the least injury to the child, is of incalculable value to every mother. As a catharite, it is very elective, yet if does not if given in proper quantities, cause nausea of distress to the stomach or bowels. It is very pleasant to the taste, which is a very important feature as a medicine for children. As a presentire of discase it is unprecedented, as it acts directly upon the digosity organs and the blood.
