FIRST-CLASS WORKMEN & MATERIAL

his Machine just stands high above all o its class. As a thresher it is equal to the best, as a cleaner it is superior to any exists ing Machine. This is admitted by all honest competitors. Indeed it is the only Machine that really can, by one operation, thoroughly thresh and clean grain fit for market. But the fact that grain direct from this machine commands from 2 to 3 cents a er machine, settles the question of its superiority as a cleaner over all others. Impartial judges at all the State and County Fairs where it was thoroughly and practically tested, in competition with other leading machines, always agree that it is more simple—more easily understood and operated by those unskilled in meeting and practically the set of the set o rable—threshing as much and yet cleaning pressed and iron-ware roofing and spouting better—with less power and more comfort of the best tin. Repairs done promptly and to hands than any other machine in use-and besides all that is sold for less money according to capacity. These facts are further attested by the thousands of purchasers, some of whom have had them in use for the last 18 years. To supply tou wants of all, we now make 4 sizes, viz:— From a 2 Horse Railway or 3 Horse Lever Power, to a 10 Horse Lever Power, with prices ranging from \$190 to \$360, without power. We also make the latest impproved triple-geared Horse Powers, suitable for each size machine, ranging from \$90 to \$135, and all fully and fairly warranted. For further information send for circular and price list. Responsible Agents in Territory not introduced. Address.

The above cut represents our Horizontal Engine with Improved Side Bed. This design makes it strong, neat and durable and upon which we have made some valuable improvements, especially upon the working parts making them durable and economi-

ent sizes and styles, and where economy of space is an object, they have some advantage over the Horrizontal, also in the wear of the Cylinder, which is always equal in an Upright Engine.

A special point of advantage in these Engines is our (A. O. Frick's) recently invented and patent self-adjusting BALANCED SLIDE VALVE, suited to all Steam Engines and Lecomotive. and Locomotives. It leaves the Engines as simple in operation as those of the ordina-
