The Secretary of State, Mr. Fish, has put a stop to the practice becoming common in some of the German States of sending their convicts to the United States. Indiana has hit upon a plan, which if carried into execution, will effectually put a quietus upon the "emotional insani. ty" dodge, which is now such a blot upon our jurisprudence. A bill before the Legislature of that State provides that, whenever an accused person is acquitted upon the plea of temporary insanity, the judge of the court in which said acquittal takes place shall assign him to a lunatic asylum for a term of years proportionate to the enormity the crime committed.

With him she lived fourteen months, when he died, leaving her all his property. She denies having poisoned this man, although she is strongly suspected of having done

so. Soon after the death of Hurlburt she married a widower named Horatio N. Sherman who had several children and a mother-in-law living with him. This man became intemperate, and spent a considerable amount of her money. One day the father remarked to his wife that he wished his little son Frank would die, then his grand-mother, who was very much attached to the child, should not remain another day in the house. Mrs. Sherman was not long in bringing about his wish. She gave the child a dose of arsenic in some milk, and the child died that evening. THE HORRORS OF 1872.—The year just closed has been, from the beginning, laden with disasters by fire, flood, storm and earthquake. The old and new alike experienced the devastations to life and property never before recorded on the pages of history. Says, truly, the Cincinnati Comnercial, in a paragraph contemplating the past twelve months: While the northern coasts of the Old World are strewn with the wrecks of ships, and rivers have risen from their beds-inundating extensive and fertile plains, sweeping away the property of the inhabitants, and destroying hundreds of lives, we have, coming thick and fast in our own land, horror upon

horror and loss upon loss. Commencing with the destructive conflagration in Boston, no day has passed that has not had its own story of the destruction of property by fire, the amount rarely falling below a quarter or a million. We think it not an exaggerated statement to say that the average loss has not fallen much below a million of dollars. And ed to defects in construction. This must not be repeated in building, if we hope to

escape with better fortune hereafter. The chapter of recent accidents is an exceedingly long and painful one. That of the Fifth Avenue Hotel stands out unrelieved by a single mitigating circumstance, but its horrors are surpassed by the details which the telegraph brings us of the accident at Prospect Station, Pennsylvania. Following close upon this was the falling in of the floor of a church in Williamsport, from the debris of which a mass of mangled humanity has been drag-

ged by surviving friends. And now comes the intelligence from Memphis of the breaking of an ice-gorge. four miles above the city, the ice cutting extent of the disaster is not yet known, but the losses, it is thought, will not fall below a million of dollars.

May 1873 deal more graciously and mercifully with the world.

Other men ran to their stables, supposing some of their horses or stock had received injuries, or were dying. We heard of one man who ran out to the field where he evening of the 18th February, which will had some stock, believing they had been hurt in some way. Such reports as these come in from so many reliable farmers, that it has awakened in our community a great deal of curiosity, and any amount of talk.

What it was, we have no idea at all.-Some attribute it to the breaking of the ice on the Potomac, some eight or nine had escaped from a menagerie somewhere in the South and had strayed up into these paris. Others think the sound proceeded from the Washington County R. R., produced by the cars, or something of that sort.
