Gov. Whyte, of Maryland, has been hearing the counsel of Davis on their application for his pardon. The chief ground was the fact that Shue's testimony had not been received during the trial. They agreed to produce Shue to undergo an examination before the Governor, but after several delays, on Monday declared Shue had left the State to escape the examination. Shue had asserted, before he left, that he did not want the people of Carroll County to say that he had either cleared Davis or hanged him.

-Stern justice demands the lives of the Modoc murderers, and upon the morning of October 3d (to-morrow) such of them as incurred the severest sentence of the Military Commission which sat in judgment upon their crimes will be hanged. Those who are to make expiation are Captain Jack, Schonchin, Black Jim, Poston Charlie, Barnco and Slalnck. All of these were concerned in the assassination of General Canby and Dr. Thomas. The execution will take place at Fort Klamath, Oregon, not far distant from the scene of their crime.

The ravages of the vellow fever at Shreveport are appalling. Four hundred and forty deaths have taken place up to Friday, or about ten per cent. of the total population of the town. The list of victims numbers a member of Congress and other eminent men. The death roll for Friday numbered twenty-two. A despatch from Memphis states that there were twenty-two interments on Saturday, making a total for the week of ninetyeight, a decrease of thirty from last week. The yellow fever has also appeared at Cairo, Illinois, there having been six or eight fatal cases already.

The good people of Philadelphia were shocked on Wednesday by the news of a terrible domestic tragedy. Thomas B. Parker shot his wife and then blew his brains out. The parties moved in the highest social circles to which wealth could raise them. Parker was one of the five heirs to an estate of three millions of dollars, and he had an income of fifty thousand yearly. His wife had been living with him in peace, if not in happiness, for twelve years, but jealousy drove him to the bloody act which ended the career of both upon earth. Whether the motive had any warrant in fact the despatches do not state. The double crime created much excitement throughout the city.

BARNUM BALLOONING .-- P. T. Baroum, the great showman, was to start for Europe in the steamship Scotia on Friday. Previous to his departure he had a balloon interview with Prof. Wise and au aeronaut Dr. Passell, taking notes freely in regard to construction. Some of the talk reported is very wild, tending to show that there is not as much known about earostatics as might be known by 'professors" of air navigation. The son of Prof. Wise, who was present, expressed astonishment that the champion of "easterly currents," his father, should be as positive that he could start from London and come to America as he had been a few days ago that he could reach England from New York. Young Wise thought the trip from London to America could be made only by a complete circuit of the globe, and Mr. Barnum said he did not care a straw how it was done, if it was only done. SAD TRAGEDY NEAR HARPER'S FER-RY .- A sad tragedy, resulting in the fatal shooting of Miss - Reed, an interesting young lady aged about 17 years, daughter of John H. Reed, Esq., of Washington county, Md., occurred at her father's residence, opposite Harper's Ferry, en Saturday evening a week. It seems says the Charlestown Spirit, that Mr. Willis Allison, a young man from Harper's Ferry, was at the residence of Mr. Reed on the evening in question, and, in company with a little brother of the young lady, was playing with a donble-barreled shot-gun, when Miss Reed addressed him and cautioned him that he had better put up the gun, or he might shoot somebody. Allison there upon, as we are informed. drew the gun up to his shoulder and idly remarked that he would shoot her, when the gun was discharged and the young lady fell to the ground and expired instantly, having received the entire charge of the gun in her breast, some of the shot penetrating her heart. The opinion expressed by those present, we understand is that the occurrence was entirely accidental. It is another sad warning against the careless handling of fire arms, and should be so impressed upon the minds of every reader of this article.

Happily, however, there is no property actually lost by these panics; a lot of fictitious values, which have been slowly accumulating, suddenly disappears, but every cent of real value remains in the country. Hard work and economy will set us all right in time."

A double murder of a peculiarly horrible kind was discovered on Saturday morning near Montrose Station, on the Delaware, Lackawanna and Western Railway, a place not far from Scranton, Pa.-The bodies of an old lady of sixty-five, and her daughter aged thirty, were found lying across the track, but were not injured by any train. After murdering the women, the scoundrels laid the bodies across the track to cause the belief that they had been accidentally run over by a train. On the lands of Jacob Middour, G. A. Rock, and others, we noticed what was represented as the finest surface indications of iron ore. Ore of fine quality was laying around the well in large quantities. A short ride from this point brought us to the residence of Mr. Henry Good, where, after a half hours chat, we partook of a sumptuous meal. Mr. and Mrs. G. are noted for their kindness and hospitality, of which during our stay, we had ample evidence. Dinner over, a couple of hours was passed in going over fields of Mr. Good and Col.
