GRAIN SEPARATOR

No implement more important to the farmer than a First-class Grain Thresher and Cleaner—for none pays him so well and so

speedily.
The above cut shows the only Geiser Machine now built under the immediate eye of the old inventors themselves, with all the additional improvements made during the past 18 years, and now with

FIRST-CLASS WORKMEN & MATERIAL this Machine just stands high above all of tits class. As a thresher it is equal to the best, as a cleaner it is superior to any existing Machine. This is admitted by all honest competitors. Indeed it is the only Machine that really can, by one operation, thoroughly thresh and clean grain fit for market. But the fact that grain direct from this machine commands from 2 to 3 cents a bushel more than grain direct from any other machine, settles the question of its superiority as a cleaner over all others. Impartial judges at all the State and County Fairs where it was thoroughly and practically where it was thoroughly and practically tested, in competition with other leading machines, always agree that it is more sim ple—more easily understood and operated by those unskilled ih machinery—more du-rable—threshing as much and yet cleaning better-with less power and more comfort to hands than any other machine in useand besides all that is sold for less moncy according to capacity. These facts are further attested by the thousands of purchasers, some of whom have had them in use for the last 18 years. To supply toy wants of all, we now make 4 sizes, viz:— From a 2 Horse Railway or 3 Horse Lever Power, to a 10 Horse Lever Power, with prices ranging from \$190 to \$360, without power. We also make the latest impproved triple-geared Horse Powers, suitable for each size mechine reaching from \$500 to \$125. each size machine, ranging from \$90 to \$135. and all fully and fairly warranted.
