A CARD.
 HAVING had the misfortune to lose my barn by burning in August, 1872, including grain, hay, farming implements, etc., I take this method of returning special thanks to kind neighbors and others who assisted me so liberally by contributions of other things, in rebuilding without which I would have been left in a helpless situation. May these acts of kindness and sympathy not fail of their reward.

STEAM-ENGINE AND BOILER WORKS
 ESTABLISHED 1853.

STATIONARY AND PORTABLE STEAM-ENGINES, BOILERS, AND ALL OTHER MACHINERY MADE TO ORDER.
 The above cut represents our Horizontal Engine with Improved side Bed. This design makes it strong, neat and durable and upon which we have made some valuable improvements, especially upon the working parts making them durable and economical.
 We build Horizontal Engines with box beds of different sizes and designs and upon the most improved plan.
 We also make Upright Engines of different sizes and styles, and where economy of space is an object, they have some advantages over the Horizontal, also in the wear of the Cylinder, which is always equal in an Upright Engine.
 A special point of advantage in these Engines is our (A. O. Frick's) recently invented and patent self-adjusting BALANCED SLID VALVE, suited to all Steam Engines and Locomotives. It leaves the Engines as simple in operation as those of the ordinary plain slide valve class. We direct special attention to this superior valve, and invite correspondence.
 We give special attention to Portable Engines and Saw Mills; also Agricultural Engines for threshing grain and for farm purposes generally. Also
STEAM BOILERS,
 of all sizes. Further information may be obtained from the manufacturers,
